BINGEN.

About 7 p. m. on Friday, November 15, the quietude of this village was disturbed by the piercing, though not unmelodious sounds of brass and drum. Our peaceful and industrious citizens were somewhat disturbed at first, but when they were assured that no harm would befall them they treated the matter as a joke. The occasion for the demonstration was nothing more nor less than that a delegation of citizens from White Salmon, accompanied by their local band, had come to Bingen to see the cars.

There seems to have been a very good crop of coyotes this year as they are seen in the Dukes Valley almost every night. However, they have not done much damage yet. It is reported that they killed three head of goats for C. R. Fone and have captured a few chickens from different parties.

The people of Dukes Valley seem to have had their part of misfortune in the way of losing horses. J. E. Whisler's horse got caught on a barbed wire fence and died. Roy Slocum lost a horse, but they say there is no great loss without some little gain, so they set traps and caught three coyotes that had come to bid farewells to the remains. Mr. Taylor also lost a horse. I hope the valley a good place for horses to die, as the writer has had his share in this loss, but not recently.

Fitting Up the New Quarters. The Stewart Furniture and Hardware Co. are beginning to move goods into the addition just completed by Frederick & Arnold, and Mr. Stewart left this week for Portland to complete the purchase of new goods for the store. The company now have 23,000 feet of floor space, and it is said to be the largest space occupied by any mercantile establishment in the state outside of Portland. It will be filled full of new goods and the selection offered the public will be equal to any of the large metropolitan stores.

Large arches are being cut through the brick walls in the basement and ground floor of the new addition to connect with the old store, and the new addition has a balcony arrangement for the display of furniture that practically gives them an additional floor space, or four floors. The top floor in the new building will be used for carpets, rugs, curtains, etc., and an elaborate system of hangers for displaying coats is being installed which will add to the convenience of showing the stock, as well as to the attractiveness of the display. The hangers will accommodate nearly 100 of the large floor rugs, and are arranged that the entire pattern of all can be seen by moving them along on the hangers.

The entire front of the ground floor on the Third street side is being glassed which will admit of an elegant display, the glass running down to the floor, while the balcony and upper floor are well lighted, and the open court in the center adds to the pleasing effect.

The basement will be used for heavy and bulky articles, and contains the most complete moulding rack in the city. The floor of the basement is on a line with the ground floor of the second street side, and makes it convenient to reach from that end of the store.
