

# HOOD RIVER GLACIER

Published Thursday by  
ARTHUR D. MOSE, Publisher.  
Terms of subscription—\$1.50 a year when paid in advance.

THURSDAY, JUNE 22, 1905.

Hood River is to celebrate the Fourth. Now, let's all join in and make it a rousing success.

With warm weather coming on we must look for the customary hegetra to the cool mountain retreats.

In the death of C. L. Gilbert the community suffers the loss of one of whom it may well be said that those who knew him loved him. Kind and generous to family and neighbor, he was a man who made many people better for having lived among them.

Monday's election indicated plainly that a majority of the taxpayers desire the city to own its water system, even though the question lacked a few votes of the necessary two-thirds majority to carry. There were some objections raised to one or two of the clauses in the former ordinance calling for the bond election. These were changed by the council Monday night, particularly the clause referring to the purchase of the present private system. The voters are given three weeks in which to give the subject further thought before voting on the proposition once more.

Last Saturday's convention should be productive of much good if it merely instills into the minds of our business men and farmers that without a liberal expenditure of money, the expense for properly constructed highways is an asset which will return many fold on the investment. As well said by Mr. Loucks, two miles hauling fruit over stony roads does more harm to the products of the field than 2000 miles in an express car. Let us follow the advice offered by the national officials and agitate the question until the powers that be give us good road legislation. The people of Pine Grove have been helping themselves, and today have a piece of road that received a compliment from the visitors. Let the good work continue. Give the Wasco County Good Road association a boost.

## FIND EASY GRADE IRRIGATION CANAL

The surveying party which is running lines for the proposed irrigation canal for the farmers of the recently formed bonded district were west of the Punch Bowl the first of the week. They expect to reach the Jones place by Friday, and to complete the work in a few days.

Mr. Shoemaker informs the Glacier that in the four and one-half mile between Silding gap and Dead Point but 400 feet of rock was encountered, thus insuring an easily constructed canal.

Small blaze in Box Factory. By bricks crumbling from the boiler bank at the box factory, a small blaze and good sized scare was started about 7:30 Tuesday evening. Being on the north side of the building, the Fruit Union fire department was the first on the ground. With Hull at the nozzle, Leenberg at the faucet, and Bailey and Franz shooting orders, the flames were soon quenched.

Hold Annual Church Meeting. The annual business meeting of the First Unitarian church of this city was held in the church parlors after the morning services last Sunday. T. J. Canning presided as chairman. A ballot for the trustees showed the election of the following: E. A. Franz, R. M. Huxley, E. N. Blythe, Mrs. A. Whitehead, Mrs. C. F. Waldo, Mrs. B. F. Shoemaker.

Death of Dr. Southard. Dr. D. H. Southard, former years manager of the Thompson boarding house in this city after suffering for months from a complication of diseases, died Wednesday evening, June 14, just as the clock was striking the midnight hour.

Good Weather for Crops. The government Crop Bulletin for June 20 reports conditions throughout the state as follows: The weather during the past week has been quite favorable for the growing crops. In some few localities late sown wheat and oats would be benefited by more rain, and owing to the dry weather grass on the low land ranges in the interior counties is turning brown, but it is still green and abundant in the foothills and mountains. Stock generally is in excellent condition. Fall wheat is filling nicely and fall barley is ripening and will soon be ready to cut. Spring wheat continues to make satisfactory progress, and oats, although not in so good condition as spring wheat, look

promising. The grain aphid is disappearing, and no great damage has been done by this pest. Haying has begun and will become general in a week or two. Much clover, vetch and alfalfa has already been secured, and the hay crop generally promises to be an average one, if not better. Hops are arming and show considerable improvement since last report. The yards are well cultivated, but on account of missing hills and uneven growth yields are expected to be less than usual. Early potatoes are in the market. Cherries are ripe and the crop is below the average, being good in some localities and almost a failure in others.

