HOOD RIVER LEADS OREGON COUNTIES

GETS FORTY AWARDS AT A-Y-P FAIR

Two Grand Prizes and Two Gold Medals Given To Apple Growers in This Valley.

Hood River county was awarded more prizes at the Alaska Yukon Pacific exposition, held at Seattle last summer, than any other county in Oregon according to the list of awards which were published this week, giving Hood River 40 awards at the fair, all but one of which are prizes for apples. The Hood River valley took 33 apple awards and 25 other prizes for apples were awarded to other parts of the state.

Two of the nine grand prizes awarded to Oregon were copped for Hood River apples, there being no other similar awards to apples in this state. Two of six gold medals awarded to Oregon apples came to Hood River while this valley landed six out of ten silver medals given in the state for apples.

Twenty-seven bronze medals were awarded to apple growers here and 16 similar prizes were awarded to the growers of the state.

The state of Oregon made a great showing at the exposition along agricultural and horticultural lines. The state of Oregon was awarded grand prize for a continuous display of storage apples from June 1 to October 10. Henry E. Doach, director of exhibits and privileges at the fair, gave special credit to the Oregon displays.

The two grand prizes of Hood River apples were awarded to Oscar Vandenberg and Sears & Porter. A. I. Mason and Lawrence & Smith were awarded the gold medals on apples.

Silver medals on apples were awarded to J. L. Carter, Hills Crest Orchard, L. M. Howard, Crescent Fruit Farm, Marshall Brook Fruit Farm and Cutler Brothers.

Bronze medals on apples were awarded to E. Hawkes, W. E. Lock, E. G. Church, G. K. Castner, William G. Pamelco, H. H. Jantzen, August Pansch, L. Flog, Wm. Davidson, S. Allen, Charlie Miller, Sherman & Fries, Stanton & Watson, E. D. Boyd, W. & G. S. Eaton, E. C. Evans, E. R. Pooley, L. H. Howard, Davidson Fruit Company and Peter Mohr.

Honorable mention was granted the Montague Fruit Farm and M. L. Boyd.

Of the three awards which were made to Oregon on vegetables, one was a bronze medal given for the display of John Koberg, of this section.

WILL CONSIDER BONDS AT SPECIAL MEETING

After the city council had canvassed the vote at the special bond election Friday and found it to be correct as certified by the election officers, the judiciary committee was instructed to confer with the city attorney in regard to the bond issue and report at the next meeting of the council, which will be an adjourned session next Monday evening.

The council instructed the city recorder to give notice of the regular city election which will be held, Tuesday, December 1, for the selection of three councilmen, a recorder and a treasurer. O. H. Baker, J. H. Gill, H. L. Howe, W. C. Gilmore and Roy C. Slocum will compose the election board and the city hall will be the polling place.

A remonstrance signed by the majority of the taxpayers affected was presented against the improvement proposed for Cascade avenue from Fifth street to the city limits. The bid which the street committee had recommended was referred back to them to consider in connection with the remonstrance. The bid for the improvement of Twelfth street was accepted without the last clause, which stipulated that the city would be held responsible for the cost of the improvement in case the property owners failed to pay their assessments. It is probable that the bidder will not undertake the contract without this clause to protect him.

A petition was received for street lights at the corners of State and Thirteenth streets and Sherman avenue and Thirteenth street. Since the Light Company has already notified the council on several occasions that it could carry no more lights on its circuits, the council would be unable to furnish service asked for.

The judiciary committee was instructed to bring in an ordinance providing for the construction of sewers in district 8. City engineer Morse reported a survey of the Stranahan addition.

The recorder was instructed to get the report of the viewers appointed for a street along the O. R. & N. tracks.

Populating The West.—The special colonist rates that were offered by the Harriman lines for one month proved of vast benefit to the northwest. It is reported that in the 30 days that the low colonist rates were in force on the transcontinental lines, the O. R. & N. brought 704 home-seekers to Oregon and Washington points.

This year the rates became effective September 15 and were offered only until October 15. Last year the rate period was for 60 days and in the entire two months of 1908 the O. R. & N. carried 817 persons to Oregon and Washington points. The record for this year therefore shows that in half the time the number taking advantage of the rates was within 1333 of the number that purchased tickets in the entire period of the preceding year. In the last 30 days of the colonist rate period of 1908, which corresponds with the total rate period this year, the railroad brought in 4538 colonist ticket-holders or 2625 fewer than this year. The travel in the 1909 period was over 57 per cent greater than in the corresponding days of 1908.

In granting the special colonist rates the Harriman officials did considerable work. Out of the 7000 people who came west the rates were in effect it is safe to say the majority will locate if they have not already done so. Here's hoping that in the future the railroad men will continue the broad minded policy of granting special intervals. It is an effective way to populate the west.

A Correction.—In the Glacier of last week it was stated that C. H. Stranahan, as treasurer, and other officers of the Civic Improvement League had lately denied certain members of the League access to some of the records of the organization. In the case of Mr. Stranahan no denial was made and we wish to correct any wrong impression which may have been conveyed. When he was approached for the membership lists, Mr. Stranahan did not have them with him but he secured them in a few hours and turned them over to Secretary Ross, notifying the members where he had placed them.

Medals presented to the following

BONDS CARRIED BY TWO TO ONE

PURE WATER WINS GREAT VICTORY

State Board Of Health Expresses Mass Meeting Clearly Explaining Situation.

