The glory of Niagara is departing. The big drain upon this magnificent waterfall for electric power is fast depleting the volume of water that has for ages been one of the grandest sights lu nature. D. W. Welch, the original promoter of the Nisgara Falls Power company, recently said: "Enough applications are in Albany now for permission to build and operate power plants to take water from Niagara river to reduce the flow over the falls onefifth. The Chicago drainage canal is carrying a great volume of water downwards towards the Mississippi, diverting it from the falls. The Canadian government is granting franchises to companies to use the water as fast as we are on this side. Steps should be taken to restrict the number of concerns allowed to use the water of the following that the following of grand cataract will be gone."

R. H. Weber of The Dalles, fruit commissioner for the fourth district, in his report to the state board of horticulture says: "All varieties of trees have wintered well in this district, and the prospect for a good crop of all kinds of fruit is better than it has been for some years. The earlier sorts, such as peaches, apricots, nectarines, are in full bloom, and while there is yet some danger from late frosts, the season is fast advancing and the danger is steadily diminishing." Mr. Weber informs the Chronicle that he does not place much credence in the reports of injury to fruit by the frosts of last week. He has never known a late spring like we are having this year to be other than beneficial to fruit.
