**IN THE JUSTICE'S COURT FOR HOOD RIVER DISTRICT.**—W. K. Ellsworth, Plaintiff, vs. Rinda Copper, Defendant—Suit for Divorce—Summons. To Rinda Copper, the above-named Defendant: In the name of the State of Oregon: You are hereby required to appear and answer the complaint filed against you in the above entitled suit, and within six weeks from the 10th day of September, 1908, said day being the first day of the publication of this summons; and if you fail so to answer, for want thereof the plaintiff will apply to the court for the decree of divorce, and the plaintiff and defendant in said case, for, to-wit: A decree of divorce dissolving the bonds of matrimony existing between the plaintiff and defendant in said case. The summons is returned by virtue of an order of Hon. A. J. Derby, Judge of the County of Hood River, Oregon, State of Oregon, dated the 5th day of September, A. D. 1908, which order specifies and provides six weeks and seven insertions publication in the "Hood River Glacier," a weekly newspaper published weekly in said county and state, at the time, and date of this said summons shall be the date of this publication thereof in September 17th, 1908. JOHN LELAND HENDERSON, Attorney for Plaintiff.

**IN THE JUSTICE'S COURT FOR HOOD RIVER DISTRICT.**—W. K. Ellsworth, Plaintiff, vs. Rinda Copper, Defendant—Suit for Divorce—Summons. To A. Smith, the above named defendant: In the name of the State of Oregon: You are hereby required to appear and answer the complaint filed against you in the above entitled action on or before the 30th day of October, 1908, or suffer judgment to be taken against you for the sum of \$25.00, with the disbursements of this action. Given under my hand this 10th day of September, 1908. A. C. BUCK, Justice of the Peace. This summons is published for six consecutive weeks in the Hood River Glacier, by order of the Hon. A. C. Buck, Justice of the Peace in and for said district, heretofore duly made and entered, and the date of the first publication thereof is September 17th, 1908. ADMINISTRATRIX'S NOTICE. Notice is hereby given that the undersigned has been appointed administratrix of the estate of George H. Hartwig, deceased, by the County Court of Hood River County, Oregon. All persons having claims against said estate must present the same to the undersigned at the office of E. H. Hartwig in Hood River, Ore., six [6] months from first publication of this notice. First publication Sept. 21, 1908. E. H. HARTWIG, Administratrix. ATTY FOR ESTATE C. W. BRODIE, Register.

**NOTICE FOR PUBLICATION.**—Not Coal Land. Department of the Interior, U. S. Land Office at The Dalles, Oregon. Notice is hereby given that RUTH M. LITTLE, of Hood River, Oregon, on June 4, 1907, made homestead entry (Serial No. 6904) No. 1580 for E. S. N. W. 1/4, S. 23, T. 22 N., R. 12 E., W. 1/2, Township 2 North, Range 1 East, Willamette Meridian, has filed notice of intention to make final commutation and to establish claim to the land above described, before the Register and Receiver of the United States Land Office, at The Dalles, Oregon, on the 12th day of October, 1908. Claimant names as witnesses: Robert E. Robertson, William H. Robertson, Peter Salzman and John Elder, all of Hood River, Oregon. C. W. BRODIE, Register.

**IN THE JUSTICE'S COURT FOR HOOD RIVER DISTRICT.**—W. K. Ellsworth, Plaintiff, vs. Bert Butler, Defendant. To Bert Butler, the above named defendant: You are hereby required to appear and answer the complaint filed against you in the above entitled action on or before the 30th day of October, 1908, or suffer judgment to be taken against you for the sum of \$15.00, with the disbursements of this action. Given under my hand this 10th day of September, 1908. A. C. BUCK, Justice of the Peace. This summons is published for six consecutive weeks in the Hood River Glacier, by order of the Hon. A. C. Buck, Justice of the Peace in and for said district, heretofore duly made and entered, and the date of the first publication thereof is September 17th, 1908.

