## THE IRRIGATION CONGRESS.

Oregon Association Meets and Elects Its Officers-Several Addresses.

Portland, Nov. 19 .- The first day's ession of the Oregon Irrigation Association convention was devoted, for the most part to organization, appointment of committees, and election of officers. A few addresses were delivered, but the work of the convention will not commence until today. The following

officers were elected: President, A. H. Devers, of Portland; vice president, W. R. King, of Malheur; secretary, J. M. Moore, of Portland; treasurer, W. T. Wright, of January 14 and 15. Union

Addresses were delivered by Geo. H. Williams, mayor of Portland; J. N. Williamson, representative-elect to congress and state senator from Crook, Klamath, Lake and Wasco counties, and F. E. Beach, president of the Portland that river. board of trade. There are about 275 delegates and visitors in attendance at the sessions.

The great enthusiasm that is being shown by the delegates to the irrigation convention will have its weight toward securing a liberal apportionment of the national irrigation fund for Oregon. It is the desire of the department of the interior, which has the matter in hand, to satisfy public sentiment. Much will depend upon the surveys and the condition of the country, but the department will not think of forcing irrigation upon sections that do not seem to wish it. A section so situated as to be easily and economenthusiasm, is probably the one that will be the most favored. Lack of enthusiasm may tend to turn the department against a section, but any amount of enthusiasm cannot change the natural conditions of the country.

# BOOK ON PHILIPPINES.

New Work Just Issued by Insular Bureau of War Department.

Washington, Nov. 19 .- The Pronouncing Gazetteer and Geographical Dictionary of the Philippines, with maps, charts and illustrations, which was prepared in the bureau of insular affairs of the war department, has just been issued, and contains a wealth of information concerning our Oriental possessions. The gazetteer proper contains 264 pages, including the index, while the geographical dictionary occupies 668 pages, exclusive of the maps, charts and illustrations.

When Dewey's brilliant victory awoke national interest in the Philippines, the obtainable literature in English on the question was meager, while the Spanish works were to be found in but few libraries, so that the work of obtaining complete and accurate information of the islands, their geographical resources, history, etc., has been a very difficult one. Requests already received for the edition exceed the limit ordered by congress to be printed.
