Importance of Pure Milk

Under our present conditions of civilization the importance of milk is second only to that of air and water. Without milk thousands of children who grow to useful maturity would starve before they completed the first year of their lives. The excellent work done by Dr. George W. Goler, of Rochester, N. Y., proved beyond doubt that thousands of lives are annually lost through the use of impure milk. The reform his praiseworthy and untiring energy brought about in Rochester, by no means a very large city, reduced the mortality among children under 5 years of age from 7,451 for ten years ending in 1896 to 4,965 for the ten years ending in 1906. This shows a saving of 2,486 lives, among which 1,554 or 62.5 per cent were children under 1 year old, that is, had not passed the period of life during which milk forms the most important element of their daily food.

Foust & Merle Increase Force Burglars Get Howe's Salary The doors having been left open on account of the warm night, a burglar, as is supposed, entered the home of George Howe last Thursday night, securing from his pocketbook the sum of \$45, which he had just received as his salary from the postoffice. Mr. Howe worked until late painting signs on the night of the theft. He thinks it probable that the money was taken by someone who knew that he had been paid his salary.

Boosters May Travel by Boat It is proposed by the Salem Commercial club that the commercial bodies of the state charter a steamer next summer to transport the various booster organizations to the Panama Pacific exposition, the vessel to be used as a hotel, or club room, during the stay in San Francisco, and to be so decorated with banners and electric signs as to be a floating advertisement of Oregon
