MANY HOP GROWERS WILL NOT HARVEST

Of the 18000 acres of hops under cultivation in the Yakima valley it now appears as if but a very small proportion will be picked, says the Yakima Republic. The present determination of many growers is to let their yards lie. Others expect to begin the harvest, with the possibility of abandoning it at any time, while still others will pick throughout. The Placenta 70 will start on his, George Rankin, who has 105 acres under cultivation, will start pickers, but may call them off at any time. Sam, the Chinese, will not pick a hop, he says. George Bosdet can not see anything in it and George Mitchell, who has 30 acres, only this year, is feeling close to get into touch with the conditions before he makes a move. Messrs. Marble, Barge, Dills and Lum, who compose the Reserve Land company, determined yesterday to let their 40 acres lie. If anything occurs to change their attitude it must be within the next four or five days.

Mr. Rankin says that if he picks he will pay the old price of \$1 a box as long as he operates this season. Others say they will pay 75 cents a box and that the question of labor does not trouble them. Pickers, they say, will be numerous if they are needed and if the growers determine to harvest at all the price named, 75 cents, will be all that they will be justified in paying.

Under present prevailing conditions more than a price of 7 cents a pound in sight. Some are willing to under take the work at that figure, but others say that it is not sufficient. There are still some contracts in force and the hope for filling these will of course be picked. Generally, however, the attitude of the majority of the growers is against putting any more into the venture with as little sunlight shining on them as there is at present.