When the votes were counted Friday a victory was shown for pure water and municipal ownership, which was in the proportions unsurprising to the most optimistic partisans for the voting of the bonds. The count showed 170 in favor and 80 against the issuance of \$20,000 in city bonds for the installation of a water system to bring in the City Springs and distribute the water to consumers of the city. Bonds would have carried even had the old provision of the charter been in effect which required a two-thirds vote to cause the issuance of the bonds.

The last day of the campaign showed a good deal of activity on both sides of the water question and the climax came with a big mass meeting in the opera house Thursday evening at which time four members of the state board of health and J. P. Newell, consulting engineer, spoke to the citizens on the local water situation and explained it in a clear fashion which made the people more nearly realize the situation as it really was, than they had ever before.

Dr. A. E. Pierce, president, Dr. R. C. Yensen, secretary, and Dr. Andrew C. Smith, a member of the state board of health, came from Portland Thursday morning and spent the afternoon with Mayor McNeil, members of the council, City Health Officer Edgington and City Engineer Morse and visited the present and proposed sources of supply of water for the city. The party inspected the upper and lower systems and some of the smaller springs from which residents of the city are now getting water. They then drove out to the City Springs and inspected it and the surrounding country, returning to the city after dark.

When the meeting was called to order in the evening the opera house was filled to the doors, and Dr. E. C. Brosius, who presided, outlined the situation from the stand point of the city administration in a brief introductory speech. He then introduced Dr. Pierce, who spoke briefly of the necessity to pure water and the dangers of contamination when the source was surrounded by a thickly populated community. Dr. Yensen was the next speaker and he put forward his emphasis on a pure source of water for the city and in the course of his remarks, then and in answer to questions later in the evening, he stated that it would be impossible to absolutely safeguard the present system of the city so that could be used safely.

Dr. C. J. Smith, a member of the State Board from Pendleton, who had not been able to reach the city in time to accompany the party on the inspection tour in the afternoon, was present and addressed the meeting. He showed the dangers of impure water and told the citizens that situated as they were where it was possible to get good water with comparative ease there was no excuse for not having it. He showed the difficulty which the cities are up against which live in the irrigated districts. The Pendleton physician also strongly recommended municipal ownership to the people as a means of controlling their water supply.

Dr. Andrew C. Smith followed and spoke of the source of typhoid fever which had visited Eugene a few years ago and said that at present Hood River was liable to an epidemic of the sort. He highly recommended the City Springs as a source of water supply, as had the other speakers preceding him, providing that it was sufficient to supply the city.

J. P. Newell, engineer, was present and spoke to the audience of the municipal plant from an engineering standpoint. He explained that the preliminary estimates were as nearly correct as could be made without great expense and spoke of the constant flow of the City Springs as evidence of the depth of its source. After he spoke the meeting was thrown open to questioners from the audience and a number of matters were brought up by various citizens for further explanation by the experts who had spoken. Among the questioners were: A. A. Jayne, H. F. Davidson, S. W. Stark II, B. Laugille and J. L. Henderson.

Attorney Jayne gained the floor and made quite an extended speech in which he attacked the mayor and city council for the attitude they have taken on the water question. He made several accusations against the city administration which did not please the audience. At the close of Mr. Jayne's speech, Dr. Brosius left the chair and took the floor for a brief defense of the council, which had been elected to do certain things and were carrying out those policies to the best of their ability.

The Civic Improvement League has called a meeting for Thursday but an adjournment was taken and the members attended the mass meeting.

LARGEST ORCHARD FOR LINN COUNTY

The 2000 acre orchard of the Linnhaven Orchard Company, which will be by far the largest orchard in Oregon, will be between Oregon and LaCumb, in the northern part of Linn County, and about 14 miles northwest of Albany. The site has been definitely agreed upon and enough land for the proposed orchard secured.

Officers of the company have refused to give definite figures regarding the amount of land secured or the location of each piece, but confirmed the rumor that the site for the immense orchard has been chosen and that it will lie between LaCumb and Crabtree. It is reported that options have been secured on almost 500 acres and that deals have been completed for 200 acres.

The 2000 acres on which the deal is completely closed lie in a compact body north, west and south of the village of LaCumb. It is said that options have been secured on a number of tracts between Crabtree and LaCumb, and that deals will be closed up in the next few days.

The land secured is all foothill land and is rated as first class apple land. The site for the orchard was secured both because this part of the country is not thickly settled and a big contiguous tract could be secured, and also because Oregon hill land is pronounced by horticulturists as the best apple land in the world.

The Linnhaven Orchard Company was incorporated recently in Albany by a number of local men. Several of Albany's most wealthy men are included in its stockholders, and some Eastern capital is also interested. The setting out of the orchard will begin as soon as possible.

ATHLETES ARE GIVEN MEDALS AT DINNER—The members of the Hood River high school track team were entertained Monday evening in the K. of H. hall with banquet given by local business men and the medals, which the athletes won at the meet in The Dalles, were presented to them. The dinner was enjoyed by about 40 of the high school boys, the high school faculty and a number of other men who take much interest in the younger fellows. The diners met at the Commercial club, where a reception was held for a short time before marching to the hall where the banquet was served by the ladies of the Congregational church.

After the many good things had been enjoyed, Carl Vaughan, of the school board, acting as toastmaster, introduced the speakers. The toast list follows: A. A. Jayne, "Old School Days"; Prof. L. H. Henderson, "Clean Athletics"; Irman Butler, "The Reward of Effort"; J. L. Henderson, "Scholarship and Athletics"; Prof. Cook, "Presentation of Medal". The toast partook of the youthful spirit of the occasion and were thoroughly enjoyed by the guests.
