

## WHITE SALMON NOTES.

The directors of this school district have invited all interested in educational matters to meet with them next Saturday afternoon, 2 o'clock, at the school house, to consider the matter of bonding the district for the erection of a new school building. A. H. Jewett and wife, it is reported, will offer to dedicate land for a new school site.

Dr. Herbert Carlwell and family of Portland have been guests at the Jewett farm this week. The doctor served in the Philippines as an army surgeon.

An up-to-date, easy running stage coach, resplendent with paint and trappings, has been put on the Trout Lake run. White Salmon is on the move.

Some of our fruit growers are turning their attention to the cherry as a future money getter. Mr. Waldo's young orchard shows what proper care will do for young cherry trees.

The Glacier is a welcome guest at White Salmon, and through its columns we invite all Hood River over to this side. Come over and see how we are developing. Come over and take a look at your town and your own Mount Hood. You can't see them well from where you are.

Editor Harlan surprised the White Salmon people a few evenings since with a statement of his religious belief that proves him to be both an orator and a humorist of no common variety. He is a rare avist or "sui generis," as the scientist would designate him. To sum up his philosophy in poetic meter we would say:

Then here's to you Harlan, as good as you are,  
And here's to me, as bad as I am,  
And here's to you, as good as you are,  
And here's to me, as bad as I am,  
I'm as good as you are, as bad as I am.

Born—in White Salmon, Wash., July 30, 1885, to Mr. and Mrs. C. M. Wolford, a 9-pound son.

C. Mickelsen is erecting a store building at the falls of White Salmon, which will be occupied by E. P. Williams of Kingsley, Oregon.

C. M. Wolford & company, the enterprising White Salmon merchants, will open a store at Trout Lake, which will be in charge of the junior member of the firm, O. J. Smith. Looks as if we were growing, doesn't it?

The following are the shipments to date of tomatoes from White Salmon:

Shippers.	Boxes.
C. D. Moore	700
S. C. Zeigler	500
J. P. Egan	200
G. Adams	125
A. R. Byrket	50
A. H. Jewett	25
C. A. Shurtle	20

**Underwood Breivites.**  
Mrs. Bert Veatch is sick and under the doctor's care.

Frank Larson is with the Columbia River Northern surveyors at Chenoweth. He declares he knows nothing of the ulterior motives of the company for which he is working except that they are running a line for an irrigating ditch over to Lava creek. It is intended to make the canal 6 feet wide at the top and three at the bottom. This will permit the floating of logs.

School began at Underwood Monday, with Miss Phoebe Moore of Carson as teacher. There are 30 children of school age in the district, and the school house has a seating capacity for 26.

J. M. Kelley and wife of the Goddard-Kelley shoe company, Portland, accompanied by their daughter and Robert Fitzgerald are enjoying a summer outing on their ranch.

Ed Lyons attempted to shoot a rattlesnake, last Thursday, with a revolver when something flew up and struck him over the eye. The snake escaped uninjured, but not so with Lyons, who carries a very sore eye.

George Sando is up from Portland looking after affairs on his ranch.

Miss Isabel Davidson, who has been visiting Mr. and Mrs. A. J. Haynes, returned to her home at Portland yesterday. Miss Davidson is a cousin of the Chenoweth mail carrier.

Amos Underwood's big, black ferry boat, the one called "Old Betsy," lies on the sands at Underwood landing with a hole in her side. During the high wind last week, the breakers dashed the ferry onto the beach, and landing upon a lost anchor, she was badly injured.

Haynes, the mail carrier is doing all the ferry business now, excepting what goes on the scow.

**Chenoweth News Notes.**  
J. W. Hill and family went up to their ranch and spent Saturday and Sunday fishing and picking berries. They report a good time and succeeded in getting about 15 gallons of berries.

O. H. Brown and wife and a number of young folks went up the creek fishing Sunday. They succeeded in getting quite a nice mess of fish and brought home about five gallons of berries.

One of the party which is surveying up the creek on the sick list.

Earl Keys and wife spent two or three days in an outing last week.

Fred Kautz spent Saturday in Hood River on business.

Albert Yandle was in Hood River Saturday.

Mr. Darnell of The Dalles has just finished getting out 5,000 posts and will work for the W. L. company for a month or so.

glad to welcome you Mr. Editor, and all such as are interested in the development of this truly wonderful section. Call again.

The Cloud Cap Inn stages are much in evidence these days. There is a touch of history about these old pioneer-brace stages. The sight of them awakens tender recollections of pioneer days in the West. The days of '49—the days of gold—the days when the red man was a terror. Then later on, the days of the bandit; the days of hold-ups—a lock or key on granary or storehouse. Oh! those dear, old days when people were neighborly; when the latch string was always out, when the familiar word was "Howdy," light and come in. These days of modern invention and vice—but with the passing of the old through-brace coach passed the good old pioneer days, and with these days the pioneer himself, whose life was an important factor in the history of dear old Oregon. Passing from these pioneer days and the sturdy pioneers who have gone to their reward, let us, in order to perpetuate their memory, build a solid structure upon the foundation they laid, that the future of our great state may prove a worthy factor in our great nation.

