

This is the **Steve Polish** YOU Should Use

It's different from others because more care is taken in the making and the material used are of higher grade.

Black Silk Stove Polish

Makes a brilliant, silvery polish that does not rub off or stain off, and the silvery sheen lasts for a long time. It is the only stove polish that does not contain any lead or arsenic. It is the only stove polish that does not contain any lead or arsenic. It is the only stove polish that does not contain any lead or arsenic.

"A Shine in Every Drop"

At No Time

During wakeful hours do one's trials and tribulations sink into such utter insignificance as when seated at a good meal—provided always that the bread is right.

INSTRUCTIONS GIVEN FOR IRON-SULPHID

Instead of atomic sulphur iron-sulphid is often used for the calyx spray now being applied.

Pathologist Winston, of the local experiment station, gives the following instructions for the preparation of iron-sulphid, the directions, if followed, giving 500 gallons of spray material.

Fill a 50-gallon barrel about two-thirds full of water. Weigh out 10 pounds of iron sulphate (copperas), place in a sack, and suspend in the water. The iron sulphate will dissolve fairly rapidly, and when it is all in solution measure out carefully 24 gallons of commercial lime-sulphur solution testing 33 degrees Baume, or two gallons and three pints of a lime-sulphur solution testing 32 degrees Baume. Slowly pour all but two pints of the lime-sulphur solution into the iron-sulphid solution in the barrel, stirring the mixture vigorously with a hoe or shovel. The addition of the lime-sulphur solution will produce a bulky, black precipitate, and when all but two pints of the lime-sulphur solution has been added the mixture should be allowed to stand for a few minutes, when the black precipitate will begin to settle and a little of the clear liquid at the top can be carefully dipped out with a clean glass cup. This clear liquid will probably show no yellow lime-sulphur color, which means that an excess of lime-sulphur solution has not yet been added. In other words, there is still some iron sulphate in solution, in which case the addition of a drop of lime-sulphur solution to the clear liquid in the glass will produce a black precipitate. This means that more lime-sulphur solution should be added to the stock in the barrel, and about half of the remaining two pints should now be poured in and the contents of the barrel stirred vigorously and allowed to stand. Some of the clear liquid should again be dipped off and tested as before, to determine whether an excess of lime-sulphur solution has been added. If necessary, the addition of small quantities of lime-sulphur solution should be continued until some of the clear liquid dipped from the top, after the contents of the barrel have been well stirred and allowed to settle, shows a pale yellowish lime-sulphur tint. The purpose of using a slight excess of the lime-sulphur solution is to insure all the iron sulphate being utilized. The voluminous black precipitate that is formed consists of iron sulphid, precipitated sulphur, and calcium sulphate. After a slight excess of lime-sulphur solution has been added, the barrel should be filled with water and the contents stirred thoroughly and allowed to stand for several hours. The black iron-sulphid mixture will settle to the lower half or third of the barrel, and the clear liquid should be poured off by carefully and gradually tipping the barrel, without allowing any of the black precipitate to run out. The barrel should again be filled with water, and the contents thoroughly stirred and allowed to stand several hours, and the clear liquid poured off as before. This operation of washing the precipitate should be repeated until the water poured off no longer shows the yellow lime-sulphur tinge. Probably three or more such washings will be required, depending upon how careful the operator has been in using only a slight excess of lime-sulphur solution.

It is evident that the preparation of this stock supply should be commenced two or three days before the spraying is to be done, but when once prepared it may be kept indefinitely. If care is used in weighing out each lot of iron sulphate and if the lime-sulphur solution used is accurately measured there will be no trouble in making up the stock supplies rapidly after the first two or three batches have been prepared, and it will be remembered that each batch is sufficient for making 500 gallons of spray mixture. In order to keep a supply of the stock mixture on hand, several batches should be prepared before the spraying commences, and as rapidly as a barrel is emptied the preparation of a new batch should be started. Iron sulphate is comparatively cheap, and the entire cost of materials for preparing 100 gallons of the midweek spray, when diluted according to the recommendations given in this bulletin, should not exceed 15 or 20 cents.

APPLE NOTES

The reports of the United States Department of Agriculture, giving the conditions of the crops and the estimate of the apple production is often misleading and tends to cause depression of marketing conditions. When one reads the government report, it must be remembered that it takes into consideration all apples in all parts of the country. In reality but 40 or 50 per cent of this fruit is ever harvested or marketed.

