

Oh, How I Itched!

What long nerve-racking days of constant torture—what sleepless nights of terrible agony—itch—itch—itch, constant itch, until it seemed that I must tear off my very skin—then—then— instant relief—my skin cooled, soothed and healed!

RAILWAYS COMPARED WITH AGRICULTURE

For every 100 miles of railway main track in 1900 there were 125 miles in 1910. For every 100 acres of improved farm land in 1900 there were 115 acres in 1910; for every 100 acres devoted to crops in the former year there were 110 in the latter. That is, during the census decade, the latest period for which official statistics are available, the railway plant increased at over double the rate of the agricultural plant.

For every 100 ton-miles in 1900 there were 180 in 1910; for every 100 passenger-miles there were 202. For every 100 bushels, bales, or pounds of the ten principal crops in the former year there were 109 in the latter. That is, the output of the railways increased at a rate over ten times as great as that of the farm.

Measured per mile the output of the railways increased 40 per cent and 57 per cent respectively. Measured per acre the output of the ten crops averaged a decrease of about one per cent. That is, the output of the railways per unit of plant increased by one half, while the output of the farms per unit of plant averaged a decrease.

The population in the ten years increased by about sixteen million persons, or 21 per cent. Measured per inhabitant the ton-miles of the railways increased 49 per cent and the freight revenue 52 per cent, the passenger-revenue 67 per cent and the passenger revenue 61 per cent. That is, the work performed by the railways increased at very nearly the same rate, measured per inhabitant the output of the ten principal crops ranged from a decrease of 21 per cent to an increase of 20 per cent, while the farm value increased from 34 to 83 per cent.

For example, the relative supply of corn that was 100 bushels in 1900 was 79 bushels in 1910, the relative farm value of corn that was \$100 in 1910 was \$144 in 1910. That is, while the supply of corn per inhabitant fell off 21 per cent, the value of the supply per inhabitant increased 44 per cent. In the same relation the supply of wheat fell off 14 per cent while its value increased 47 per cent, the supply of cotton fell off 8 per cent while its value increased 80 per cent.

In 1910 one thousand bushels of the seven principal food crops could purchase over 25 per cent more of commodities in general, and 50 per cent more of transportation than in 1900; but conversely, the purchasing power of the receipts from one thousand ton-miles fell off 13 per cent, and that from one thousand passenger-miles fell off 19 per cent.

BITULITHIC PAVING

To Be Laid at Victoria, B. C.

One of the leading cities of the northwest to lay bitulithic this season is Victoria. Much work will be done and many streets will have benefits presented an unselfish appearance will soon help to increase the beauty and attractiveness of Victoria.

After a thorough investigation, it was decided to use bitulithic on account of its durability, its low cost, its serviceable and admirably adapted to every day traffic conditions, but because it will last for years without repairs.

It is exceedingly annoying to residents to have a street either worn out in places or torn up for repairs, as well from the standpoint of convenience as financially. For that reason bitulithic, which has made an excellent record in other cities, was chosen.

Women Form Lavender Club

The first lavender club ever formed has been organized at West Stayton, starting with 15 members with the following officers: Mrs. H. S. McLeod, president; Mrs. D. B. Conness, vice president; Mrs. S. D. Turner, secretary and treasurer.

The object of these 15 women is to raise lavender for commercial purposes. Having irrigation available during the dry summer months, they believe that the results will be highly satisfactory.

Dr. Withycombe, of the O. A. C., at a record meeting held at West Stayton, spoke very encouragingly in regard to the possibilities of the undertaking of this new club.

Coughs and Consumption

Coughs and colds, when neglected, always lead to serious trouble of the lungs. The wisest thing to do when you have a cold that troubles you, is to get a bottle of Dr. King's New Discovery. You will get relief from the first dose, and finally the cough will disappear. O. H. Brown, of Muscadine, Ala., writes: "My wife was down in bed with an obstinate cough, and I honestly have had it not been for Dr. King's New Discovery, she would not be living today."

Known for forty-three years as the best remedy for coughs and colds. Price 50c and \$1.00. Recommended by Chas. N. Clarke.

Films To Be Made On Columbia

Columbia river scenery is to be filmed by the Edison players, with the beautiful Miss Laura Sawyer, one of the most accomplished photo-players in America, heading the company.

This work, which will mean much to Oregon will be undertaken by the Edison players, now quartered at Del Monte, Cal., about June 1.

The object of the Edison players' company in coming here is two-fold and the advertising that Oregon and the northwest will obtain from it can scarcely be estimated.

Various sections of the northwest will be filmed for use in the New York schools, and the Columbia river scenery will be brought into requisition for rugged and gorgeous backgrounds for illustrating photo-plays of the Waverly novels.

Heed the Cough that Hangs On

The seeds of consumption may be the cause, and a cough that hangs on weakens the system. Foley's Honey and Tar Compound checks the action, breaks the inflamed membranes and strengthens the lungs. E. D. Rountree, Stillmore, Ga., says: "Lagrippe left me a dejected, hacking, painful cough which Foley's Honey and Tar completely cured." Chas. N. Clarke.

"Co-ed" is a Grandmother

The University of Oregon has an undergraduate student who is a grandmother. Mrs. A. Ella Stearns, who is matron of the girls' dormitory as well as a student, recently received word of the birth in Portland, of a son to her daughter, Mrs. Stanley G. C. Smith.

"Our baby cries for Chamberlain's Cough Remedy," writes Mrs. T. B. Kendrick, Rasaca, Ga. "It is the best cough remedy on the market for coughs, colds and croup." For sale by all dealers.

