# CHANGES IN O. R. & N.

The change in the time schedule of the O. R. & N. passenger trains which had been promised to go into effect November 18, has not taken place as yet, but is probable that the new time card will be announced in a few days. The delay is attributed to the absence of the head officials of the passenger department during the past two weeks, who had been expected here and at Walla Walla to confer with the agents of the company.

The passenger train leaving Walla Walla at 7 a. m. to connect with passenger trains No. 1 at 8:45 a. m., is to leave that point about an hour later to conform to a change of time made in the schedule of the through trains going west. It was announced some time ago that No. 1 would arrive here about an hour or an hour and a half later than its former ischedule.

The change in the time schedule of the time which the orchard stands is, but sparsely settled.

This tree grew from the seed of the shape, although somewhat larger. It is of a deep red color, and better flavored than the yellow variety. A few of these apples have found their way to the local markets here, and meet with general favor. A few cuttings have also been taken from the old tree for grafting into new stock, but the grafted trees have not yet comes known it will undoubtedly figure in the apple markets of the state.

The climate and soil of the Coquille seem especially adapted to the Gravenstein apple, and despite poor shipping facilities, the valley farmers are making the Gravenstein a valuable product.

here about an hour or an hour and a half later than its former schedule time, it having been decided to make this change on account of the slow conditions of the tracks during the winter season. The proposed sched-ule, however, has not been announced

It is removed that a local train from Biggs is to be run through via Pendleton to Walla Walla, doing the local work on the main line to this city. This would relieve the through trains on the main line of the heavy passenger service, and this arrange-ment would also permit the through trains of making better time, as no stops will be made between Umatilla and Pendleton.

Under the proposed arrangement, the Pendleton-Spokane passenger train which leaves this city at 9 a. m., will start from here about two hours later, thus permitting connections with trains from the cust and west on the

### Complaint About Bad Roads.

Some time ago so many complaints were received by the city council about the road leading to the freight house that a petition was sent to the company signed by the members of council asking that it be repaired. Since then nothing has been done about it by the railroad company and the road has grown steadily woste. the road has grown steadily woste.

Monday the draymen refused to

baul any more loads over it until the compny repairs it. Agent Boyle has made efforts to have it fixed but has been unable to get material with which to do it.

A good many complaints have also been received by council about the condition of the East Side road which is in a dangerous condition, and many people seem to think that the city ought to repair it. The road however, is a county road with which the An effort has been made to have it repaired but the county officials do not seem to think it is necessary.

One rancher who was told this said that this was the best argument in favor of county division that he knows of and that if the road isn't repaired it is only a question of time when a bad accident will happen there that will cost the county several times what it would to put the highway in a

### Pine Grove Improvement Association Incorporates.

The Pine Grove Improvement as sociation, a company whose object is to acquire and improve land, erect buildings and do other things that will tend to improve the vicinity in which its stockholders and members live, will soon be incorporated. The capital stock of the association will be \$5,000 divided into shares of \$10 each and its incorporators are A. I. Mason, C. Dethman, D. Winchell, C.

it is the intention of the associa tion to soon erect a building at Pine Grove in which there will be made accommodations for a store on the ground floor and a meeting hall above. The hall will be used by the members of the Grange for their meetings and for other occasions when it is necessary to have a large palce of meeting.

Coquille Valley to the Front. The people of the Coquille valley have become much interested in the discussion between the different apple-growing sections of Oregon. This interest results from the fact that this valley has, in a modest way, considered itself a good apple country. It is a remarkable and unaccounted for fact that the codlin moth does not injure the fruit of the Counille val injure the fruit of the Coquille valley. Many theories have been ad vanced for the absence of this pest

but none is satisfactory.

Some persons think it is on account of the isolation of the valley and the small amount of new nursery stock which is brought in. Others think the cool summer climate of Coos county is not conductive to the comfort of the worm.

However it may be, the apple grower of the Coquille is proud of the fact that Coos county apples have no worms in them.

Another interesting fact is that the

Another interesting fact is that the Coquille valley, has the distinction of being the home of a new variety of apple, the Red Belflower.

It is believed that there is but one tree of this spple in the state. This tree is an old seedling, perhaps 20 years of age, and stands in an or-

Hats of to the Hen.

Hats off to the Hea.

Poets may sing of the glory of their eagle, and artists may paint the beauties of birds of plumage, but the modest American hen is entitled to a tribute for her industry, her usefulness and her productivity. The American hen can produce wealth equal to the capital stock of all the banks of the New York clearing houses in three months and have a week to spare. In less than sixty days she can equal the total annual production of all the gold mines of the United States. We proudly boast of our enormous production of pig iron, by far the greatest of all countries in the world, and yet the American hen produces as much in six months as all the iron mines of tois county produce in a year. In one year and one month the good old hen could pay off the interest hearing debt of the United States.—lone Proclaimer.

High Water at Gleuwood. correspondent at Glenwood

We have high water here now and it Bird creek keeps raising like the last few days things won't look very funny to us. All the houses up in Glenwood are surrounded by water from six inches to a couple of feet deep. Some of the Glenwood people put me in mind of being in Vence, Italy. They have to step from their houses into water? Several of the smaller bridges are washed out. Some of them were new ones and a few are old and have been had for some time, so they are not much of a loss. The water had made some had washouts in the road, so that it is almost dangerous to travel. The stage got upset several times as the water is very We have high water here now and CHAINULS IN U.
