L. W. Hills, of Wall Lake, Ia., who was here for a week or ten days previous and during the fair has returned to his home. Mr. Hills has interests at Hood River and may come here to live in the spring. He was very much pleased with the city and valley during his stay.
Prof. Will Wilson, a well known dancing master, of Portland, will soon open the season for dancing classes at the Opera House at Hood River. Prof. Wilson is said to be one of the most excellent teachers and the date of starting the classes will be announced later.
Mrs. Thos. Hill, wife of the leader of Hood River's band has been having her share of affliction of late. She was called to Goldendale last week by the serious illness of her brother-in-law, J. C. Richards, who died the evening of the day that Mrs. Hill arrived there and Saturday Mrs. Hill's father, who had been ailing for some time, died also.
Geo. H. Himes, who was a visitor at the fair, went from here to East ore Oregon for a visit. On his return he will go to Underwood and endeavor to obtain the curiosity unearthed by employees on the North Bank road and now in the possession of Amos Underwood. Mr. Himes' idea is to have it placed in the collection of the Oregon Historical society, of which he is secretary.
Mr. and Mrs. Humphrey Pough, who have been making an extended visit to the middle western states, stopped off at Hood River on their way to Portland, Saturday. Mr. and Mrs. Pough have been at Mt. Moriah, Mo., near which is situated the old home place on which Mr. Pough formerly lived and which he visited. He also visited relatives and friends at that place and at Bethany, Mo., and Kansas City. He says the apple crop in Missouri is enormous, but that the fruit is small and the apples of the cheaper grades. Mr. and Mrs. Pough enjoyed their visit, but say that they are glad to be back in Oregon on account of the climate, which they say is preferable to any part of the country that they have been in. They left for Portland to go to their home at Monta Villa, Saturday afternoon.

O. H. Gray and M. T. Russell, who have both been conducting barber shops here, have consolidated their business and will have a shop in the future with five chairs. The firm name will be Gray & Russell. Mr. Russell, who was in business with Jim Reese, took over Mr. Reese's interest in their shop and the new place will have the equipment of both places.
Miss Kate Earl, who is a nurse at The Dalles hospital, has been visiting at the home of S. E. Bartness. Miss Earl arrived at Hood River Sunday from Attica, Ind., having been summoned to return sooner than she expected on account of need of her services at the hospital. Miss Lynn Earl, who came here recently to teach school, is a sister of Miss Kate, who, after visiting with her for a short time, went to The Dalles.

THINKS HOOD RIVER VALLEY UNBEATABLE

A letter which we have received on the future of the Hood River apple and comparing the soil of this section with that of the Willamette valley, says:
Editor Glacier:
In the Independent of New York, under date of October 11, appears an excellent article under the caption "The orchard in October" written by Mr. E. P. Powell, of Clinton, N. Y. Mr. Powell is the author of such well known productions as "The country home," "Old farm days," etc. Being writers of acknowledged authority gain access to the columns of so reliable and conservative a journal as is the Independent.
The brief excerpt which we wish to make from this article, as bearing upon the future of the apple industry is as follows:
"A good orchard is the best possible property. The price of apples is sure to improve rather than decline. Not only have we the English and the German markets, but the open door in China promises to absorb all the apples that our Pacific states can produce. We are 11 all the ports of the world in spite of trade restriction, and we are already in the markets of China entering much more largely than formerly, into family consumption. I find that my old and established customers are doubling their orders of ten years ago."
One is anxious to hearing such views on the apple industry from Hood River or Rogue River orchard enthusiasts. But this, coming from an eastern man, carries with it the weight of additional authority.
One of us are already in the markets of Germany and England with our Newtowns and in the New York City market with our Spitzenburgs, and China with other countries open to us, it would seem that our production is entering much more largely than formerly, into family consumption. I find that my old and established customers are doubling their orders of ten years ago.
Another statement this author makes is this: "The soil should not be so adhesive or lumpy. If not in really good mellow condition in your trees until you can get the proper condition."
A good deal is being said in the press and otherwise about the Willamette valley rivaling Hood River as an apple producing section. So can never equal Hood River in the production of apples since the soil there is sticky and lumpy. Even granting which we do not, that the Hood River apples are of a higher color than our apples are, or with a few keeping qualities, she can never rivalize her sticky, lumpy soil as a whole, nor economically, as we can.—J. H. Himes.
Mrs. Ellen Moses died at the residence of her son, W. N. Moses, at this city last Thursday aged 93 years. She was formerly a resident of Senegerville, Maine, and Hallowell, Minn., where her husband died in 1902. Mrs. Moses came to Hood River in June of 1904 and has made her home here since that time. She is survived by her two sons, W. N. and B. F. Moses, both of whom reside at this place. The funeral took place Friday, services having been held at the house and were in charge of S. E. Bartness.
Afternoon With Mrs. Anna Edgington.
A most delightful afternoon was spent at the home of Mrs. Anna Edgington on Tuesday. The ladies of the Christian Temperance union conducted a social and literary meeting. Mrs. Edgington was the very interesting speaker. Her paper was "Woman's work in the Temperance Society." Mrs. Edgington and Mrs. Hartley reported the state convention in a manner that greatly encouraged and enthused the workers.
Among addresses of Superintendents of Various Departments were Mrs. Orr on "Mothers and Social Meetings," Mrs. Edgington on "Medical Content," Mrs. E. L. Smith on "Franchise," Mrs. Jones on "Scientific Temperance."
Delicious refreshments were served by the hostess assisted by Mrs. Hartley. Five new members were added; their names will be published later. A vote of thanks was given to the ladies who assisted in conducting the booth at the fair, especially Mrs. Evans, Mrs. Edgington and Mrs. Hartley for their delightful entertainment.

