HOOD RIVER CROP FREE FROM FUNGUS

The following statement by Manager C. H. Sprout, of the Hood River Apple Growers' Union concerning the apple crop in the valley this year was printed in the Chicago Produce News last week:

"Relative to the apple crop outlook in this section, we desire to say that we have a full crop and with the increased acreage will have more apples this season than we have ever before had in this valley.

"The total output of the valley will most likely reach 600 carloads. The crop is excellent in quality, being free from all fungus and other diseases.

Life on Panama Canal has had one frightful drawback--malaria trouble that has brought suffering and death to thousands.

Rural School Problem. The rural school problem was the subject of a recent address by Henry Wallace, of Iowa, before the conference of Minnesota county superintendents at St. Paul.

The statement was uniformly made to the commission, said Mr. Wallace, that "the teachers were mainly girls, for the most part young and inexperienced, who have no love nor sympathy with farm life, and were teaching while awaiting an acceptable offer of marriage (a townsman preferred), or accumulating experience that would fit them for positions in the city schools."

Dysentery is a dangerous disease but can be cured. Chamberlain's Colic, Cholera and Diarrhoea Remedy has been successfully used in nine epidemics of dysentery.

The Need of Better Roads. At least one simple constitutional amendment that must be voted upon in the coming election is worthy favorable consideration.

How other roads shall be built is not a fixed policy. By enacting the amendment desired to the Constitution, both county and state powers are made available.

White Salmon Likes Tate. After taking a vacation and engaging in the wedding festivities of his daughter, Rev. Tate resumed his services at a Bethel church last Sunday.

tion of one of the staple foods of the world and such a thing as overproduction is out of the question.

Perhaps envy of our superior fruit may be the bottom of this disparaging talk, but ignorance also has a good deal to do with it.

The Outlook printed some observations by its "Spectator" on Oregon apples last week.

"Since next November will be the twenty-fifth anniversary of the State Horticultural Society, there will be occasion for something unusual in the way of the fruit exhibit and also in prices.