Still the work of development goes on. Frank A. Masse of Willow Flat, who recently purchased land from C. L. Rogers, has let a contract for a lot of grubbing. Mr. Masse will soon erect a new house.

Referring to that ditch meeting Saturday, permit this thought. Mr. Bone, representing the company, has shown his faith in this country by putting in many thousands of dollars, and is now about ready to serve the people of the East Side with sufficient water to make this section not only a profitable but a beautiful suburb. If their facilities are not sufficient, why not take up the two hundred shares of stock that are for sale, at the same price it was sold at three years ago, thereby making 25 per cent, and push the work along speedily, to the end that this section may be reclaimed and beautified as nothing but water can do. It is my opinion that the necessary work of irrigation has been materially retarded this season by reason of contracts having been signed with a concern that the people know little of, and from which as yet have nothing but promises, many of which, I am reliably informed, can never be fulfilled. It is proper to have competition in all legitimate lines, but better to fight before proceeding too far.

E. F. Folts has two Jersey heifers only two years old that he is milking, which brought him a revenue in July of \$17 in milk and butter, and one of them is decreasing in milk and will be fresh in October again. Mr. Folts figures that when they are four years old they will average 15 pounds of butter each a week. Why Seventy-five per cent of the butter sold at the Little White Store is creamery butter shipped from Portland, simply because ranch butter cannot be had.

**Pine Grove Cleanings.**  
Boyd Sprout has had a telephone put in his residence.

J. L. Davis went to Newberg, Ore., last Thursday to visit his family and will remain during the harvest season.

Fred Hennagin has returned to his home in Sherman county.

Allen Herman has purchased a heavy team of horses. He took his light team to Portland one day last week and sold it.

Mr. and Mrs. M. M. Hill, Mr. and Mrs. W. Fike and Miss Mara Smith returned home Saturday evening from a week's outing at Trout Lake. It is needless to say they had an enjoyable time.

Mr. Slevierkropp is getting ready to erect a fine new residence on his farm near Neil creek.

Robert Harbison has finished hauling his hay. He has over 50 tons of hay about three tons to the acre. He will irrigate and get a second crop.

There will be preaching at the church next Sunday afternoon at 3:30, by Rev. Clapp of Forest Grove.

**Crupper Croppings.**  
Every one is busy now cutting off berry tops and getting his berry fields in shape for the coming winter.

The second crop of clover will soon be ready to cut, and the yield will be up to the average.

Charles Chandler began work on his new house last Monday. A. T. Dodge and Mr. Chandler will do the carpenter work.

Mrs. McRoberts was visiting friends in Dukes valley last Sunday.

Joe Hengst and Roy Kelley went to the mountains last week for a ten days' outing, hunting and fishing and to have a good time in general.

The people in this neighborhood are glad to see the mail wagon running again as they found it very inconvenient to go to town to get their mail.

G. W. Cavers started for California last week. He goes with the intention of making California his future home, but he is like every one else who has lived in Hood River valley he will return in a year or two, satisfied that Hood River can't be beat.

**Gas From Fir Stumps.**  
New York Herald.  
Discovery of a new illuminating gas which can compete with coal gas for illuminating purposes, the detection of processes by which a new turpentine in limitless quantity and of properties permitting its general use in manufactures and arts, can be produced from material formerly thought worthless, and the solution of the problem of utilizing the by-products of the great Douglas fir, forests of which cover thousands of square miles of the Pacific Northwest, will be announced to the American Chemical society during its session at Cleveland June 20, by Professor George P. Frankforter, dean of the College of Chemistry of the University of Minnesota.

## Three Carloads of Furniture For the First Half of 1903,

And the cars just in by far the largest and filled to the roof with a better grade of Furniture than we have ever shown.

A mere statement of this fact proves much. We have not changed the policy that so quickly placed two carloads into the hands of users. We have improved it. PRICE, QUALITY AND ASSORTMENT, all changed to your advantage. No trouble to show goods. If we are busy, please go over the stock yourself. All goods plainly marked.

## STEWART, The Home Furnisher.

Hardware, Stoves and Tinware, Building Material, Furniture, Carpets, Linoleums, Matting, Shades, Pictures framed, Furniture repaired.

## To the People of Hood River:

Having purchased the grocery stock of O. B. Hartley, we wish to inform the public that we will continue the business at the old stand while more extensive repairs are being made to our permanent location across the street in the Langille building, where we will carry a down-to-date stock of Groceries, Crockery, Glassware, etc. We shall aim to make our prices reasonable, and your trade will be appreciated. Call and let's get acquainted.

## A. B. CROSIER & CO.

the saws through the pitch soaked fibres of the log. For this reason the lumbermen have cut the trees, frequently eight to ten feet in diameter, at a height of 20 feet from the ground. This left the pitch soaked stump standing to be burned or allowed to rot away.

