McMinnville Paper Gives Praise (From McMinnville Telephone-Register.) Burns Jones and family and Mrs. W. E. Shay, all of Hood River, stopped over night at the residence of W. S. Boorman for a visit with their former neighbor, and proceeded next morning by auto to the Tillamook beaches. Mr. Jones had not visited this section before, and expressed himself with the beauty of the country and the apparent possibilities for apple culture, in which he is engaged at Hood River. Speaking of the appearance of growing orchards here, he said he could see no material difference between this section and Hood River, but like all Hood River growers he expressed a mental reservation as to the quality. Hood River people are slow to admit equal quality in fruit grown elsewhere with that of their own, and anyone who has seen their displays at apple shows must admit that their pride is justifiable, as nowhere in Oregon is the growth and marketing of apples so scientifically conducted as at Hood River. All Knights, their families and friends are invited. Mr. Carson has received a letter from Judge W. L. Bradshaw, of The Dalles, who says he will be sure to be present. Judge Bradshaw will deliver an address. The committee in charge of the event consists of J. K. Carson, A. C. Stevens and James Hawthorne. Cutler Bros. Sell to Capacity Cutler Bros. have already this season sold 26 of their grading and sacking machines. The most of the machines have been sold to local growers, but the popularity of them is rapidly spreading to fruit districts of other sections, and Asa B. Growers continue to visit his demonstrations in the Sprout building on Oak street. Bank Letter He would be a brave soul who would attempt to prophesy just what the next few months will bring forth, if indeed his bravery did not carry him into the class that rushes in where angels fear to tread. One who is optimistic, however, does not need to look in vain for bright spots and in order to get a broad comprehensive view of the entire situation, a number of things should be considered. It is true that nothing resembling present conditions has existed since the Napoleonic wars and that the Nations of Europe are seemingly doing their utmost to undo the work of four generations; but even so, our own position is not without hope. In today's news dispatches, the 14th, Secretary of Agriculture Houston is quoted to the effect that European channels of trade cannot long remain closed against our food products and there is every indication that the larger nations will speedily arrange to insure safe delivery of our cargoes. All the news is of course only of relative importance, but it is a fact that if the horrors of war were not uppermost in our minds, the great newspapers of the country would be full of front page articles on our returning prosperity. The recent railroad rate decision, the enormous crops throughout the entire country, the opening of the Panama Canal, the culmination of the new currency legislation by the final organization of the federal reserve board and the elimination of the Mexican menace for the present would furnish material for many columns of right good reading matter. The prompt action of Congress in providing for \$900,000,000 of additional currency in case of emergency was a proper step to safeguard our interests; and all things considered, we are in a splendid form to cope with whatever the immediate future may have in store for us.
