She will leave soon for Lewiston, where she has a school for the coming year. Agent Boyle has more trouble. The first of the week three crates of chickens arrived at the express office, and he was unable to locate the owner for about three days. During that time the chickens became rather restless, and as the coops were almsy affairs, they soon worked some of the slats loose and escaped. There was plenty of feeding lying around the track from the feed warehouse near by, so that they made themselves at home, and being captured. A reward of ten cents apiece for their capture failed to enlist any volunteers, and it was not until night that he succeeded in rounding them up. He was also subject to a fine according to the city ordinance, as there is an old ordinance to the effect that chickens are not allowed on the streets after 8 p. m. Marshal Ganger has been waiting to get even with Boyle and he was anticipating having a kangaroo court, but Boyle wiggled out of the scrape. Capt. Spencer was in Hood River Tuesday on business connected with his boat line. The captain is convinced that it will be impracticable to dredge the sand bar so as to make landing near the depot possible at low water. He says it would entail heavy expense, with a constant dredging of the channel to keep it open. It will be much more feasible to make a permanent dock near the old mill site of the Oregon Lumber Co., which would make the landing nearer than at present, and thought that both boat companies would unite in putting in a permanent dock which could be used by all the boats. Their plan is to purchase the barn of the company and turn it into a double dock, which would make a storage room for freight at all times, as well as a waiting room for passengers. The present road can be improved, a sidewalk built to the boat landing, and if the city would cooperate in the matter, a permanent landing could be made which would be satisfactory to all.

The Josephine Deffy company gave a series of performances at the opera house the first three nights of the week, which were well attended. Miss Deffy has appeared in Hood River before, and was greeted this time with crowded houses. Miss Deffy is well supported, and the company gave a finished performance that was appreciated by the audience. Little Orin Ganger received a painful and perhaps serious injury yesterday. He was playing with a rib of an umbrella in his mouth and fell. The sharp piece of steel entered the roof of his mouth and penetrated some distance. It badly quills profusely for a time, but he apparently recovered and it is thought that no serious injury will result. H. C. Oliver, traveling freight agent of the O. R. & N., and P. R. M. & St. P., were in Hood River yesterday watching the outcome of the apple deal, and at the close were after the successful bidders to secure the shipments for their respective roads. Judge Rick Field, of White Salmon, was in Hood River on business Tuesday. He says that the city of White Salmon is progressing very rapidly. New blocks are going up, and a general feeling of confidence in the future is manifest. The new bank building for Gillette Bros.' private bank is being erected, and C. M. Wolfard has moved into his new brick block, and now has the largest store in Klickitat county. W. H. Carter left yesterday on No. 2 for Kansas City on business, and expects to get back here by the middle of the month. Mr. Carter is interested in copper mines near Valdez, Alaska, which are conceded to contain the richest deposits of copper ore known. Some of the specimens which Mr. Carter has brought back are of an untraced spot, in the brush, he found a spring with quite a flow of water, which seemed to possess a peculiar odor. He bottled some of the water and it has the taste and appearance of the hot springs water across the river at Carson, although it is cold. He will have the water tested, and if it proves to contain good mineral qualities, it will develop the Wagon Iron into a famous health resort. It evidently contains sulphur and iron. Samples of the water can be seen at the Glacier office. Announcement I have been so fortunate as to secure the services of Dr. C. H. Law, of Detroit, Mich., to give me a post graduate course in higher optics and prisms, and for the purpose of demonstrating his methods will examine and advise free of charge all who apply during this week and Monday of next. I would urge all those who have been unable to get relief from eye strain to avail themselves of the opportunity to consult this eminent specialist, especially those whom glasses will not relieve. Ralph E. Laraway. My fall stock is now ready for inspection and will have an opening of Eastern Pattern hats September 21st. Mrs. N. O. Billings. Rally Day exercises are among the plans of the First Baptist church for the last Sunday in September.
