The ceremony was performed by Rev. F. W. DeHart, at 8 p. m., Saturday evening, July 18. The happy pair took the 1:30 p. m. train Sunday for Portland and Oregon City.

Our base ball team played the Blagen boys Sunday last at Engon, the score being 11 to 10 in favor of Underwood. As the Underwood boys lined up for the 11 a. m. train in their bright new uniforms they certainly looked like winners. The boys had hard fight, and say the grounds been in better shape.

MOSIER.

W. S. Nichols has commenced the work of excavating for a new store building. It will be located opposite The Pines and be much larger than the one he is now occupying.

Mosier Grange had an interesting meeting last Saturday. About 40 members were present notwithstanding the fact that the day was one of the hottest this summer. After the meeting a picture was taken of those present by photographer Rogers of Hood River.

Real estate is still moving at Mosier. Several sales have been made lately and considerable clearing and improving is also being done.

The condition of the Mosier apple crop was never better for this time of year than it is now and indications are that the biggest and best shipments of apples ever sent out from this district will be shipped this year. Other fruits are doing equally as well and a bumper crop is expected.

L. S. Dundas, of Portland, spent several days at his place here last week. Mr. Dundas expects to put a large force of men clearing up a big piece of land in the near future, and as soon as it is in shape will set it out to trees. A new store building is being erected opposite Alex Stewart's.

The cold spring water kept on tap at the store of Alex Stewart is a boon to the thirsty traveler who has occasion to stop at Mosier these warm summer days. It seems hardly possible that water as cold as his bubbles out of another earth. We suspected that Alex kept a cask of ice hidden in his spring to boom Mosier, but he says he doesn't so we will have to withdraw our suspicions.

Travel on the railroad from Mosier is quite heavy this summer.

A good many visitors are coming here and the home people are also doing quite a bit of moving about.

experimenters and authors from various sections of the continent will favor the convention with addresses, lectures and demonstrations.

Monkeys as Prune-Pickers. A San Jose fruit man thinks he has solved the labor problem in the prune orchards. He believes that the South American monkey can be trained to pick up prunes as rapidly and carefully as the "ornery" Japanese laborer, and he has ordered a consignment of 500 of the simians, which he will undertake to train to work in the orchards. It has always been difficult for the prune raisers to secure reliable help at the right time at the right price, and of late years the Japs have become so independent and insolent that it is difficult to get along with them. It is believed that the monkey can be trained to do the work of 10 Japs. Here is another opening for an international incident on the ground of discrimination. The American people are "the limit" on foreign labor—Grants Pass Pacific Outlook.
