PICTURE MEN GIVEN THEIR JUST DESRTS

Many people who have been imposed on by importunate picture dealers will feel like voting the Carnegie medal of heroism to the woman resident on the

die. They exhibit samples of highly colored photographs of the victims which they have transformed from reson spread and several hundred people went down to view the wreck. Some however, were a little suspispectable looking citizens into freaks by giving them plak eyes, green hair and other grote que features and tell you confidentially that it is "swell" without asking your opinion. You don't care for any today, but this worst of all nuisances insists that if Ran Away Twice in One Day. you do not want a chromograph you must surely want a crayon and presents for your inspection a portrait that resembles the original about as accurately as would a mud fence. He calls your attention to the "beautiful" frame which is really their stock in trade and made to sell the picture irrespective of any artistic merit. The frame is shown but cheap and he at first quotes you a price which he later splits in half and if he sees no inclination to buy reduces again and tells you from a stissled you need not receive it when it is delivered. In the sees and ran down into town where

The men who deliver these abortious a few weeks later do the beavy work and are usually of the bullying type who threaten all sorts of dire trouble if you refuse to accept their wares which you did not ask for, did not want, and will not take. A little more of the vigorous action such as dis-played by the lady on the hill will have a salutary affect on those fel-lows, and for this she reason deserves the heartfelt thanks of a long-suffercommunity.

Hood River Was Easy.

The ball game yesterday afternoon was a very poor exchibition of the great American game. The visitors simply were not in it, but this was largely due to lack of oganization. They had considerable good material, but it was not played to advantage. They had no one who could hold Osborne, who thows a hard ball, so that The Dalles boys had a spap. Neither The Dalles boys had a snap. Neither team played stirtly high school tal-ent. The game was fortunately ended on account of the rain at the end of the fifth inning, the score being then 19 to 5 in favor of The Dalles. What it might have been at the end of nine it might have been at the end of the innings would be hard to conjecture. Fagan and Sexton, the home battery, did good work, but the team as a whole had no opportunity to show what it could do. It was apparent however, that Obarr would develop

into a star in the right garden.

The attendance was about 250. About two-score came up to root for the flood Hood River boys, but somehow, they week

heroism to the woman resident on the hill who thrashed a couple of these gentlemen last week. Their mode of operation is most exasperating for they usually insist that they know your business better than you do your self and that you must have a photograph that you want enlarged. You know that you haven't one, but they know better and once inside the door they stick with the persistency of a porous plaster.

They make a business of calling at the house when they know the man of the family is not at home, and work on the affection of the woman for her children and for her husband and tell how nice it would be to have a large picture of them in case they should die. They exhibit samples of highly colored photographs of the victims which they have transformed from research has looking citizans into freaks.

Osteopathy has discovered what phy-Osteopathy has discovered what pny-sicians have for centuries overlooked that, first, the body gets out of me-chanical repair before any resulting disease is tolerated in the body; that disease, or sickness, is i' the main only the state of faulty adjustment and inharmonious balance of the different resching parts of this machine; that working parts of this machine; that disease, or pain, or friction of parts, or stoppage of work in our bodies, is due specifically to some mechanical obstruction of the blood supply or nerve power of the body; and that disease can be cured by removing un-atural pressures, and blockades from blood and nerve channels, so that the circlating currents of nerve and blood can go to the parts being starved and renew their depleted energy and vital-

Believing in home government, I will favor such legislation as will allow municipalities to amend and enact their own charters by direct vote of the residents within their boundaries.

I was raised on a farm in Sonthwest Missouri, and have resided in Wasco county the past twenty-eight years; my interests are all here and if elected to the legislature, will to the best of my ability, be a faithful representative of all the people.

When the people of Hood River feel that they are sufficiently populated and their interests demand a division of the county, I will favor it on boundary lines to be decided by the people.