According to reports received from U. S. consular representatives in the Orient, Chalmers will purchase small apples a great deal more readily than the large fruit.

According to a report of experts at the Oregon Agricultural College apples should not be fed to laying hens. The acids of the fruit, so beneficial to humans, is said to act destructively on certain ingredients of the egg.

Horace W. Day, of Sgobel & Day, of New York City, has started on a tour of the United States apple districts. Mr. Day is expected to arrive here soon. For 20 years members of this firm have made annual tours of the fruit districts. Mr. Day has been coming to Hood River for a number of years.

"Story Hour" at Lodge

Many Portlanders are traveling in the direction of Mount Hood at this season of the year and several parties of prominent folk have recently been guests of Mr. and Mrs. Horace A. Rogers at their attractive lodge on the side of the mountain. They are planning on entertaining a party of vacationists later in the season and with that view in mind, Mrs. Rogers has started a "story-hour" class for children, which she will conduct twice a week.

During this season of the year the guests enjoy tramping, hunting, fishing and horseback riding, as well as the usual mountain sports. Miss Catlin and a party of her pupils passed their Easter vacation at Mr. Rogers' guests.

Apple Exports

Apple exports for the week ending Saturday, April 10, were 36,295 barrels against 4,066 barrels the same week last year. Total exports for the season up to that time were 2,684,396 barrels against 1,778,453 barrels the same period last year.

CANADIANS OBJECT TO BERRY PACK

The Canadian government has made stringent rulings as to the packing of strawberries this season and will enforce the following law governing the packing of the fruit.

"In any package in which the face or shown surface gives a false representation of the contents of such package; and it shall be considered a false representation when more than 15 per cent of such fruit is substantially smaller in size than, or inferior in grade to, or different in variety from, the face or shown surface of such package."

In such cases the fruit is subject to confiscation.

"We have received such instructions from the chief inspector of the Canadian government," says H. F. Davidson, who will handle the strawberries of the Apple Growers Association. "Therefore it will be very important for our growers to give particular attention to their facing this season. They should see that the berries throughout the box are practically uniform in size. It will not do to face a box with 4x8s and have the remainder composed of 5x6s, for if this is done the dealers will have to suffer, and the fruit will probably be confiscated. A loss will result for our growers on the fruit, as well as the heavy transportation charges to the country. The Canadians have always taken a large share of our berries, and have paid us better prices than we have received in the United States."

D. Johnson, fruit commissioner of Ottawa, has sent out the following letters to the different chief inspectors of the provinces:

"It has come to our notice that large quantities of imported strawberries are being offered on our markets which are very much over faced, constituting a violation of Section 321 (c). I think it would be well for you to ask their cooperation in remedying this condition, suggesting that they bring the provisions of our act to the attention of the shippers.

While I understand that in former years no exception has been taken to this over facing in imported berries, as they did not come into competition with our domestic berries, yet many of the imported berries which I have seen this spring show a flagrant violation of the law, which it is our duty to enforce. As we do not wish to antagonize the trade in any way I wish you would, as requested above, call on them and explain our position in the matter. Possibly this will be all that is necessary, as the overfacing should, of course, be remedied at the shipping end. However, if the dealers are found selling over faced berries after receiving reasonable warning there will be no course open to us except to prosecute for failure to comply with the law in this respect."

Cruising Co. Wants to Make Survey

The Pacific Timber Cruising Co. has made a proposition to the members of the county court, asking for a contract to make a survey of the timber of the county. G. W. Brenner, an expert cruiser, and E. Wiles, a representative of the company, were here last week to attend the meeting addressed by State Tax Commissioner Eaton.

Mr. Wiles says that they told the court that at the present time under the system used much timber was escaping taxation; that the valuation placed on the land would be greatly increased if the survey was made.

Mr. Merchant, a price marker will save you hours of time when marking your goods. Accuracy and neatness are its commendable features. A few cents buys one at this office.

MAN CONFESSES TO INDIANA FORGERIES

A peculiar case was presented at the city jail last week, when a man, known here as I. G. Jones and who was being held on account of complaints against him because of peculiar actions, said to denote dementia, declared to City Marshal Caron that he was not crazy, but that worry over an old crime of forgery, which he confessed, was responsible for his peculiar actions. The man had been living in a rented house in the west part of the city.

