

The Hood River Glacier.

VOL. XXV

HOOD RIVER, OREGON, THURSDAY, SEPTEMBER 11, 1913

No. 15

TO EXCHANGE:

1120 acres stock ranch 5 miles from Paulina, Crook County, Oregon. 150 acres natural meadow from which 200 to 350 tons hay is cut each year. 100 acres grain land, balance good pasture. Good buildings. Price \$18.00 per acre. Will trade for Hood River Orchard land. This is one of the finest horse and cattle ranches in the northwest.

875 acres 8 miles west of Eugene, 350 acres in finest state of cultivation with best crops in Willamette Valley. Oats crop now on land will yield 75 to 80 bushels per acre. Flax 35 to 40 bushels per acre, wheat, corn and other crops in proportion; balance of land partially open timber and fine pasture; family bearing orchard, two fine creeks. Fine set of buildings with all modern improvements. This is one of the finest farms we have ever seen. Price \$65.00 per acre. Will take up to \$50,000 in other property, balance 7 years at 6 per cent.

20 acres fine 4 year old trees in good district on East Side to trade for land on West Side. Owner lives on West Side and wants to get his properties closer together. Would consider city property.

Continental Health and Accident Insurance provides prompt payment for loss of time caused by sickness or accident in any form. A policy without restrictions insurance for all diseases and every form of accident. This great policy can be purchased for as little as \$1.00 per month. There have been seventeen accidents in this community in the past ten days. You may be next. Better see us about this today.

SCHOOL FAIR HERE SATURDAY

CHILDREN SHOW MUCH INTEREST

Exhibits of Poultry and Garden Truck
will be Placed on Court House
Lawn if Weather is Good

The interest of all the schools and school children of the county is now centered in the school fair which will be held here next Saturday. The committee has arranged to display the exhibits on the courthouse lawn, in case the weather permits. Otherwise the displays will be made in the corner room of the Bell building on Oak street. A large list of prizes has been donated by the merchants of the city and the children presenting the best exhibits of garden truck, of needlework and poultry will receive handsome awards.

All the school children of Hood River county are eligible to enter the contest. Pupils may seek information and advice, but must do the work themselves. This is imperative. Pupils will be divided into two classes, Class A, all over 12 years of age on September 13; Class B, all under 12. Classes are as follows:
Best packed box of apples, both Class A and B together; Best trio of large breed chickens; Best trio of small breed of chickens; Best pair rabbits, Class B only; Best five carrots; Best five ears of corn; Largest pumpkin by weight; Best loaf of bread; Best apple pie; Best five glasses jelly, at least three varieties; Best five jars canned fruit, at least three varieties; Best display asters; Best display sweet peas; Best display dahlias.

Best hand made apron, made for and by the pupil entering the same. To be of any kind of material and any color. Mechanism to count, rather than material or trimmings.
Best piece of darning or patching. Darn to be not less than two and one half square inches and patch to be not less than four square inches.
Best piece of mechanical work (hand made).
First, second and third prizes to be given of \$3, \$2 and \$1, respectively.
No pupil shall enter for more than four prizes.

L. P. Harrington, of Eugene, who was recently here in the interest of the fair, and to increase interest in the state fair, urged that as many of the children as could, should send exhibits to the state fair. The railways will transport the exhibits free of charge. Mr. Harrington expressed a desire to return here for the local fair.

The committee in charge of the school fair is composed of Judge Geo. R. Castner, County School Superintendent C. D. Thompson and Joe D. Thomson. Anyone desiring further information as to the fair should telephoned one or the other of these committeemen.
"Young gardeners entering vegetables for premiums at agricultural, school, county and state fairs must exercise special care in the entries if they would receive favorable notice from the judges and win the valuable premiums," says Professor Bouquet, of the department of horticulture, Oregon Agricultural College.

"Heretofore too many fairs have been exhibitions of vegetable monstrosities while commercial specimens of money value have been conspicuous by their absence. The boys and girls of Oregon must see that the vegetables that they exhibit are clean, smooth, uniform in size, color and shape, and true to type of the variety. Something must be exhibited that will catch the eye of the judge. Nothing is of more importance than that the specimen should be clean and show great care in preparation previous to exhibition. Enormous specimens of beets, radishes, carrots and squash are to be discouraged, but the contestant should make a point in selecting his specimens in the field to choose them for the qualities which have been named above. Aim for quality, not for quantity. Children must be encouraged to exhibit vegetables that are of the highest market value.

"Root vegetables should be clean, of moderate size, smooth and the individual specimens uniform as far as possible in all aspects. Cabbage and lettuce and such like vegetables should be solid and of proper commercial size. The cauliflower which is shown should be compact, white and free from blemishes; the celery well bleached and large."

The entries will be made with a card, showing the number of the entry, the class, division and number of the school district contestant resides in.

