Trout Lake Hay Lands

We have for sale one of the very best ranches in the Trout Lake Valley, described as follows:

40 ACRES—All in cultivation and under irrigation; county road on two sides; good two-story, nine-room house; large, substantial hay and stock barn; stone collar; dairy house; fine garden with different kinds of fruit; excellent view; good neighbors. Adjoining land produces over 100 bushels of oats to the acre, and this is just as good. Adjoining 40 acres, which is partly cleared, can be bought if desired. **Price low.**

We also have other tracts of improved and raw hay lands for sale at low prices, in both the Trout Lake and Camas Prairie districts. Write or call on us for further information.

We are the exclusive selling agents for townsite lots in the fast growing town of Husum. Write for plat and prices.

CANNERY COMMITTEE MAKE REPORT

Commercial Club Will Arrange for Artistic Apple Exhibit at Portland Land Product Show.

There was a very small attendance at the regular meeting of the cannery committee Monday evening. The assembly hall was used for a political meeting, and other attractions kept the members away.

The report of the road committee was received. The committee reported that they had prepared and posted petitions to the county court to open portions of the new Columbia road between here and Portland, which were not now dedicated to the public. It was also decided to ask the court to designate the road the "Portland-Hood River Highway."

The special good roads committee appointed to look into the road bills, reported that with the limited time at their disposal they were unable to go into the so-called Harmony Bills thoroughly, but with the examination they were able to give them, endorsed the grange bills.

The cannery committee made the following report, which was adopted:

The committee appointed to investigate the Keep-Fresh proposition and other similar drying and canning plants beg to report as follows: We called at the business offices of the Keep-Fresh Co. of Portland and find that the company is incorporated for \$1,000,000, 40 per cent of which stock is owned by Mr. Lambert, inventor of the patent.

At present they have three plants in operation or course of construction which seem to be the only assets of the company outside their patents. They do not know what their various dried products will sell for nor what they will be able to pay the grower for fruits or vegetables.

The whole thing is still in the experimental stage and we can find nothing of merit for this Club to consider.

We have also looked into the proposition submitted by the Hood River Apple & Vinegar Co., which is a Hood River concern, using Hood River products, making Hood River cider and vinegar that are a credit and an advertisement to the community and we fully believe that they can do the same with Hood River canned goods and we recommend that his club endorse their proposition and lend their assistance in furthering their plan to add a first class cannery and evaporator to their business, which is on a good paying basis and that action be taken at once so that the necessary machinery can be ordered and the plant started early in the coming year.

The matter of making an exhibit at the Spokane Apple show which was discussed, and it was decided to take no action in the matter. There was no enthusiasm being displayed in regard to making an exhibit at Spokane this year, and it was decided to make an effort in behalf of the Portland Land Products show at Portland in November. To that end a committee was appointed to secure a guarantee of \$200 to put up an artistic exhibit and go after the \$200 prize.

C. K. Marshall, W. E. King and J. H. Heilbrunner were appointed a committee to look after the membership of the club. J. R. Putnam was appointed a committee of one to look after members in the Upper Valley.

MACHINE SHOP RUNNING FULL HANDED

One of the busiest places in Hood River at this time of the year is the machine shop of W. G. Snow. The best of machinery has been installed and labor saving devices make possible the speedy turning of materials. Yet, despite this fact the shop is running full blast, with extra men on the working force.

Nailing presses are much in demand at present, and Mr. Snow informs us that he is unable to catch up with the orders for presses. Wagon racks are also much needed now, and Mr. Snow has made a number this summer. So fully equipped with modern machinery is his shop that he was able last week to take an order for one of these racks on Tuesday, begin the construction of the rack on Wednesday and deliver it completed on Friday. When one considers the dozens of pieces to be shaped and joined and the numerous bolts and nuts to be put into place and securely fastened they can begin to realize the swiftness with which this order was filled.

To go through this well appointed shop, to see the powerful machinery handling the heavy iron and high pieces of timber, turning, planing and shaping them to a perfect nicety is truly a sight worth while.

Everything is manipulated by water power, from the blowers to the huge hammers and planers; and what seems almost incredible is the little water motor and one low wheel that furnishes the fires for both the machine shop and the horseshoer's shop adjoining.

One of piece machinery which attracted the writer's attention was the little steel hand saw that will cut anything from a cute little bracket to the big braces on a rack or wagon. And to see the little steel drill make a hole through a big bar of iron without any apparent effort, is only equaled by the thread cutting machine when it cuts the threads on an inch and a half bolt as perfectly as those on a quarter-inch bolt. Altogether it is time well spent to accompany Mr. Snow over his shop, and have him show and explain to one the purposes of the different machines in use there.

