SHOES
TO BE SLAUGHTERED

Beginning Saturday, January 19 — Beginning Saturday, January 19

The Freedman Shelby Shoe Co. succeeds the Freedman Bros. Shoe Co. An entire change has been made in the company. New trade marks, new labels, different lot No. and different styles of shoes are to replace the former ones. Not wishing to have two different lines we have decided to close out our entire line of Freedman shoes before our Spring goods arrive.

There are no better shoes manufactured than the Freedman shoe, being for fifty years the leading shoe house in the United States. They use only the best skins from the leading tanners, and employ none but expert shoemakers in their factories, making good every wrong pair of shoes to their customers. This is why they have accomplished such marvelous results

These shoes must walk. Come get your Share. Money Saved is money made. Be economical. All shoes marked in plain figures. You see what you save on each pair

MEETING OF THE COMMON COUNCIL

Continued from page 1.

gines' original estimate. This fact, obliging the city to pay \$2.50 per cubic yard for work which had been estimated to cost but 50 cents per cubic yard, explains the added cost of construction which is, approximately, \$5,000.

Working under these conditions, the committee obliged the contractors to lessen the depth of excavation in many cases from one to one and one-half feet in rock work, where the efficiency of the sewer would not be affected, saving thereby to the city a needless expense of approximately \$2,000.

The total amount collected by assessment for sewer as shown by the books of the city recorder is \$25,123.08, and actual cost of sewer \$30,454.04, leaving a deficit of \$4,898.56. In accordance therewith with section 35 in amendment to charter of the city of Hood River this committee recommends that the city proceed to levy an additional assessment sufficient to cover this deficit and costs of making said assessment, which we estimate \$5,750 to be a sufficient amount. Any balance remaining in the hands of the city treasurer after all warrants have been paid, to be refunded in accordance with provision in section 35 already referred to herein.

Signed: L. E. Morse, E. O. Blair, A. D. Moe, Sewer Committee.

"Pear Blight" or "Apple Blight."

The subject of pear blight or fire blight is one which is of the greatest interest and any new light on the subject is always gladly received, and have tested my different ideas, and relieve am getting closer to the solution of the problem, realizing, however, that my work is not complete and will not be until in the spring of 1907.

To be a successful orchardist you must become familiar with the trees growing in your orchard, not merely a passing acquaintance, but a hearty old fashioned country acquaintance, knowing them as one knows his own family, familiar with their actions, their ways of life and habits, knowing their good qualities and their faults as well. When sick or in trouble, sympathize with them; when overtaken by disease, be ready to minister relief, in applying effective remedies. If you thus hold close, friendly, almost kindred relations with the trees in your orchard, you will be surprised how you learn to love them. Their ailments will be yours. What is better, what more happy, when can you be more content than when you become through your orchard in time of fruitage, when the trees wave their welcome to you, rejoicing with you as they throw showers of fruit, all crimson with blue wax, as it falls in your basket—rejoicing with you because the harvest time gives them the opportunity to repay your generous care.

Late in May, 1906, I was in an orchard spraying, when my attention was drawn to several apple branches bearing a peculiar canker. Since then I have run across others in the valley. These trees show a startling condition of affairs. Many trees had failed to leave out, others had sent out a very scant supply of small curled leaves and were making little or no growth. Still others had apparently leaved out all right, while again on others the leaves had turned brown and dried up and the limb had died. All of the trees showed a considerable amount of canker, either in the crotches of the large limbs, on the limbs themselves, or on the trunks. In order to make a thorough investigation, I have made many visits to one of the orchards, while in others I have been at intervals of from two to three weeks. I have collected a large amount of data in the forms of notes, photographs and cultures. It is as yet, however, too early for me to give a definite statement regarding the cause of all the phenomena observed. With some I have used artificial inoculations, and it now seems to me probable that the different forms of canker and twig blight found to be in most cases due to the same cause.

During the early spring I was able to find what was the cause of the trouble. It had been damp, rainy weather for several days, and I noticed thick, milky drops oozing from the surface of a cankered limb. An examination showed this liquid to be alive with a rod shaped bacteria. The diseased bark was soft and watery and sap from within was found to be teeming with the bacteria. An idea struck me that the canker was a bacterial disease. I at once obtained a healthy twig of a pear tree as well as a healthy twig of an apple and inoculated these from the diseased bark.

THE CREED OF THE MAIL ORDER HOUSE

Twelve commandments make up the doctrine of the mail order house. These commandments were not written on stone by Moses, but they are thoroughly understood and frequently bumped into by anyone who deals with the catalogue mail order concern.

Following are the 12 commandments which thoroughly indicate the business side of these concerns:

1. You shall sell your farm products for cash wherever you can, but not to us; we do not buy from you.
2. You shall believe our statements and buy all you need from us because we want to be good to you, although we are not acquainted with you.
3. You shall send in the money in advance to give us a chance to get the goods from the factory with your money; meanwhile you will have to wait patiently a few weeks because that is our business method.
4. You shall buy your church bells and interior church fixtures from us and forward the money in advance, for that is our business method.
5. You shall collect from the business men in your vicinity as much money as you can for the benefit of your churches. Although we get more money from you than they do, still it is against our rules to donate money for building country churches.
6. You shall buy your car from us and be your mechanic in order to drive the mechanic from your vicinity, for we wish it so.
7. You will induce your neighbor to buy everything from us, as we have room for more money.
8. You shall often look at the beautiful pictures in our catalogue so your wishes will increase and you will send in a big order, although you are not in immediate need of the goods; otherwise you might have some left to buy necessary goods of your local merchants.
9. You shall have the mechanics that repair the goods you buy from us book the bill, so that you can send the money for this labor to us for new goods, otherwise he will not notice our influence.
10. You shall believe us in preference to your local merchants.
11. You shall, in case of accident, sickness or need, apply to local dealers for aid and credit, as we do not know you.—Sentinel, Yazoo, Miss.

Hunting for Trouble.

"I've lived in California 20 years, and am still hunting for trouble in the way of burns, sores, wounds, boils, cuts, sprains, or a case of piles that Bucklen's Arnica Salve won't quickly cure," writes Charles Walters, of Allegheny, Sierra Co. No use hunting, Mr. Walters; it cures every case. Guaranteed by Chas. N. Clarke druggist. 25c.

Notice

It will be absolutely necessary for all persons contemplating the purchase of new stock in the farmer's irrigating Co. to make application within 30 days to the secretary of said company if you wish any water for the season of 1907.