## NOW FOR THE BIG FRUIT FAIR

ARE GETTING BUSY FOR BEST EVER. Association Offers 27 Cups and Many Medals and Will Provide Biggest Exhibition Space in Its History. Arrangements for the Eighth Biennial Hood River Fruit Fair are progressing in good shape and the fair managers are getting everything in readiness for the best fruit fair Hood River has ever held. The tent for the exhibition this year is the largest that has ever been secured and will give more room for displays than before. It is expected that when all the exhibits are in place there will be ten thousand square feet of apples on exhibition. Many growers are planning their exhibits and many boxes of fruit will be on exhibition from new orchards. One of the fair managers, in talking of the coming fair, says: "Present indications warrant the belief that the coming fair will be up to the standard. However, it is necessary for everyone to lend a helping hand, and together even a better exhibit than ever before. Word has gone out that this is to be the best fruit exhibition on the American continent this year. Let us make it so." Each member of the exhibit committee is expected to see that his neighbors bring the very best of everything in the fruit line. Do not wait for a call of the committee, but see if your neighbors have the fruit and then see if they get it to the fair. "Any one having fruit does not need to wait for a call from the committee, but bring your product along. No provision will be made for fowls, but ample space will be allowed for fancy work, flowers, canned goods and vegetables. The executive board will exercise diligent care, but will not be responsible for damage or loss from any cause. "The Hood River cider and vinegar factory has kindly consented to make cider for the fair, providing growers will furnish the apples. If they can do so would like to have them bring them to the factory October 13." Altogether 7 cups will be given as prizes, in addition to an equal number of medals. The cups are handsome and for several days previous to the fair will be displayed in the window of Laraway's jewelry store. First and second prize cups will be given for the following exhibits: Best box display apples. Best five boxes apples. Best general plate display apples. Best box four tier Spitznberg. Best box three tier Spitznberg. Best box four tier Newtowns. Best box three tier Newtowns. Best box general plate display of pears. Best box of Orleys. Best box Arkansas Blacks. Best box Jonathanas. Prize cups will also be awarded as follows: Best vegetables. Best canned fruit. Best needwork. Best nursery stock. Best cut flowers. The Big Apple Sale. What brains and progress applied to Oregon resources can do, was emphasized yesterday at Hood River, says the Oregon Journal. A sale of \$80,000 worth of apples is the incident. The buyer sought the fruit, and is happy in its possession. "These apples have created a market that cannot be filled by the fruit of any other district," he said. "Hood River is the pivotal point around which buyers revolve for the finest grade of apple stock anywhere in the world, and we and other firms know it. There is no section where the apple crop and the prices for it are so carefully watched as Hood River. It seems surprising that such a comparatively small crop of apples as is grown here cuts such a big figure in the apple world, but it is accounted for by the fact that dealers everywhere recognized that Hood River apples are the absolute standard of excellence in quality and pack." Granting that the buyer's possessions may influence somewhat his roseate view of Hood River stocks the fact of the sale is still proof of his statement. It is the first large sale of the season and the figure is "highly satisfactory" to the growers. No other such sale has been made on the coast, and probably not in the country. It sets Hood River products, Hood River methods and Hood River operators before the country as models in the industry. The condition is more than mere superiority of location. Many fruit experts claim other districts of Oregon are equally well adapted to the industry. But Hood River has applied intelligence. Growers there have pioneered the way in use of enlightened method. They threw aside the eye poke and ball methods long ago. They studied the business as the banker studies his accounts. They sought information from every source. They read, and now read the bulletins of all the agricultural colleges in the country. They do not reject new

## PLANNED AUTO ROAD TO PORTLAND

PROJECT DISCUSSED AT MEETING. Sentiment in Its Favor—Hood River and Multnomah Counties Will Join Hands in Movement. A largely attended meeting which was presided over by A. A. Jayne, president of the Commercial Club, took place here Saturday in the club rooms to discuss the proposed automobile road between Hood River and Portland. The meeting was addressed by Lewis Russell, chairman of the good roads committee of the automobile club of Portland; E. P. Cannon, the well known constructing engineer of Portland; P. M. Hall-Lewis, engineer of Hood River; A. L. Gillette, of Los Angeles; R. P. Loomis, of the New York commission firm of E. P. Loomis & Co., who is interested with Mr. Woodworth in a large fruit ranch in the Mt. Hood district, and E. L. Smith, J. Adrian Epping and D. L. Davidson. In addition to a discussion of the automobile road between here and Portland, Mr. Russell and Mr. Cannon devoted considerable time to the matter of road building in the valley. Both of these gentlemen have had considerable experience in building good roads and stated that with the excellent material at hand they thought that if properly handled many of the roads in the valley could be put in excellent shape by being oiled, which would cost from \$100 to \$150 per mile and would keep them in good condition from year to year. Mr. Cannon, who had been for a ride in the valley, stated that one of the reasons for poor roads in many parts of the valley was that they were not properly drained. This he said was one of the most important features of maintaining a good road and that by ditching them so as to drain the water from underneath, instead of allowing it to run off the surface the road would not be cut up and left full of ruts and chuck holes. To build a permanent road he said that a rock crusher was indispensable. With the great quantities of rock and other fine road making material with which the valley was supplied, he said Hood River county could have the finest and most cheaply constructed permanent roads in the state. Temporarily, however, if the county wanted to put the roads in good shape they could be properly graded, ditched and oiled and kept that way comparatively small expense until permanent roads could replace them. Speaking frankly, he said that Hood River had the worst roads he had been over for a community that had much good material to make good roads of, and thought that the matter was one that ought to be taken up at once for the good of the county at large. Hall-Lewis told of the great benefits that would accrue to Hood River by the building of the Hood River-Portland auto road and gave some interesting facts in connection with the preliminary investigation that had been made in regard to its construction. He stated that he was willing to give his time in aiding the proposition and thought the road between here and Cascade Locks ought to be built in any event, as it would connect the lower part of the county with a wagon road, which was not only essential but necessary. A. L. Gillette, a Los Angeles man, told what California was doing in the good-roads line and said if the road between here and Portland was built it would be the finest scenic highway on the Pacific coast, and mean that a thousand tourists and other visitors would come to Hood River where we now had none. R. P. Loomis said that Hood River grew the finest apples put upon the markets of the world and was attracting many eastern men with money to go into the apple industry. He had visited all the other sections in the United States, but they were not in it with Hood River as a place to make a home and grow the finest fruit at the highest prices known in the world. He believed that there was nothing more essential to the good of the Hood River district than good roads, and with its great scenic splendors, a grand climate and opportunities in the fruit business, an improvement in the roads meant thousands of dollars to the valley, and was the most important issue before its residents. E. L. Smith stated that Hood River was known as one of the most progressive communities in the state, and he believed that if it took up the new road matter, with the help that was assured it from Multnomah county, that it would be built. While it was developing rapidly and big returns were received here from the various industries, a large part of the people of the valley were under considerable expense on account of the various projects that were being taken up. He was in favor of the road and thought that it would be one of the finest things that could be done to