The timely discovery of a fire in the basement of the Park street school Saturday evening, saved that building from destruction. The janitor had put some hot ashes into a barrel and it caught fire. The blaze was discovered by Mrs. C. H. Sletten, who gave the alarm. W. E. Colby was one of the first on the scene, and being familiar with the interior of the building, broke into the basement, and getting a hand extinguisher put out the blaze. The fire had already started in the cordwood, and in twenty minutes would have been beyond control. The fire department responded to the alarm but the fire was out when they arrived on the scene.

TROUT FRY PLANTED IN THE WEST FORK

Another car of trout fry arrived at Hood River last Thursday. In charge of it were the regular men from the hatchery, and Wm. Stewart and W. L. Clark went with the car to Dec. The Mount Hood furnished a special engine for the trip, and the car arrived at Dec before the regular train.

Burnett Duncan had taken his car to Dec the day previous and with Clark's and Stewart's assistance made arrangements for the disposition of the fry. It was through the courtesy of Walker West, superintendent of the big mill, that the arrangements were made easy. Nothing was too much trouble for him to have done, and it was done right and on time. He made arrangements for teams, had a special dinner for the "fish car crowd" ready at the hotel, and furnished all the help he could in the work, besides taking the crowd through the mill and showing them how it was all done. Connaway Mercantile Co. had sent up their truck from Odell, and this made two or three trips to the West Fork. Several wagons from the Dec country did the rest.

Thanks are due to G. R. Westerburg, who gave his time and team to the work, just for the fun of it, and to give the other fellow some day, as he doesn't fish himself.

Any one who has been fishing in Hood River streams the past three years, and come back empty stringed, will appreciate the work that is being done. More fish are yet to be planted this year and the work followed up next. In connection with the stocking of the streams, a correct fish ladder is to be placed in the new dam of the Hood River Gas & Electric Co.; a fish ladder will be built at the Punch Bowl; the channel of the Hood River changed at the mouth and additional service given in wardship over the streams, so that the new fish will be allowed to grow big enough to make real fishing.

DISTRICT COURT CONCLUDES WORK

Judge Bradshaw adjourned court last Friday, a number of important cases being continued or otherwise disposed of without trial.

The jury in the trial of Underwood vs. the First National Bank was out from three o'clock Wednesday afternoon until nine o'clock Thursday morning, being unable to agree. The jury stood six to six until morning, when one of the jurors changed in favor of the plaintiff. Being unable to agree, they were dismissed.

The case of Ollie G. Baetakes vs. W. C. Ehrck, after a trial that lasted most of the day, was nonsuited on motion of the plaintiff's attorney.

The condemnation suit of the Pacific Power & Light Co. for a right of way across J. H. Kolberg's place, was nonsuited. The plaintiff asked to amend their complaint to cover only such portion of the land as was necessary to set the poles, but the motion was overruled by the court. The judge held that a right of way would necessarily mean a twenty-foot strip of land to give them access to their lines at all times and they must ask for that much land in their suit.

The condemnation suit of the O. W. R. & N. Co. for a right of way across the land of F. H. Utton was continued at the request of the railroad company, they not being ready to try the suit at this time.

Suits of Geo. W. Brown against the P. Hinrichs estate and Ida Mercer to settle the boundary line, resulted in a judgment for the plaintiff.

MANY GOOD RESULTS FROM EATING APPLES

Do you know what you are eating when you eat an apple? No, not the sorts and varieties of worms, for there will be no worms if you have bought your fruit from an orchardist who sprays his trees.

"You are eating malic acid, the property that makes buttermilk so healthful," says National Horticulturist. "You are eating gallic acid, one of the most necessary elements in human economy. You are eating sugar in the most assimilable form, combined carbon, hydrogen, oxygen caught and imprisoned from the sunshine. You are eating albumen in its most available state. You are eating gum allied to the 'fragrant medicinal gums of Arabia.' And you are eating phosphorus in the only form in which it is available as the source of brain and nerve energy. In addition to all these, you are drinking the purest of water and eating the most healthful and desirable fiber for the required 'roughness' in food elements. The acids of the apple diminish the acidity of the stomach and prevent and cure dyspepsia. They drive out the noxious matters that cause skin eruptions and thus are nature's most glorious complexion makers. They neutralize in the blood the deleterious elements that poison the brain and make it sluggish. The contained phosphorus is not only greater than in any other form of food but it is presented in a shape for immediate use by the brain and nerves, where it may flush into great thoughts and great deeds. The ancients assigned the apple as the food for the gods, and its juices the ambrosial nectar to which they resorted to renew their youth. Men are the gods of today, and the apple is their royal food, the magic renewer of youth. Eat a rich, ripe apple every day and you have dismissed all diseases of half their terror."

Evans-Smith

At the home of J. H. Swift, on the Heights at high noon last Saturday, the happy words that made two hearts beat as one were spoken by Rev. Swift, pastor of the Christian church, when G. R. Evans and Miss Marce Smith, both of Hood River, were pronounced husband and wife, in the presence of the father of the bride and the parents of the groom.