VALLEY SCHOOLS WILL HOLD TRACK MEET

The schools of the Hood River valley will hold a track meet at Columbia park on Saturday afternoon, April 26, when a loving cup, to be purchased by pro rata contributions from the schools entering teams, will be presented to the victorious team. On the Saturday following the victorious team will meet the athletes of the high school in a track meet. The cup that will be given to the victors may be twice won before it can be used permanently.

The officers of the association of schools are: Miss Della Rush, of the Odell school, secretary, and Principal Tomkin, of the Barrett school, treasurer. J. E. Stubbs, principal of the Frankton school, is actively promoting the meet. The Barrett, Oak Grove, Odell, Frankton, Pine Grove and Parkdale schools have already signified an intention to enter the meet. The pro rata amount of the funds to be subscribed by each school should be sent to the treasury on or before April 19, while all entries should be made with the secretary before that date.

All schools that have not entered the meet are urged to correspond with Prof. Stubbs.

The order of events is as follows: 50, 100 and 220 yard dashes, the 440, the high jump, hammer throw, standing broad jump, pole vault, 220 yard hurdles, half mile relay, each entering team having four entries.

The participating students will be divided into four classes. In class A will be all the participants over 14 years of age, while class B will contain those 14 years of age or under.

River Reaches Record Mark

The Columbia river last week reached a record high water mark for this season of the year. Between Monday and Friday the river rose more than six feet. The big sand bar north of the city was almost entirely submerged, and the Underwood-Hood ferry boats were enabled to enter the slough at the foot of First street. However, the water has been receding since Friday.

Commodore Dean, of the Hood River White Salmon ferry system, declares that the water was as high as he had ever seen it so early in the year.

The Columbia, however, has been dropping very fast since Sunday. It dropped a foot Sunday night, and the waters are again receding from the big broad sand bar.

Canfield Hurries Back From Indiana

Just before the severe floods that wrought such havoc in Ohio and Indiana, A. Canfield, of this city, left for that region, where he had planned to purchase a tract of land. The place that Mr. Canfield contemplated owning was covered by the waters of the Wash river when he arrived, and he lingered but a short time.

"I took the train out of the place," says Mr. Canfield. "I knew the rivers got pretty high there sometimes, but I had never figured on any such flood, although I formerly lived in the middle west. After one look, I decided that Oregon was good enough for me."

While in the east Mr. Canfield visited his son at St. Louis.

Dr. Beaumont a Booster

Dr. J. F. Beaumont, of Portland, who owns a ranch near Summit, never misses an opportunity to boost for the valley. Dr. Beaumont is a member of a number of Portland clubs, and any one can get a rise out of him by trying to detract from the merits of Hood River's excellent fruit. The following squib is taken from the Portland notes of the Courier:

Doc. Beaumont says he would rather squeeze Hood River apple cider out of one of Black's pork sausages than try to please all the members of the Ad club on the "eats" he orders for them each week.

THINK OF IT

30,000 Persons Publicly Recommend Our Remedy. Some are Hood River People.

Over one hundred thousand have recommended Doan's Kidney Pills. For backache, kidney, urinary ills. Thirty thousand signed testimonials are appearing now in public print. Some of them are Hood River people. Some are published in Hood River. No other remedy shows such proof. Follow this Hood River man's example.

William Boorman, 415 Sherman ave., Hood River, Ore., says: "I was in bad shape with kidney trouble. My back was very lame and I was annoyed a great deal by the kidney secretions. I could hardly stoop. Doan's Kidney Pills quickly relieved these ailments and I publicly recommended them. I still get great relief, whenever I take them. You may continue publishing my former testimonial."

For sale by all dealers. Price 50 cents. Foster-McMillan Co., Buffalo, New York, sole agents for the United States. Remember the name—Doan's—and take no other.

Blancher Sells Residence

E. O. Blancher last week sold, through the agency of W. J. Baker, his residence and two adjoining lots on Columbia street to E. J. Middlemear, of Mosier. The consideration of the transaction was \$3500. Mr. Middlemear and family will remove here soon and make their home in the newly purchased residence. Mr. Blancher has planned to build a new home on the property owned by him on Oak street.

For Burns, Bruises and Sores

The quickest and surest cure for burns, bruises, boils, sores, inflammation and all skin diseases is Bucklen's Arnica Salve. In four days it cured L. B. Hatton, of Iredell, Tex., of a sore on his ankle which pained him so he could hardly walk. Should be in every house. Only 25c. Recommended by Chas. N. Clarke.

Four Apples Sent to New York

An apple that would not even appeal to a boy bent on a foraging excursion to a neighbor's orchard, was purchased by F. N. Arens in New York last winter in a box of Extra Fancy Hood River Newtowns. The green, knobby specimen is exhibited at the Chamberlain club room over the sign. "This apple was picked by a descendant of the man who killed the goose that laid the golden egg."

When medicine must be given to young children it should be pleasant to take. Chamberlain's Cough Remedy is made from loaf sugar, and the roots used in its preparation give it a flavor similar to maple syrup, making it pleasant to take. It has no superior for colds, croup and whooping cough. For sale by all dealers.

Something You Should Know

About Substitution

If you wanted to buy oak lumber and the man delivered yellow pine, you would know the difference.

If you wanted to buy silk and they sent you calico, you would have no trouble in seeing the substitution.

It is not so easy, however, with medicine. A great many medicines look alike and taste alike, BUT THEY DON'T ACT ALIKE. Just think this over the next time you want medicines. Remember that at our store you can absolutely rely on every drug we sell. The difference between buying medicines and merchandise is the difference between knowledge and belief. You know the one but you have to believe in the other. You will be absolutely safe when you put your belief in us.