HOOD RIVER APPLES IN SHOW WINDOW

The Oregon Journal has this to say of the display of fruit made by O. L. Vanderbilt in Oads, Wortman & King's window.

The varieties shown include the Winter Banana, Spitzenburg, Yellow Newtown Pippin, Jonathan, Wagoner, Arkansas Black, Hyde's King, Red Chok Pippin, Delaware Red, Chicklet, Kay's Northern Spy, Mammoth, Black Twix, Vandever, Alexandria, Hood River Red, Baldwin, Russet Red, Grimes Golden, Gano, Wineapple, Roxbury Russet, Bellflower, Wolf River, Salome and other common varieties. Among them is shown the box of perfect Banana apples that have been purchased by the Portland Commercial club as a gift to President Roosevelt. The entire exhibit is labeled as having been taken from the ordinary market lots of the Hood River apple harvest. It is assumed that some of the boxes are selected, but the most of them are taken from the common run of the packing houses. Crowds of people have all yesterday and today gathered at the corner to look at the exhibit. It is said to be one of the greatest exhibits of apples ever made in Portland, not even excepting the Lewis & Clark exposition exhibit. Among the Hood River men in Portland yesterday was Oscar Vanderbilt, owner of Beulahland orchard, who has furnished a part of the apples shown. He said:

"These apples fairly represent the market lots that are being turned out at Hood River this year. There is no place in the world where such coloring, form and flavor can be found in the apple, as is produced in the Hood River valley just now, as the apples are being picked and shipped, and every grower is giving personal attention to the pack. The Hood River crop is packed and inspected wholly under supervision of the growers' union, and the stamp is a guarantee that the apples are up to grade."

To place an example of profit-taking in Oregon apple culture before the eyes of the Portland public, and show the perfection to which the orchards of this state can produce the apple, Oads, Wortman & King have installed a wonderful exhibit of Hood River apples in the exhibit windows of their department store at Fifth and Washington streets.

There are 30 varieties of apples grown in various parts of the United States. The wide range of the varieties is exploited to show the versatility of the Oregon climate and soil in the forming and coloring of so many kinds of apples to the highest perfection of style. There is not a single variety, from the Jonathan of the East and Middle West to the Yellow Newtown Pippin, of Virginia, Colorado, California and Oregon, that would not capture like ribbons at a state or national exposition.—Journal.

Echoes From the Fruit Fair.

The Hood River fruit fair held last week was a great success, the exhibits being larger and finer than ever before.—St. John's Review.

To say that the Hood River apple show was a success would be to put the matter very mildly, for the display of apples was undoubtedly the finest ever shown in the world. That they sound like brass, but it is not, it is only the actual truth.—Dalles Optimist.

Hon. B. E. Pike attended the Irrigation Congress and the Hood River fruit fair last week. He is mortgaging his legislative salary in the interests

of his constituents, and when he gets to Salem may have to do chores for his board, but bear in mind that he will be one of the most industrious members of the house.—Sherman County Observer.

"Talk about advertising you should see the way Hood River is advertising her apples in Portland," said C. L. Phillips, who spent yesterday at the metropolis. In many of the show windows of the largest stores are boxes of apples, labeled "Hood River Apples," with fancy prices attached. "That's the way to let people know about a place, said Mr. Phillips, "and The Dalles must learn the lesson.—Chronicle.

At the Hood River fruit fair there was a display of about 800 boxes and 300 plates of apples and other fruits, says Mr. Hofer. Besides the Hood River variety, White Salmon and Mosier were represented with fine exhibits. These later places have not used irrigation and have not learned to put the finish on the crop, nor to pack as perfect as Hood River.

The great success of Hood River fruit has stimulated the people of adjoining regions to exert themselves at fruit growing. Rather than give a detailed description of the fruit fair, I give the results of a few talks I had with the fruit growers themselves, preferring to give conservative statements of men who are doing things and who can give further information if wanted.

J. L. Carter, who went from Salem to Hood River four years ago, has been handling 25 acres of apples, and turned off 2000 boxes, only one-third of the orchard bearing. He is not offering his place for sale. They showed 18 boxes and 25 plates of apples and pears. One tree of Rhode Island Greenings, 20 years old, produced 43 boxes, nearly all very fine apples. He says he would not take three times what he paid for it.

I am not publishing hearsay statements but facts given me by men I talk with. Mr. Carter went up to Hood River on the strength of a writup I gave when the first fruit fair was held. He then resided in Salem.

M. M. Hill, of Hood River, is out of town five miles and has 45 acres of orchard, five acres besides in grass and small fruit. He has been there four years last March. He put out 30 acres the first spring and 15 last spring. There are 10 acres of trees from 6 to 10 years old. He paid \$600 an acre for the land, has spent \$100 an acre clearing 35 acres. His place is not for sale, but such orchards, in the heart of the orchard belt, sell for from \$300 to \$1000 per acre.

He will take off 3000 boxes this year. M. Hill has one of the very best apple orchards in the Hood River country. He is a careful, conservative business man, came from Waterloo, Ia., and he likes the Oregon country and climate very well. L. E. Clark, Hood River, is out five miles; has 125 acres of land, 30 acres in orchard, eight acres bearing. He turned off his year 3000 to 4000 boxes. He has about 40 acres in pasture, prunes and alfalfa. He lived in Washington while then came to Oregon. He says that state has no region that compares with this for fruit growing. J. P. Carroll & Sons, Mosier, have 55 acres in apples; had 11 varieties, and have converted rough land into profitable production, turning off 6000 boxes worth \$1.50 a box. They employed no irrigation. There were 18 Mosier growers at the fair. The newer plantings are going into Yellow Newtown and Spitzenburg. Their lands are not irrigated. According to location and improvement, lands sell at \$15 to \$300.—Salem Journal.
