STATION REPRESENTATIVES DISCUSS PESTS
Discussing the control of diseases and pests of the orchards of the valley, J. K. Winston, of the experiment station, says: "Because but little scab has appeared in the valley growers are prone not to apply the calyx lime-sulphur spray. This is a mistake. It should be remembered that in 1913 but very little of the scab made its appearance until in June. A good deal of scab has been putting in its appearance in the last few days, and those who are afraid of lime-sulphur should certainly use atomic sulphur rather than nothing. However, the fungicidal and burning qualities of the latter have not been fully determined under Hood River conditions, and people who use it should expect some injury to be on the safe side."

"Since fire blight has appeared in the valley the past few years, growers should be on their guard against it. Fire blight is easily scattered during the period of pollenization by insects. The disease has been found in more or less serious form in the Dufur district."

"We have found that all prepared arsenates of lead offered for sale on the local markets, when combined with lime-sulphur, will discolor the solution. The cause for this is some more discoloration than the powder, but hold in suspension better."

Lekoy Childs says: "In view of the fact that the strawberry industry is an important one in the Hood River valley growers should be on their guard against two serious insect pests, both of them beetles, but neither of which has ever caused any damage here. One of the beetles feeds on both roots and foliage of the plants. One of the beetles is in the form of a grub, appearing as a soft bodied, almost white worm. The smaller beetle feeds in the bloom of the berry, preventing the formation of the berry. Care should be taken in importing plants to watch for these pests, and all packing material and advertising should be removed and destroyed. If either of the pests are suspected, representatives of the experiment station will be glad to answer calls and make investigations."

"We have had frequent inquiries as to the control of the currant maggot. At present no satisfactory solution has been worked out. The soil around the plants should be kept well worked until fruit is ripening. The fly which causes this damage is about the size of the ordinary house fly with brown spotted wings. Owing to the fact that the eggs are laid in the fruit the application of poison to surface will be useless. A sweetened bait, for destruction of adult flies, has been suggested. This should be applied at intervals of three or four days until fruit is ripe. The poison consists of three pounds of sugar, four ounces of arsenate of lead and five gallons of water. The removal of all uncutivated gooseberry and currant bushes will help to keep the pest under control."

ELECTRIC THEATRE
The Electric theatre now operated by Walter Shay and Vern Whitcomb, opened under the new management last Friday evening with an excellent program. A large crowd was in attendance, and it was a pleasure to rest in the renovated building, watching the clear cut, unswerving pictures. Mr. Whitcomb is a good operator, and the Electric reels show the result of his practiced hand. There was a faint odor of new paint in the building, a clear, bright, pleasing smell. Electric fans buzzed, and the new ventilating system pumped fresh air in the room continually.

On Monday and Tuesday the Electric will show the great picture, "The Master Mind," in five reels. The story in brief is as follows:

Pledged to revenge the execution of his brother, whom the district attorney convicted and caused to be electrocuted, Henry Allen, formidable head of a gang of crooks and known as "The Master Mind," educates his cleverest female crook and causes her to seek out and fascinate the district attorney.

"The Master Mind" sends the female crook to Paris, then tells the district attorney that he will avenge the death of his brother. "You will receive the four aces, and when you get the ace of spades, death will be nigh."

"The district attorney falls in love with and marries the crook. The Master Mind manufactures a family for her, from his array of criminals, then sets about to undo the district attorney. He plays on the lawyer's jealousy—finally provoking him into attacking one of his wife's friends. The female crook, tool of the Master Mind, actually falls in love with the district attorney and finally prevails on the Master Mind to forgive and forget. The Master Mind, who also loves the district attorney's wife, relinquishes his desire for revenge and takes his leave—to be seen no more. The family of hardened criminals disappear one by one and everything ends as it should.

At the Electric today will be seen "The Rider of Silhouette," "The Unmasking," and "Almost a Scandal," a Ritchie comedy. Eighteen Esquimaux and 40 Esquimaux dogs, used by Admiral Robert E. Peary in his mad dash to the north pole, will be seen in the former. A two reel Canadian northwest drama, featuring Ben Wilson and Dorothy Phillips in a thrilling tale of the snow covered wastes of the far north.

Tomorrow and Saturday will be seen "Lizies' Dizzie" and "Mary's Duke." In the latter picture, a three reel comedy drama, Mary Fuller, well known and popular with all local movie patrons, plays the leading role. Miss Moore plays opposite her. A soap king's daughter marries a scion of an old Knickerbocker family, while the dual suitor captures mama.