## BIG CANAL FOR HORSE HAVEN

Special to the Glacier. Goldendale, Wash., June 21.—R. W. Fouts of Seattle, one of the promoters of the proposed Horse Haven canal, is in town this week looking up the present ownership of the land along the route of the canal preparatory to taking contracts for water. Mr. Fouts seems highly enthused with the prospects, and says the preliminary work will be done by September, and work on the ditch will begin not later than the first of the year. The intake on the Big Klickitat is according to surveys, about 2200 feet above sea level, while the highest point on the ditch in the eastern end of the county is 1900 feet.

This is a large undertaking. The ditch when completed will be about 130 miles long, and will cost in the neighborhood of \$1,000,000. It will be of great benefit to the Horse Haven country and the land tributary to it along the line.

A great many of our people are attending the fair at Portland this week among them being F. B. Stinson, deputy sheriff, and county surveyor A. L. Richardson and wife.

The commencement exercises which closed last Friday finished the last year of Professor Charles Timblin's school work here. He goes from here to the State Agricultural college at Pullman as one of the principals of that institution. He has been associated with the Klickitat academy since it was started in 1896, being one of the original promoters of the school. His management of the institution has won for him a host of friends who, while they regret to see him and his amiable wife leave, wish them the success which is their due. They leave a record of which any one can well be proud, having started an educational institution in this town which will stand as a lasting monument of their pluck and energy.

Another good rain fell Saturday. This will insure a good crop as the ground now has enough moisture.

## WOULD ENCOURAGE THE BING CHERRIES

A. C. Butcher, who is here from California buying cherries, estimates the crop in the valley at from 5000 to 7000 boxes, believing it will come nearer the 5000 mark, the crop being light this season. Mr. Butcher would encourage planting of Bing cherries rather than any other variety. The Royal Anne is over done, as a glance at the market quotations will indicate. Mr. Butcher is putting up a first-class pack, and is shipping to New York, the northern markets at present being overstocked with cherries from the Snake river valley.

Mr. Butcher says the greatest difficulty he encounters is the poor picking done here. The fruit is gathered too green. The pickers are paid by the pound, and it is their endeavor to get all they can into the hands of the packer. In California pickers are paid by the day. With the big expense a cherry shipper is put to, there is no money in the business for him unless he can reach the high grade markets with fancy goods.

Another trouble with some of the cherries received here is the fact that some of the growers will irrigate a cherry tree after the fruit begins to set in color. This will make the cherries soft and have a tendency to turn them black in a few hours after picking. "Water cherries only while the fruit is small," says Mr. Butcher. He states further that early varieties here would not be profitable, as too many such cherries can be had in California.

Bings Scarce in Spokane. Spokane, Wash., June 21.—Ryan & Neckett of this city report the cherry situation as follows: "Bings are scarce, selling about 80 cents to \$1.00. Royal Anne are weak at anywhere from 50 to 75 cents. We would not be surprised to see them down to 50 to 60 cents for the very best. Black Republicans are also scarce, in fact very few have reached this market as yet. We believe 65 to 75 cents would be a conservative estimate of the price that they could be sold for this week."

# The PARIS FAIR

Never Undersold "The Home of Low Prices." One Price to All

All our goods are always marked at cut prices

# Hood River Sanitarium

DR. MARY JOHNSON, Supt.

...IDEAL HOME FOR ALL INVALIDS... Climate and view unsurpassed in the United States.

## POPULATION OF CITY IS 1808

The population of Hood River is 1808, according to the census conducted the first of this month by deputy assessor M. P. Leenberg. Mr. Leenberg says there are at least 100 people living practically within the city, but who are outside the corporate limits and therefore could not be enumerated. January 1 the population was 1781. The federal census of 1900 gave this city something over 500.

