THE BULL RUN BILLS

It is enough to arouse the wrath of what we blame pleased. local citizens, who are well acquainted with the Lost Lake and Bull Run districts, to know that Senator Lane and Representative Lafferty are introducing bills in their respective branches of congress in an endeavor to protect the watershed of Fortland's water system by the prevention of the eriticism, but because the road will before the proper authorities that they may act upon the same. DANGER OF WATER SPORTS

It is expected that as the year passes we will read of fatal accidents to the boldest of those who enjoy swimming, canoeing or boating. No amount of warning will prevent deaths by drowning, and yet the tragic end of the young Oregon Agricultural College girl last week should be a lesson to those who go upon streams in cances for their pleasure. Danger seems far away, when a strong armed man takes his girl upon the still, softly running current of a placid stream, and so the young man thought who accompanied the victim of the fatal accident,

When people are out in boats there is always some member of the party who thoughtlessly plays some practical joke. The boat may be rocked from side to side and others of the party so seriously frightened that they become panicky. The man who plays practical jokes on such an occasion deserves to be severely swatted with a paddle.

The swimming and boaiting season i coming space in Hood River. We hope those who participate will be careful. and that we will not have the sad duty of chronicling any fatal accidents.

AS TO SOCIAL AND MORAL HYGIENE

Society as a whole is sufferng today because of the ignorance of not only the young, but of even older men and women as to social and moral hygiene, It is a delicate subject, and because of the old custom that has prevailed that children should know nothing of physiological subjects, the old false modesty is going to be hard to eradicate. However, the State Hygiene Social Society is now waging a campaign that will result in much benefit. Parents, who have never given the subject the serious thought that it deserves will be made to realize the necessity of edueating the children.

Lessons on these all important subjects should be taught frankly to the
