

Hood River Glacier

ARTHUR D. MOE, Publisher. Subscription, \$1.50 Per Year.

THE CITY ELECTION.

The regular annual city election for Hood River will be held Tuesday, December 6, and at that time the offices of Mayor, three Councilmen, Recorder and Treasurer are to be filled. The officers whose terms expire January 1, are Mayor D. McDonald, Councilmen F. C. Brostus, I. H. Huggins and George J. Slocum. Recorder H. B. Langille and Treasurer E. O. Blancher. These six men have discharged the duties imposed upon them properly and it is for the best interests of the city of Hood River that each and every one of them should be kept in office.

The present city administration has under way the municipal water plant for which bonds were voted. This is the largest project which has ever been attempted by the city and is one of first importance. These men who have had it in charge should be given the commission to finish it. They are familiar with all the conditions surrounding the proposed water system and are most capable of completing the work. During the administration of the present officers there has been more street improvement in this city than during all its previous history, and that still more street improvement has not been accomplished is only because it has been deemed advisable to wait until after the installation of the water system before building too great an amount of permanent street. Much work has been done in putting the east side road in better condition, sewers have been built and a number of other important improvements have been made by the city during the present regime.

A suit brought at the instance of the present private water company and its friends, has been pending recently against the officers of the city. The sole object of this suit has been to delay the installation of the municipal water system with its guarantee of the city's health. The water company's injunction suit was brought in a far fetched fashion in the Federal court, were it not of right and legal, and an effort has been made to elude the good name of the members of the administration. The people should stand back of them in their honest efforts to gain for the city the pure water which the voters ordered them to get by a vote of 2 to 1. The officers have done every thing in their power to carry out the will of the people and they have had to fight every step of the way against those interested in a private corporation, with a part of the own which is unsavory to say the least, bent on blocking the city by every technicality which the lawyers could bolster up.

The voters should show their appreciation of the work done by the city's officers in returning them to their places a week from next Tuesday.

THE CITY'S CREDIT.

Owing to the suit now pending against the city to prevent the sale of the water bonds, together with the charge that the city has exceeded its legal liability, although the bulk of that indebtedness for permanent street improvements, the banks have ceased to cash the city warrants, and they are being stamped "unpaid for want of funds" by the city treasurer, registered, and draw interest until such time there will be funds in the city treasury to pay them, which will probably be next March. The fact that the bond holds one of those warrants has been made the subject of an attack by the News and the local correspondent in the Portland Journal on the credit of the city. There is no need for alarm that these warrants will not be paid. There is nothing unusual in the circumstances of counties or municipalities being without funds at the close of the year owing to unforeseen, but necessary expenditures, and the "howl" would be greater should the city cease all work of improvement, cut off the lights from the streets, allow the roads to become impassable, stop all street improvements and other necessary work. Contingencies arise, unforeseen at the time of making the tax levy, which must be taken care of. To provide too great a fund for these contingencies would increase the taxes to a burdensome degree. Perhaps the greatest criticism that strangers offer in regard to our city, is the lack of well paved streets, cement walks and other permanent improvements found in old established cities of this state which have had generations in which to make them. The Council have endeavored to do as much of this work as possible within reasonable limits, and the Bancroft bonding act has compelled the city to assume the indebtedness of much street improvement and caused a technical excess of indebtedness.

A Yakima girl advertised to send three Yakima apples to any address postpaid on receipt of 25 cents. She could not get rich if she was dealing in Hood River fruit at that rate as the average postage for one Hood River apple as they were sent out from Portland a few weeks ago was 13 cents.

BETSY ROSS Make her acquaintance. She will get your money. C. A. Plath Agent

Football this afternoon, 2:30 at Chapman Park.

Joe West came up from Portland Sunday, returning yesterday afternoon. If Lyle Pence and family came down from Wasco yesterday to spend Thanksgiving with Mrs. Pence's parents, Mr. and Mrs. W. H. Peugh. H. T. Peugh came with them from Wasco, but continued his journey to Astoria.

You Can Work Near a Window

in winter when you have a Perfection Oil Heater. It is a portable radiator which can be moved to any part of a room, or to any room in a house. When you have a

PERFECTION OIL HEATER

Absolutely smokeless and odorless you do not have to work close to the stove, which is usually far from the window. You can work where you wish, and be warm. You can work on dull winter days in the full light near the window, without being chilled to the bone.

The Perfection Oil Heater quickly gives heat, and with one filling of the font burns steadily for nine hours, without smoke or smell. An indicator always shows the amount of oil in the font. The filler-cap, put in like a cork in a bottle, is attached by a chain. This heater has a cool handle and a damper top.

The Perfection Oil Heater has an automatic-locking flame spreader, which prevents the wick from being turned high enough to smoke, and is easy to remove and drop back, so the wick can be quickly cleaned. The burner body or gallery cannot become wedged and can be unscrewed in an instant for reworking. The Perfection Oil Heater is finished in japan or nickel, is strong, durable, well-made, built for service, and yet light and ornamental.
