ODELL

NUMEROUS VISITORS

By Roswell Shelley.

Last Saturday, Mr. Whitehead and Welling and Line Companies of the Davidson, in companies of the Davidson, in companies of the Davidson, in companies of the Davidson, and the Mr. and Mrs. Charles Davis are entered of the Davidson, and the Mr. and Mrs. Charles Davis are entered of the Davidson, and the Mr. and Mrs. Charles Davis are entered of the Davidson, and and the Store Mr. and Mrs. Charles Davis are entered of the Davidson, and and the life of the Davidson, and the Mrs. Charles Davis are entered of the Davidson, and as a third store of the Davidson of the prophecy conferrating corounty, atthough the said he had already seen many things that were revealed on the Mrs. He had already seen many things that were revealed on the Welling of the prophecy concerning or county, atthough the said he was not looking for a location, being well fixed and satisfied with his Ohio home. He expressed himself as believing that great benefits would follow the work of the Lewist and Clark fair which would redown to the upbailding of Oregon. He will return by way of Colorado. **

Wm. Kemp and wife, after an extended trip through Eastern Oregon and Washington, covering a period of a month or more, returned last west. They are wiser for the trip, yet upon their return are much more content, their Hood River spirit and gell to welcome them the Welling that would redown to the upbailding of Oregon. He will not did used to the prophecy content of the prophecy content of the prophecy concerning the Month of the prophecy concerning the Month of the Welling of the Last Saturday, Mr. Whitehead and wife and Deacon Davidson, in company with T. M. Payne, an old-time

Did you ever notice the balance wheel in your watch? The balance wheel of a watch gives live vibrations every

Diff you ever notice the balance wheel in your watch? The balance wheel of a watch gives live vibrations overy second, three hundred every minute, 18,000 every hour, 42,000 severy sins, and 18, 380,000 severy year. At each vibration it rotates about one and a quarter times, making 1908 severy sins, and 18, 380,000 severy year. In order that we may better undertand the stapendous amount of labor performed by these tiny works let us make a comparison with a locomotive having six-fost driving wheels. Let it be run until its whoels shall have given the same number of revolutions that a watch balance gives in our year, and it will have sovered a distance equal to twenty-eight complete circuits of the earth. All thus a watch boxs without other attention than winding once every twenty-four hours.

Now, suppose both machines started in good order. The locametive is added every fifty minutes, is carefully wiped and cleaned before being oiled. So that while doing the work of a state is rone year. It has been elemed 6,955 and oiled 23,910, (and is now in the shop for repairs.) While your watch—appears it down't have very dirty and even if it still keeps pretty fair time—wouldn't it do befor service and, wear much longer it carefully cleaned and properly oiled ONCE to every 14,000 time a locametive is.
