## Lights at Reasonable Prices

**Cash Grocery** 

THE HYDRO-ELECTRIC Co., does not want the consumers of electrical energy for lighting or power purposes to pay for the plant monthly, yearly or bi-annually, they only want a fair, reasonable price on a live and let live basis; and are not asking its customers to buy our competitor's plant, nor anyone to pay them a price with which to buy our plant; all we have to sell is electrical energy.

"Let There Be Light." The Genesis account is in full accord with facts known to Science. There was no light in the Earth until Divine Energy brooded on the waters. The account suggests an electrical influence and light, somewhat resembling the Aurora Borealis. The earth was shrouded with a canopy of water, minerals, etc., shutting out the light of the sun, until the Fourth Day. The First Day, under the Divine Energy, gradually prepared for the next Epoch. On the Second Day, or Epoch, was

the light had to do in a natural way with this. The firmament was completed with the Second Day. In the Third Day, or Epoch, earthquakes took place, mountains were thrown up, and the waters gathered into seas, draining off a land surface. Forthwith vegetation sprang up. The account does not say that God made grasses, frees, etc., but that under Divine command the carth brought forth these various kinds. Nothing in the Genesis account interferes with an evolutionary theory as respects vegetation. Thus the Third Day accomplished its purpose According to the Vallian Theory, the Earth was once surrounded by gaseous rings and belts, similar to those of Saturn and Jupiter, thrown off to a great distance, when the Earth was in a molten state. Held off by the firmament, they sprend out like a great curtain, causing darkness. Then, inflaenced by the rotation of the Earth. they gravitated toward the poles, gradually cooling. Finally they broke, one after another, coming down as great deluges, burying vegetation, and depositing minerals The last ring came down in Nonh's day. For centuries It had been a great watery canopy, through which sup, moou and stars were 58 visible, but not clear. Fuder this canopy, the Earth let to daybreak. was like a green-- Jales house, This ac counts for vege-Despite the danger to which they are table and animal remains: found tong embedded in The work of the sizth ice, which formed instantly when the canopy collapsed as a deluge. After the fall of several rings, the heavenly luminaries exercised their beneficial influences and served as a great clock, marking days, months and cears. Thus the work of the Fourth Day was accomplished In the Fifth Day, the waters began to swarm with living creatures. Next came fowl and great sea monsters. A measure of evolution is suggested by the statement that "the waters brought forth abundantly," under Divine supervision. Only in the case of man does see her father preparing to shave. the Bible declare a personal creation. The creation of land animals marks ed. want. They don't know no better!" And Uncle Hornce treated the com pany to sardines, crackers and cheese. -Youth's Companion.

Mark Hanna did many things in a Bible usage, seven is symbolical of per. large way. Nevertheless he was not averse to giving his serious attention to ness of perfection; and the fiftleth, or Hitle things on occasion. Senator Hanna one afternoon in Washington boarded a trolley car. Seeing Representative

Dingley-he of the tariff law-just entering the front door, Hanna walked forward and took a seat beside him. The conductor approached and each man paid his separate carfare. Dingley with a five cent piece. Hanna with a

least one man who wasn't-himself. "It's very simple, Dingley, very," replied Hanna. "You pay your carfare with a nickel, the full hundred cents on the dollar. You may have noticed that I paid my fare with a ticket. I buy them six for 25 cents; therefore I save just 20 per cent for myself. That's the secret. Dingley. That's the thing you've got to learn-how to save the 20 per cent for yourself. That's your trouble

fiftleth Thousand-Year Period begins,

money.

#### happened yet, and it isn't likely to." But Uncle Horace merely grinned and picked up one of Uncle Jake's ax helves. The door opened, and in came Uncle Jake. "Jake," said Uncle Horace, running his fingers up and down the smooth wood, "this is a mighty good ax han-

"No. it ain't." replied Uncle Jake at once. "I can make good handles, but that one you've got is the kind people

SMALL SAVINGS.

A Lecture on Economy That Mark Hanna Delivered to Dingley.

The conversation fell along the lines of business. Reports, they agreed, indicated that every class of business and industry was prospering. "Every one," said Hanna, "seems to be making good

Dingley: you don't save when you have the opportunity, A lot more people could be rich if they would only learn how to put that easy made 20 per cent on the credit instead of the debit side of their accounts."-New York World.

#### Tree That Gives Light.

Among freaks of nature in trees there stands conspicuous one known as the Asiatic star tree. It is enormous tall growing to a height of from sixiv feet to eighty feet, while from the ground up to a distance of about orty feet the trunk is perfectly bare om that point there spring a number of tangled limbs, which shoot out lusters of long, pointed leaves, and it is these, grouped together, that emit at night a clear, phosphorescent light. This gives the tree a spectral appear ance and is very deceiving to travel ers, who frequently mistake the glow or an illuminated window of a house The light is not brilliant, but is of ufficient strength to allow of a newsuper being read by it. It does not cker, but glows steadily from sun-
