He has also sat for more than an hour at a time during the brooding season and observed one pair of robins bring in as many as 30 insects to the nest inside of the hour. Surely no one but an ignorant or a maliciously evil mind ed, crael and stingy individual could be guilty of such 'a breach of the law of the state and the unwritten laws of common humanity, and if such an individual does exist in all our valley, he who can produce evidence that will convice him of the crime of shooting any of our song birds should report to the sec retary of the Hood River gun club with the facts so that they can prosecute the uffender .- Ed.]