Announcing the results of his discoveries, Professor Frankforter said today: "It has long been known that the pitch in the abandoned stumps had a commercial value, but the means of extracting it have not been at hand. It was to provide these means that I spent months experimenting."

"I have been astonished to find, by exact scientific methods that 40 per cent of the abandoned stumps is valuable pitch. This pitch, properly treated, produces a turpentine inestimably superior to that now obtained from the Southern forests, the supply of which is decreasing year by year."

"The new turpentine has all the chemical and medicinal qualities of the common commercial turpentine, but is absolutely free from its disagreeable smell and taste. These two features have been the greatest drawback to the more general use of turpentine in manufactures and the arts. The odor of the fir turpentine is mild and balsamic, and its taste is mild and pleasant. It might be utilized in a thousand ways, even in chewing gum and for soda fountain flavors, so pleasant is its taste."

"To give tersely the results, I will say that each stump contains 40 per cent of its bulk in pitch. It contains five or six cords of wood. Of the pitch in the stump, 20 per cent can easily be resolved into turpentine, 30 per cent into tar oil, and 50 per cent into common tar. The tar is an excellent product and can find ready sale. The minor product is pyroligneous acid, containing acetic acid."

"All the products of the fir stumps can be removed by what is technically known as 'destructive distillation.' One of the most marvelous features is that during the distillation process the fir gives out a gas of strong heating and illuminating powers, sufficient to maintain the process and furnish the means of extracting the products desired for commercial purposes. The distillation pays for itself and leaves the products of the pitch practically clear profit."

"After all the products have been extracted—turpentine, tar oil, tar, acids, gas—there is still left a charcoal, the superior of which is hard to find. The wonderful value of these stumps may be summed up in the single fact that not a shred is without commercial use."

"Regarding the gas given off, it is a strong illuminant, and with reduction operations carried on on a large scale it would be produced in volume sufficient to conduct extensive gas-lighting operations."

"For half a century these gold mines of cutover land have lain idle. Even the very refuse of the mills, which the owners have burned and given away for years, contained values sufficient to pay a large profit on the work of extracting them."

"A new source of turpentine at this juncture is especially important. I have made thorough tests of the Western product, and am able to announce that the South has a new competitor in the

field, which will supply a better article, and in larger quantity than it has ever been able to do.

"The United States yearly supplies three-fourths of all the turpentine used throughout the world."

Professor Frankforter has been conducting his experiments at New Whatcom, Wash., where there are large mills and extensive forests.

**Up The East-Side Grade by Moonlight.**  
Editor Glacier: I wish to air a few thoughts that have been floating about in my mind. I am not bothered with liver complaint nor am I in love, being beyond that stage, but some how or other these beautiful moonlight nights, the solitude of the Hood River forest and the murmur of the little falls and rapids of Hood river have a fascination for me. Being a lover of nature I have never in all my travels found but one place that could beat Hood River for grand scenery and the brightness of her moonlight nights, that is Colorado.

As a stranger, it seems to me that the people of this thriving little city do not fully appreciate the beauty and grandeur of the scenery right at their door. Where in all the world can a more lovely scene be found than the smooth wagon road as it winds its way out of the city, gracefully curving around the sides of the mountains, almost forming a horse shoe, as it climbs to the summit. All the way up the climb you hear echoing up from the canyon below the complaint of Hood river as it murmurs at the huge boulders that lie in its bed, seemingly trying to impede its progress to the sea.

It being in the evening, the mountain breezes cool your brow as you ascend to the top. At last as you turn a curve in the road you have reached the summit, and what a wonderful and majestic view breaks in upon your vision. Hood River valley, with its comfortable farm houses, well kept orchards, the mountain sides covered with magnificent pine, while high above it all towers old Mount Hood. His crown all covered with snow. The scene is too grand for the pen of an amateur to do justice to. It must be seen to be appreciated. And above all by moonlight. At this hour one can almost believe it possible to commune with the Creator himself.

## When You Come to Town

Do not fail to call and see us and give us a chance to fill your order. We quote Flour in not less than barrel lots at warehouse:

Dalles Patent, per bbl. \$4.15 White River, per bbl. \$3.90 Dalles Straight, \$3.30.

Feed at warehouse in not less than half-ton lots:  
Rolled barley, per ton. \$23.50 Shorts, per ton. \$21.00 Oats, per ton. 24.00 Bran and Shorts. 20.50 Bran, per ton. \$20.00.

Yours truly,  
**BONE & McDONALD**

## True to Name Nursery,

HOOD RIVER, OREGON.  
We will offer for next season's planting about 20,000 well-bred apple trees, largely Newtowns, Spitzenburgs, Jonathans and other varieties adapted to local conditions. This nursery stock was grown mainly to insure trees true to name and propagating from buds selected only from well known trees of health and fruitfulness. We warrant this stock free from apple canker, woolly aphid and other pests common to many parts of the country. As our supply of trees is limited, orders should be received at an early date.
