TREIBER CATCHES DEER IN COLOMBIA

Capt. Otis D. Treiber performed the unique feat last Saturday morning of roping a young buck deer in the middle of the channel of the Columbia river, while the animal was trying to swim from the Oregon to the Washington shore. The deer was first sighted by the local ferryman as it came out a short distance from the bank of the big bar north of the city about eight o'clock. At ten o'clock it came into the water, and when about a third of the way across Capt. Treiber slipped in behind it with his launch.

"I was alone," he says, "and let me tell you that I had the time of my life, steering, keeping the animal from getting back to land, and in trying to lasso him. He handled himself in the water like a duck. Several times, as a strong wind blew up the river, the boat went completely over him as I was trying to head him off. After a struggle of an hour, I finally got the rope over his head."

The deer was led to the Washington shore, where it was tied up. It had evidently come down across the O. W. R. & N. track far down the Columbia and had come up the lowlands north of the railroad.
