Franz of the Hood River Fruit Growers' union, tipped it off to the Glacier yesterday afternoon that the electric motor brought from Omaha last month by the Union Pacific was still on the line at lightning speed, remaining at the station here just long enough to oil up. This motor, it seems, was not the success it was expected to be on the Hillsboro road, the grades being too steep. It was also tried on the Milwaukee branch, but was a failure there. Has Largest Store in City.

The annex to the big store of William Stewart, the home furnisher, has been completed, and the store force is busy arranging the display of goods to a much better advantage. Mr. Stewart has added one and one-fifth times to his floor space, and now has the largest store in the city, and possibly the largest in the country. The ware room is a great convenience. Everything has been arranged and made by Mr. Stewart to facilitate the handling of his goods. An overhead truck with block and tackle permits the loading and unloading of heavy lime and cement barrels with perfect ease. Another invention of Mr. Stewart's is the placing of all oil cans where they will be out of danger from matches carelessly thrown aside. By means of pipes and facets, the oils are drawn from the tanks, and all the waste carried safely away, thus minimizing all possibility of combustion. A large force of obliging clerks is on hand to attend to every want of the customers. Mr. Stewart believes in carrying large and complete stocks, giving the purchaser an opportunity to select just the article in each line which he or she desires. One of the new cases contains over 8000 worth of knives, something never before dreamed of in a city the size of Hood River. Bond Issue is Defeated. The city election last Friday on the question of bonding for a municipal water system, resulted in 88 votes for bonds, and 82 against. This was a large gain for the opposition, and was far from a two-thirds majority for the proposed bond issue. Four weeks ago the result stood 60 for bonds and 64 against.

SWIM COLUMBIA AND BACK AGAIN

John Leland Henderson of this city and his brother, Professor Louis Henderson, of the University of Idaho at Moscow, swam the Columbia and back again Tuesday without leaving the water. The swimmers left the Oregon shore near the Oregon Lumber Co.'s mill, kicked their feet against the rocks of the Washington side midway between, White Salmon dock and Underwood, returned and landed on the sandbar below the city. The distance is nearly three miles. Attorney Henderson is 55 years old his brother five years younger. By means of pipes and facets, the oils are drawn from the tanks, and all the waste carried safely away, thus minimizing all possibility of combustion. A large force of obliging clerks is on hand to attend to every want of the customers. Mr. Stewart believes in carrying large and complete stocks, giving the purchaser an opportunity to select just the article in each line which he or she desires. Fire Prophecies Made; Fire Balls Seen.

Some preacher from the Willamette valley, who held services last Sunday night at the Valley Christian church, made the prediction in his sermon that there would be a waterspout on Mount Hood between the 27th of this month and the 10th of August, which would send a tidal wave down the valley and drown every man, woman and child in its path, so wicked are the people here. And not to be outdone by the sea serpent stories at the seashore, a pipe dream was telephoned to the Portland papers Tuesday afternoon that guests at the Inn were bewildered through the presence of a celestial body, high above the mountain. At first the object was taken for a balloon, but on closer inspection with powerful glasses it was deemed a celestial body more or less incandescent in consistency.

Hood River Day at the Fair.

Joseph Norton Dolph, assistant secretary of the Lewis and Clark exposition, was in the city last Friday, conferring with the business men relative to a Hood River day at the fair. It was the general opinion of the business men that Wednesday, September 27, be set aside for this occasion. The matter rests entirely with the people of Hood River. The price of admission to the Lewis and Clark fair grounds in the evening has been reduced, by a provision whereby the purchaser of a fifty-cent admission ticket receives with his ticket coupons which admits him to twenty-five cents.