The happy pair went at once to their home near the Tucker bridge, where they are at home to their friends all the time. These young people are too well known to need introduction, and they may be assured that the glad hand of all who know them is extended to them with all the good wishes for a long and happy life, as well as prosperity all along the way.

CIT ENJOINED FROM PAVING

CONTRACT IS HELD UP BY COURT

Capt. C. P. McCan Sues as a Taxpayer Against City Paving Oak, Second and Third Streets—Council Matters.

The mayor and city officials and E. O. Hall, contractor, were yesterday served with an injunction from carrying out the contract which was let to Mr. Hall, to pave Oak, Second and Third streets, in the fire district, with asphalt macadam, or what is locally known as the "Goldendale pavement."

Notice was served on the council Monday evening that such an injunction was being prepared and would be served, and legal service was made yesterday. County Judge G. R. Castner signed the injunction order.

The complaint does not allege any damages or injury to Mr. McCan, who sues as a taxpayer, nor does the complaint allege that the contract was not let to the lowest and best bidder, but objection is raised merely on technical grounds, that certain legal requirements were not set forth in the notice calling for bids. The injunction calls for a hearing on Friday, October 19.

Owing to the notice of injunction and manner of bids, the contract for the paving of Oak street, from Fifth to Tenth, was deferred until the next meeting of the council, and the bids were left in the hands of the street committee. Two bidders submitted three bids each, calling for three separate kinds of paving, and the price ranged from \$4,184 to \$4,058, or from 90 cents to \$1.35 per square yard.

It is probable that no attempt will be made by the council or the contractor to fight the injunction, as any delay now will make it too late to do any paving this fall, and the matter will probably be laid over until next spring. The attitude of the property owners on the streets to be paved will no doubt govern the actions of the council in the matter. If there is too much objection to the paving, it will be deferred.

Ordinance No. 412, calling for cement walks on Ninth and Eleventh streets to connect with walks leading to the high school building, was passed, and bids will be called for.

At the request of the Woman's Club, November 9 was designated as Tree Planting Day.

GOOD ROADS MEETING CREATES DISCUSSION

An interesting meeting on Good Roads was held at the Commercial club rooms Tuesday evening. Peter Kuehling, of The Dalles, and Mrs. Edith Taylor Weathered, of Portland, addressed the meeting. Mr. Kuehling spoke on the importance of the Portland-Hood River Highway and the organization of the Inland Empire Highway Association, which will aid in the building of the road by moral support of financial means destined to complete the work in the shortest time. It is hoped 100 signers of the organization will be found in Hood River.

Mrs. Weathered's talk was mainly along the lines of the moral advantages of good roads to any community, and was followed by an open discussion in which Murray Kay, A. I. Mason, J. F. Batchelder and others took part. Mrs. Weathered stated that in Washington state the women had taken an active interest in the good roads movement, and had been able to accomplish much good in many communities. It seemed better to give the women a time and support to such questions as this rather than the temperance question, which many of the men thought they would tackle. They have also forwarded a movement to get the women to buy Washington made products wherever possible. She stated that wherever 1000 women of a community got to demanding a baking powder made in Washington, it soon made quite a difference in the way manufacturers learned to push home made products. The relation of good roads to home industries is found in getting the country residents to buy home made products and in this manner get the city man and manufacturer to be interested in the good roads question of his country consumer.

A. I. Mason took advantage of the occasion to score a couple of points for the Grange Road Bill, which the Commercial club committee had endorsed at their last meeting.

Mr. Kay's remarks included the information that in building roads in Hood River county, it would be important in the future to look to the drainage question, a point that has been more or less neglected in past construction.

Rigby-Kamerer

Friday evening at the Methodist parsonage occurred the wedding of Rev. Jesse W. Rigby, of this city, and Mrs. Mary Jane Kamerer, of Minneapolis, Minn., Rev. W. B. Young officiating.

Mrs. Kamerer arrived from a sojourn in Iowa last Thursday, and in anticipation of Mr. Rigby's Hood River friends, who planned to attend his wedding Sunday forenoon, persuaded him to consent to a quiet wedding Friday evening.

The groom has been a resident of this valley many years and is well known, having been at one time the pastor of the local Methodist church. The bride, while a stranger, has already made many friends, and the best wishes of the community is extended to them in their new home.

Rev. E. T. Simpson tendered his resignation last Sunday as pastor of St. Mark's Episcopal church to take effect January 1. Mr. Simpson has a ranch near Ridgefield, Wash., that is demanding his attention, and he will spend a couple of years at least on his place. He regrets leaving Hood River, where he has made many warm personal friends during his stay here, and the community are sorry to lose him and his estimable wife.

J. B. Hunt had his arm burned Saturday evening while riding on the chemical to the fire at the Park street school. In the ride some of the chemical splashed on his arm, severely burning it.

The Boy Scouts enjoyed a "fake social" at the residence of Scout Master Simpson Friday evening.
