The Germans are notoriously a well educated people, but the popular English belief that every German knows everything would appear to be exaggerated, if we may judge from a German officer's account, published in one of the German reviews, of an examination in general knowledge to which he submitted his company. "Who was Schiller?" was one of the principal questions. Ten soldiers replied that, though they fancled they had heard the name, it suggested nothing to them. Of those who went into details, one said that the author of "William Tell" was the "inventor of printing," a second described him as "a man who knew everything," a third put him down as "a man of science," a fourth as a "poet who wrote Scripture history." a fifth as "a musician of great celebrity," and a sixth as "a manufacturer of bells." Speaking through the telephone-"My friend Smith will dine with us this evening." Then to his friend-"Now, listen and hear how plain her reply comes back." Mrs. Brown's reply came back with stertling distinctness: "Ask your friend Smith if he thinks we keep a

May be only a tired liver, or a starved liver. It would be a stupid as well as savage thing to beat a weary or starved man because he lagged in his work. So in treating the lagging, torpid liver it is a great mistake to lash it with strong drastic drugs. A torpid liver is but an indication of an ill-nourished, enfeebled body whose organs are weary with over work. Start with the stomach and allied organs of digestion and nutrition. Put them in working order and see how quickly your liver will become active.