E. L. Smith stated that Hood River was known as one of the most progressive communities in the state, and he believed that if it took up the new road matter, with the help that was assured it from Multnomah county, that it would be built. While it was developing rapidly and big returns were received here from the various industries, a large part of the people of the valley were under considerable expense on account of the various projects that were being taken up. He was in favor of the road and thought that it would be one of the finest things that could be done to

## PLANNED AUTO ROAD TO PORTLAND

PROJECT DISCUSSED AT MEETING. Sentiment in Its Favor—Hood River and Multnomah Counties Will Join Hands in Movement. A largely attended meeting which was presided over by A. A. Jayne, president of the Commercial Club, took place here Saturday in the club rooms to discuss the proposed automobile road between Hood River and Portland. The meeting was addressed by Lewis Russell, chairman of the good roads committee of the automobile club of Portland; E. P. Cannon, the well known constructing engineer of Portland; P. M. Hall-Lewis, engineer of Hood River; A. L. Gillette, of Los Angeles; R. P. Loomis, of the New York commission firm of E. P. Loomis & Co., who is interested with Mr. Woodworth in a large fruit ranch in the Mt. Hood district, and E. L. Smith, J. Adrian Epping and D. L. Davidson. In addition to a discussion of the automobile road between here and Portland, Mr. Russell and Mr. Cannon devoted considerable time to the matter of road building in the valley. Both of these gentlemen have had considerable experience in building good roads and stated that with the excellent material at hand they thought that if properly handled many of the roads in the valley could be put in excellent shape by being oiled, which would cost from \$100 to \$150 per mile and would keep them in good condition from year to year. Mr. Cannon, who had been for a ride in the valley, stated that one of the reasons for poor roads in many parts of the valley was that they were not properly drained. This he said was one of the most important features of maintaining a good road and that by ditching them so as to drain the water from underneath, instead of allowing it to run off the surface the road would not be cut up and left full of ruts and chuck holes. To build a permanent road he said that a rock crusher was indispensable. With the great quantities of rock and other fine road making material with which the valley was supplied, he said Hood River county could have the finest and most cheaply constructed permanent roads in the state. Temporarily, however, if the county wanted to put the roads in good shape they could be properly graded, ditched and oiled and kept that way comparatively small expense until permanent roads could replace them. Speaking frankly, he said that Hood River had the worst roads he had been over for a community that had much good material to make good roads of, and thought that the matter was one that ought to be taken up at once for the good of the county at large. Hall-Lewis told of the great benefits that would accrue to Hood River by the building of the Hood River-Portland auto road and gave some interesting facts in connection with the preliminary investigation that had been made in regard to its construction. He stated that he was willing to give his time in aiding the proposition and thought the road between here and Cascade Locks ought to be built in any event, as it would connect the lower part of the county with a wagon road, which was not only essential but necessary. A. L. Gillette, a Los Angeles man, told what California was doing in the good-roads line and said if the road between here and Portland was built it would be the finest scenic highway on the Pacific coast, and mean that a thousand tourists and other visitors would come to Hood River where we now had none. R. P. Loomis said that Hood River grew the finest apples put upon the markets of the world and was attracting many eastern men with money to go into the apple industry. He had visited all the other sections in the United States, but they were not in it with Hood River as a place to make a home and grow the finest fruit at the highest prices known in the world. He believed that there was nothing more essential to the good of the Hood River district than good roads, and with its great scenic splendors, a grand climate and opportunities in the fruit business, an improvement in the roads meant thousands of dollars to the valley, and was the most important issue before its residents. E. L. Smith stated that Hood River was known as one of the most progressive communities in the state, and he believed that if it took up the new road matter, with the help that was assured it from Multnomah county, that it would be built. While it was developing rapidly and big returns were received here from the various industries, a large part of the people of the valley were under considerable expense on account of the various projects that were being taken up.