Berry Season Comes to Close. The strawberry season has about reached its final winding up. The crop will total 100,000 cases, if not more, and the season's average in returns will come to between \$1.40 and \$1.50, making the total money returns to the grower about \$150,000. Prices and the quality of the berries the first of the season never were better, going to prove that the biggest money is in the early berries. Growers coming in at the height of the season will not realize as good money as those whose patches were later, but the highest returns will come to the man with the early patch. Mr. Shepherd is of the opinion that as much money could have been made by Hood River growers with one-fourth less work if the crop had been but 75,000 crates.

Will Help Wheat Crop. W. F. Byars, editor and publisher of the Goldendale Sentinel, accompanied by Attorney Brooks, was in Hood River last Saturday, in attendance at the good roads convention. Mr. Byars says Klickitat county will harvest a bumper wheat crop this summer.

That part of the county east of Hood River is estimated will produce 1,000,000 bushels, and the balance of the county nearly as much. Heavy rains the first of June soaked the soil to a depth of nearly a foot, and this has insured a heavy yield, and in fact the best crop in years.

Locals Win Good Game. DeWitt's lucky run in the eighth inning gave Hood River the game over Columbia university last Saturday afternoon. With the score tied and track to the end the spectators watched an interesting contest. The score: R. H. E. Hood River, 0 0 2 0 1 0 0 1 0—4 7 3 Columbia, 0 0 0 0 1 0 0 0 0—5 2

## COUGHS AND STRENGTHEN WEAK LUNGS. Kennedy's Laxative Honey and Tar contains no opiates, is pleasant to the taste and is best and safest for child or adult. Sold by G. E. Williams.

Brings in First Ripe Tomato. D. D. McClure, of White Salmon, reached the Glacier office Wednesday noon with the first ripe tomato of the season. The tomato, of Small's Earliest variety, was fully grown, being three inches in diameter, and weighed on one side sufficiently to be called a shipping tomato.

The tomato crop prospects at White Salmon are very good this summer.

At the Churches. Riverside Congregational—W. C. Gilmore, pastor. Sabbath school at 10 a. m., worship and preaching at 11. Subject: "Things which Kings and Prophets have not seen." Young people services at 7 p. m., adults at 8. Social music by the quartet choir. Subject of discourse: "Mansions Whitman."

Mount Hood.—The 4th Sunday at 11 a. m.; Sunday school at 10 a. m.

In the Pacific Fruit World, Prof. A. J. Cook reports that much damage is done in California to roses, raspberries, blackberries, Logan berries and plants, and is on 1st and 3d Sundays at 11 a. m.; Crapper—1st and 3d Sundays at 2:30; Sunday school at 2:30. Mount Hood.—The 4th Sunday at 11 a. m.; Sunday school at 10 a. m.

## SLAYS 700-POUND SILVER-TIP BEAR

By a Staff Correspondent. Hiram, Wash., June 20.—Slowly but surely old Bruin is being hunted and soon will be extinct on the Washington side. Last week Peter McMillan shot a 700-pound silver tip near Mission City, back of the mountain. The silver fellow had left the mountains and ventured nearer civilization and soon the word passed along the line that a monster had been sighted. Mordecai Jones, that elegant gentleman and thorough sportsman, soon had his bunch of dogs out and the fray of the hour could be heard vibrating through the heavy forest as the scent was followed that meant death to old Bruin.

In the chase the best dog was killed, and it fell to the lot of Mr. McMillan to get the lucky shot that ended the career of one of the largest bears killed this season in this section. Mr. Jones has the honor and distinction of having slain six last season, but so far bears have taken to the tall timber and it means many miles before a scent is found. It is needless to say that Mr. McMillan's cloak expansion was visibly increased when he showed the gang how big he was his aim.

If in a kind of a billion mood, you wish an aid to digest food, no other pill will hurt so good. As DeWitt's Little Early Risers. The Famous Little Early Risers cure Constipation, Sick Headache, Biliousness, etc. They never grip or sicken, but impart early rising energy. Good for children or adults. Sold by G. E. Williams.
