UNION'S APPLE CROP IS SOLD

Packer contains a long report on the apple crop of the United States, which it figures will not average more than and Charles at 140 per cent of an average crop. The related pessisimistic view is not taken by their at the real part of the Pertiand applemen. They acknowledge Where county he transport taken

right, good prices will be realized by Atterican apple growers this year. It shows now as though the grap is going to be a very short one. It is going to be a very short one. It is going to be a very short one. It is going to be fully all per contained to last censon's crop, if not more the detailed reports show that upplies in many sections are dropping hadly and that many orchards are infected with play against fungus, seab and other diseases, which in the course of the next for wants can, by their ravages, materially decrease the yield. A summary of the reports shows that in the New Far land states the yield will not reach more than half of fact year's grown Baldwine, especially, are doing out last season. An unknown parasite doing the work. Reports from No York state indicate that the error will houst year's crop. Weather conditions and the ravages of fungi from now on the

materially lessen this estimate.
In Pennsylvania, West Virginia and erop, but the output of this state is not amount to so much in a commer cial way. In Maryland the complete below the average. In the middle section, Obio, Indiana and Illinois have less than an avreage crop, The year will in no case be as large as the visit. will in no case be as large as the vortinity those states last fall. In Middle on there is the promise of semetima the 35 to 40 per cent of full erap. In Missouri the yield will be about in to 20 per cent of the full crop. In the Southwest, taking in the state of Arkansas and the two territories. More crop will be very light, not exceeding ARRANGING FOR will have about 2). will have about 30 per cont of a full crop. Iowa, Minnesota and blake have very poor crops. Colorado re-ports about an average yield. Callshort. Nova Scotia reports a very be lead thought poor crop, while Canadian growers theory Lagres will do well if they get 50 per cent of ranging the cro last year's yield. Taking the reports of the apple-growing states in detail. the prospects are that the crop will be the smallest raised in many your. The latest weather burong report, and called the scale of the scale of the latest weather burong report, and called the scale of the latest weather burong report, and called the scale of the latest weather burong report, and called the scale of the latest weather burong report, and called the latest weather burong report were burners. apple prospects are the gloomiest is sued in years. Taken altogether it loops as if these growers and will be so fortunate as to have apples this full. will realize good prices for them
The home demand prombers to be
very good, and already European inquiry for American truit indicates
that there is going to be a good outlet for all the full and winter-produce