Jones, who claims that his real name is Harry C. Apple and that five years ago he forged checks on his father and other residents of Munie, Ind., his old home, asked that a minister be called in to listen with the officer to his confession. Rev. W. B. Young visited the jail and heard the man's story.

BAILEY IS RETAINED BY THE CITY COUNCIL

Harry Bailey has been retained as night watchman on the Heights. Two weeks ago petitions in behalf of Mr. Bailey and others asking that Allen Hart be appointed to the position, were presented to the council. They were referred to the Police committee, the members of which reported Monday evening that according to the city charter it was found that an officer of the city could not be removed without some sufficient reason.

"We have found," stated the committee's report, "that Mr. Bailey has been appointed for a year, and his appointment duly ratified by the council."

The council received at the Monday night meeting two communications offering office rooms for the city officials. J. H. Heilbronner & Co. offered for the sum of \$35 per month the rooms now occupied by Mr. Heilbronner, including vault, basement space and heat and light. Use of a vacant lot at the back of the building was also included. The Oregon-Washington Telephone Co. offered the city office room, the rental of which would be collected by the company—all of this service for the sum of \$60 per month. The communications were referred to the finance committee.

A communication was received asking that Montello avenue between Second street and Park avenue be improved. The matter was referred to the street committee.

BIG CROWD HEARS ORATORIO EMMANUEL

More than fifty people had to be turned away from the Riverside church Sunday evening, when the Hood River Choral Society, under the direction of Rev. A. S. Donat, rendered the Oratorio, Emmanuel. The big church edifice was crowded a half hour before the program began, and standing room was filled. The congregations of the Assembly M. E. church, the United Brethren church, the Unitarian church, the Christian church and the Riverside church participated in the meeting.

The oratorio was well rendered. Every number was sung just as it had been planned, and the big audience left with a feeling of appreciation of the work of the society members and their capable leader, Rev. Donat.

A Cure for Sour Stomach

Mrs. Wm. M. Thompson, of Battle Creek, Mich., writes: "I have been troubled with indigestion, sour stomach and bad breath. After taking two bottles of Chamberlain's Tablets I am well." These tablets are splendid—none, better. For sale by all dealers.

STEVENSON BASEBALL TEAM HERE SUNDAY

The Stevenson baseball team will meet the local aggregation at Columbia Park in the opening game of the season next Sunday afternoon. The game is expected to be a hot one. Both teams have met with success in preliminary encounters. The Stevenson team defeated the White Salmon team at the latter place Sunday by a score of 3 to 2.

The Hood River boys licked Dufur by a score of 10 to 3. The journey to Dufur was made by train to The Dalles and from that place in motor cars.

Hugh Garrahrant is managing the local team this season, and the lads are captained by W. J. A. Baker.

Beginning May 9, the Hood River team will begin a series of games with White Salmon.

The local lineup is as follows: Stockton, pitcher; Carson, catcher; Kent, first base; Baker, second; Hale, third; Pape, short; Heppner, right; Childs, center, and Sexton, left.

Parent-Teacher Association Meeting

We must help! Although the money for the swimming pool is coming splendidly, there are many things to be done. We request Hood River citizens to come to the high school building Thursday evening at 8 o'clock to hear all we have done and to learn how much still needs to be accomplished. Enthusiasm is needed most. One of the world's best operas is to be staged by Mr. Epping and Mrs. Sletton to help raise the money. This needs behind it the support of city and valley. Come with criticism and suggestions. You will hear also a report of the playground apparatus to be installed at Park street school building. The Thursday meeting at the high school is big with the reports of successes and possibilities. Music and refreshments. Committee.

Card of Thanks

We desire to express our sincere thanks to our many friends for the kindness and sympathy shown us in the late illness and funeral of our husband and father, John W. Moore.

We've no quarrel to pick with anyone on the question of the price he pays for his clothing. . . We've no objection to a man paying, say, a hundred dollars for a suit—if he can afford it, nor with paying ten—if he can afford it. Notice we say "if he can afford it" in both cases for it is as extravagant to pay too little as it is to pay too much; in neither case do you get your money's worth.

Stick to the middle trail, the tried and true trail, the trial that is being traveled by thousands of clothes wise men today in

The Wise Housewife Does Spring Cleaning

While we are boosting the proposed clean up week, we also want to call the attention of ranchers and orchardists to the need of our services. As the housewife cleans up so should the rancher take an inventory of his implements, plows and discs. Let us repair those implements and sharpen those discs. You can then start the season with much ginger and get as good results as though they were new.