CLUB HOLDS ITS FIRST FALL MEETING

The first fall meeting of the Commercial club after the passing of the hot season, held in the club rooms Monday evening, was an enthusiastic one. About 25 of the city's business men were present and various topics came up for discussion. One of the slogans for the organization next year will be: "Better front porches." An effort will be made to have a government dredge brought here in order to deepen the mouth of the Hood river and probably to make a deep water channel from the mid stream of the Columbia to an accessible point near the business district of the city. At the present time, during the low water stage, the ferry and boat landings are really remote places, and it takes a bold soul to reach them by traveling over the bottom lands of the Columbia and over the shifting sands.

Attention was also called to the fact that the people of Underwood were greatly annoyed by the heap of garbage that confronts their eyes and nostrils every time they make a trip to this city. "I was recently in the Underwood district," says S. A. Mitchell, "and as every one else that passes that way, I noticed the garbage heap, I would consider it a personal insult if I were the people of Underwood and had to pass by that stench every time I came to this city."
The club's attention was called to the fact that the city council was now

busy at work on plans for the installation of an incinerator.

The members of the automobile club, who have become affiliated with the Commercial club, will cooperate with the members of the city government in an effort to secure safe driving of cars not only in the city, but in all parts of the valley. A club member, when he sees a case of negligent or reckless driving will report the same to the secretary of the club or the chairman of the automobile committee, who will notify the guilty party and warn him to desist from further cases of recklessness.

It was announced that the O. A. C. Welfare school would be here Wednesday and Thursday of next week. It has not been learned just where the school, which is accompanied by a large number of the experts and instructors of the Oregon Agricultural College, will be held. This will be determined later. It is probable, according to Prof. J. O. McLaughlin, that the exhibits and lectures will be given in one of the local school buildings.

In the near future the judiciary committee of the Commercial club, to whom was referred the recent road laws passed by the last legislature and the members of which were asked to make a study of the laws and report on them, will explain the new laws to the members. Judge Castner made a short talk Monday night. "There are a number of new road laws that will be of interest," he said, "and that the people should familiarize themselves with. One of the greatest needs in road construction is money, and the people can get the money by bonding."

"Multnomah county is now busily engaged in a survey for the Columbia river highway. This survey is an expensive proposition, costing about \$300 a mile. The local court was asked to have the survey continued on across this county. Multnomah officials stating that Wasco county would take the route up at their county line and continue it. However, we did not feel able financially to enter such a deal. Some of the counties are taking the matter up by subscription."

L. A. Henderson, a member of a committee appointed to investigate the feasibility of parking that portion of Second street north of the Hotel Oregon, reported that tentative plans had been made, whereby the site would be beautified by walks and grass plots, and that it had been proposed to place there a booth of the Commercial club.

On the motion of Frank A. Gram a rising vote of thanks was extended to R. E. Scott, the retiring secretary of the club.

The meeting was presided over by Dr. J. F. Watt, vice president, President W. L. Clark being out of the city. Secretary C. N. Ravlin met with the members of the organization for the first time.

MARSHAL WILL COMPLETE ROAD WORK

Although C. K. Marshall, who for the past year has been road master of the county has submitted his resignation, the same to take effect at the pleasure of the court, the members of the county court have accepted the resignation, effective only on October 15. The court feels that Mr. Marshall should be allowed to finish pieces of construction work that he has begun and that it would be an injustice to him as well as to the county to dismiss him at the present time. The county court is in thorough accord, according to Judge Castner, with that portion of the road laws providing for a roadmaster, who shall have general supervision of the roads of the county, thus standardizing the work and insuring a more uniform system of roads.

A statement given out by the county court last Saturday is as follows:
Now, there having appeared before the court a committee consisting of F. C. Sherriell, J. H. Jeffrey and A. L. Mason, who presented a petition signed by 276 taxpayers of the county requesting that the office of county road master be immediately vacated owing to the present financial situation of the county, and the court having listened to argument of the committee in support of the said petition, the court directs that the petitioners be replied to as follows:

The road master was appointed under authority given by the Statutes, and in accordance with the recommendation of the grand jury of October, 1912.

2. It is the unanimous opinion of the members of the court that such an office is necessary if the road work in the county is to be carried on in a systematic and economical manner, and such opinion is endorsed by the legislature of the state, inasmuch as the laws of 1912 provide that practically all road work in the county be carried on under the supervision of either the road master or county surveyor, and leave the court practically no discretion.

3. As regards expenditure, the salary of the county surveyor is fixed by law at \$5 per day and 10 cents per mile for each mile traveled. The salary of the roadmaster is left to the discretion of the court, and at present \$5 per day and \$2.50 per day for traveling expenses, when actually engaged in the performance of his duties.

Therefore, beginning with January 1914, the employment of a superintendent of county road work is required by law, and the only question will be whether a road master is to be appointed or the county surveyor employed. The county cannot be saved the expense in any way.

4. In response to the petition Mr. Marshall has voluntarily placed his resignation in the hands of the court.

At the present time there remains to be completed certain road work involving the expenditure of several thousand dollars and which will require the employment of a superintendent.
Mr. Marshall having consented to retain his present position until the 15th of October in order to finish the work which having been planned and started by him, could not be carried out without his assistance except at great inconvenience, expense and delay to the county, and the members of the court being satisfied of the value and competence of his services, they feel that it is their duty, and they have therefore decided to retain his services until the 15th of October, 1913.
Dated Sept. 5, 1913.

