A peculiar accident happened just this side of Kingsley one day last week in which a wagon and load of posts were burned. Henry Bolten had been after a load of posts which were charged on one end, and on arriving his destination a rain storm came up. Not wanting to get drenched by the rain he unhitched the team and went to the house, leaving the posts stand on the wagon. One of the posts had a little more fire in than Mr. Bolten expected, and during his absence took blaze, burning the posts and all of the wagon except the front wheels. —Tygh Valley Bee.

tant events take place daily. There is music by the best bands in the world; and it costs you nothing to hear the concerts. On the Trail you may hear music played by people of various nationalities, on the old instruments peculiar to each land.

Never Saw Finer Berries. Dr. W. F. Leraway sent some strawberries to a friend of his in Iowa, and has received the following letter on receipt of the berries there, where they appear to have made a great hit: "We have always considered it an honor to be numbered among your friends, but to be remembered with a box of Hood River strawberries is a rare treat and we thank you very much. They were the finest strawberries I ever saw and their flavor delicious. Our berries that we think fine are flat and tasteless compared with them."

We enjoy the papers so much you have so kindly sent us. How much I wish we could sell out here and come to Hood River to live, I think I could see better and hear better and not have so much time to think and worry. Of course you hear from here that the fruit crop as usual is a failure. So far it has been very dry and the outlook for the farmer is not the best. It is either too much or not enough here."

Those in the party were James DeBorde, O. H. Gray, Bert Stranahan, Jack and Elwood Luckey, — Stewart and Cecil Holman. The party drove from town Saturday night. California Will Come Here. E. P. Wray, a fruit man at Lakeport, Calif., was in Hood River last week, and became so impressed with the favored conditions for fruit-growing here that when he left Friday afternoon he told Mr. Smith that if he could dispose of his interests in California he would locate in Hood River.

Mr. Wray is the gentleman whose letter was published in the Glacier recently telling about his propagation of the codlin moth parasites. He is strongly of the belief that these parasites will solve the problem of eradicating the codlin moth from the Pacific coast orchards. His colony is prospering, and he says it is wonderful the way the little insects enter the worms and destroy the larvae of the moths.

Fishermen Report Light Catch. A party of local sportsmen whipped the riffles of the East Fork all day Sunday, returning to town late at night, the seven fishermen having landed 14 trout all told. The fishy trout don't care much this early in the season to rise to the fly, though the bunch of trout hooked by the boys were all of good size and very fat.

Jim Stranahan, who drove the boys to the fishing grounds and remained during the day at the camp, is said to have been the best fisherman. When the party returned Jim had a little trout about an inch and a half long in the frying pan. The fish is said to have been blind in both eyes, otherwise it would never have taken the hook.