Clarke Has New Jeweler

H. A. Lathrop, of Helena, Mont., has accepted a position with Arthur Clarke and is now at work in the Clarke jewelry store. Mr. Lathrop is a watchmaker and a manufacturing jeweler.

COLLEGE EXPERTS ARE COMING

EXTENSION SCHOOL NEXT WEEK

Exhibits will be Shown in Mount Hood Annex Building—Corps of Professors will Deliver Lectures

The Oregon Agricultural College welfare school, will arrive here Tuesday and spend Tuesday and Wednesday in this city. The school lectures, except the civic improvement address by Prof. Peck, which will be given at the Commercial club, will be given in the Mount Hood Annex building.

The O. A. C. extension school on general welfare made up of specialists from the Agricultural College, the State Food and Dairy Commission and the Oregon Social Hygiene society, carrying splendid educative exhibits will be in this city next Tuesday and Wednesday, Sept. 16 and 17. The staff is completing a six weeks' tour of the state and press reports indicate that the seasons have left the various cities strongly impressed with the value of their work.

"It is our purpose to take wholesome, helpful information to the people of the various communities of the state," said Director R. D. Hetzel, of the extension division, in writing of the aim of the school. "We do not pretend to know everything, but we do believe that the college can render valuable assistance to the people of the state if they will cooperate with us and help us get the information to them."

"We are particularly anxious that every person who is interested in better cities, better morals, better homes and better schools, shall look arms with us in this attempt to help solve our many problems."

The lectures and demonstrations by Mrs. Robbins, on subjects relative to the home are proving to be of great interest and practical value to the women of the towns where the work has been offered. The instruction given along these lines is practical and right to the point. For example, the demonstrations on domestic sciences emphasize simple, accurate methods of obtaining attractive desired results in the preparation of white sauce, the making of a batter series from a thin batter to a thick dough, etc. Domestic art subjects such as cutting, fitting and sewing garments, will be treated in a similar way.

Accompanying these demonstrations informal talks or lectures will be given on many problems concerning the home.

The lectures and demonstrations by State Food and Dairy Commissioner Mickle are designed to bring directly to every community the information that will aid materially in the preservation of the public health. In this Prof. H. V. Tartar, of the O. A. C. department of chemistry also assists.

Prof. Peck's lectures on civic improvement and the development of home grounds are of particular value as they are given after a study of local possibilities in his line and are designed to bear upon actual existing conditions.

The subject of social hygiene, which is receiving so much emphasis throughout the country at the present time, is handled by Secretary E. J. Cummins, of the Oregon society. To supplement his lectures he is carrying the exhibit which he has enabled his society to do much effective work in the city of Portland.

Other exhibits to be shown in explanation of the welfare work are those of State Food and Dairy Commissioner Mickle; the State Library Commission and the department of chemistry and home economics of O. A. C.

Local arrangements are in charge of C. N. Ravlin, of the Commercial club. The complete program follows:

Tuesday, September 16

2:30 to 3:30—

Explanation of the work and 15 minute talks on

Home Problems, Mrs. Robbins.

Fundamentals of Food Chemistry, Prof. H. V. Tartar.

3:30 to 5—

Domestic Science and Art—Lecture and Demonstration, Mrs. Robbins.

7:30 to 8:10—

(1) Sex Hygiene—Men's Meeting, E. J. Cummins.

(1) Illustrated Lecture, "Municipal and Town Improvement," A. L. Peck.

Wednesday, September 17

2:30 to 3—

General Session.

Chemistry of Foods, Prof. H. V. Tartar.

3 to 4:30—

Domestic Science and Art—Lecture and Demonstration, Mrs. Robbins.

7:30 to 8:10—

(1) Sex and Health—Fathers' and Sons' Meeting—Boys 15 and over, E. J. Cummins.

8:15—

Lecture and Demonstration—Food Adulteration and Preventatives, J. D. Mickle and Prof. Tartar.

Interesting Exhibits on Display from

(1) Oregon Social Hygiene Society

(2) Oregon Dairy and Food Commission

(3) Domestic Science and Art Department, O. A. C.

(4) Department of Chemistry, O. A. C.

CHEERIONS WILL PARADE TODAY

"The Cheerions" Salem's crack drill team and band will arrive here at four o'clock this afternoon and will spend an hour in the city. An entertainment committee, appointed by the Commercial club and composed of R. W. Kelly, Carl H. Vaughan and Ernest C. Smith, will meet the visitors, and they will be spirited away for a short drive up to the top of the East Side grade, where they may be permitted to get a glimpse of the valley.

On their return the Si Lemites will give their exhibition. Their coming is attracting no small amount of attention, and many of the country people will come in for the event.

"A hundred and thirty-two of the 'Cheerions' will make the Pendleton trip and stop off here.

Rubber Stamp Inks and Pads at this office, also stamp made to order.
