

## ONE JAR MIS-LABELED CAUSE OF NOISE

According to C. N. Ravlin, of this city, who was chief horticulturist for the Oregon Commission at the Panama-Pacific International Exposition, the recent noise made by the Business Men's Association, of The Dalles, because of an alleged use made of Wasco county fruit at the San Francisco fair by the Willamette Valley, arose over the erroneous labeling of a single jar of processed Bing cherries.

"I discovered the mistake," says Mr. Ravlin, "when we were preparing to return the fruit to the different state points. It was a well known fact, however, that the Willamette Valley made use of Mosier apples. The Willamette people stated that they were unable to secure any of their own fruit and that it was necessary to get the apples from Mosier, this district having the only available stocks."

Mr. Ravlin says that the cherries were exhibited in the Oregon building. All other exhibits from The Dalles, he declares, were properly labeled and placed according to instructions from home. "To complete their display of jars of Tokay grapes," says Mr. Ravlin, "which were placed according to instructions at entrances to the Oregon Palace of Horticulture, I added 35 inch jars of fruit belonging to the Oregon Commission."

Mr. Ravlin thinks that the Wasco county club shows had form in the complaints, since the State Commission added to the display of exhibits belonging to the state. Mr. Ravlin has photographs showing how Wasco county exhibits were placed.

## WEBER'S WORK IS PRAISED BY FELLOWS

W. G. Weber, Sr., who was in Portland last week attending the Northwestern Manufacturers' Convention, of which he is a director, took with him some of his work, in order that he might compare his prices with those charged by other members of the organization. "I found," he says, "that my prices, especially on strap work were lower than any of my associates."

Although the work displayed by Mr. Weber was taken from his stock, it was declared by the harness men to be the nicest and best they had seen turned out of a shop. This speaks volumes for the local man, for the convention was attended by delegates from Montana, Idaho, Washington and Oregon.

While the leather obtainable today is not as good as that of a score of years ago, Mr. Weber is using the best material obtainable, despite high prices.

### Stamps on Deed Cost \$186

The deed, transferring the properties of the Hydro-Electric Co. to the Pacific Power & Light Co., reciting that the purchase price was \$186,000, was filed for recording with County Clerk Kent Shoemaker yesterday. The consideration for the transfer is the largest of any deed filed with the county since the inauguration of the War tax last year, the document having been plastered with \$186 worth of revenue stamps.

The assessed valuation of the property, set by the State Tax Commission for the year, is but \$44,700.

## LOCAL BUICK MAN GIVEN SHOW POINTERS

E. W. Birge, who with J. F. Volsdorf, of the Heights Garage, handles Buick business for this county, has handed us an interesting article that will be of benefit to those who may be in attendance this week at the Portland Automobile Show, which will end Saturday night. The directions are taken from the current Buick Bulletin.

"Any person who has had experience with motor cars will approve the statement that the most important thing to look for in a motor car is the motor," says the writer of the article.

"Nobody who really knows will dispute the statement that the motor contains more possibilities for pleasure and satisfaction and disappointment than any other part of the motor car."

"One of the most important elements of motor car construction is the balance of the various parts. In the good motor car the relation of the parts to each other has a tremendous bearing on the question whether the car is a good one or not. If the motor is too heavy for its supporting structure the car is not a good car. If the rear axle is too light, then the whole car is poorly made."

"There must be a perfect balance between the parts, and many can tell whether that balance is right simply by looking at the car."

"The best guide for the would-be purchaser of a motor car is to make inquiries from users of the car."

"You can't tell all about a motor car from looking at it at the show booth, but you can find out anything you wish to know about it by consulting the men and women who have used it."

"You can tell more about a make of motor cars from their history than you can from their appearance on the show floor at the show."

And in this respect there is one thing about the Buick Valve-in-Head motor car that goes further to prove the superiority of this car than anything we could say, and that is: The fact that a higher percentage of Buick users give repeat orders for Buicks than any other car. When the Buick user gets ready to buy a new car he invariably buys another Buick. The article also explains in detail the essential parts of a motor, its treatment and the extended use it will provide if properly handled. Copies of the bulletin can be had free of charge at the Buick booth.

The company is featuring the Valve-in-Head motor on its various models. The roadsters form a conspicuous part of the display, showing the many improvements made during the last year. The roadsters and touring cars range from \$950 to \$1,485, and the coupes and inside drive sedans from \$1,350 to \$1,875.

### Parent-Teacher Association Meeting

The regular meeting of the Parent-Teacher Association was held at the High School last Thursday evening. A musical program was rendered by Miss Ella Nichols, Miss Dorothy Rand, Mrs. C. O. Huelat and a chorus of girls and boys of the seventh and eighth grades.

M. S. Pitman, of the State Normal College, gave a most interesting talk on "The Factors Which Make up a Model School." There was a splendid attendance and all enjoyed the evening. Parents are urged to be present at these meetings and become better acquainted with the work of the association.

## HIGH SCHOOL NOTES

(By Mark Moe)

The basketball team has at last made their debut, to their own discredit, however. Last Friday Coach Johnson took Capt. Johnson, Lafferty, Breed, Hale, Robbins and Nickelsen to Goldendale. The team didn't arrive there until after nine o'clock in the evening, and without having had anything to eat since breakfast time, were required to walk about a mile and play the basketball game, which they lost 40-10. On Saturday evening the game started off a little different and for the first time the local quintet played the others off their feet, but somehow they couldn't follow up the lead—probably because of a lack of wind, because they were beaten again not quite so bad but 36-18.

Monday morning the letter men of the past football season held a meeting and elected Leon Bentley captain for the 1916 season. The past year he won his letter while holding down the difficult berth of end. It is being rumored that he will try out for the quarterback next year, but there is no known authority for this. He weighs 140 pounds and is rather fast on his feet, which is very good for a high school team.

M. S. Pitman, representing the State Normal School at Monmouth, visited the school last Friday and delivered a very interesting lecture on "What Can I do?" He is undoubtedly the most enthusiastic and interesting speaker that has visited the school this year, and when he tours the state again as he is doing at present, his visit will be most heartily welcomed.

The new students that have entered school this last semester are Dayton McLucas, Robert Henderson and Kenneth Hicks. It has been reported that Hicks is a good pitcher, and for this reason his coming to the school will be regretted by no one, to say the least.

The second basketball team organized Monday and elected Floyd Wright captain. They have scheduled a few games already and expect to play this season teams at Ode, Mosier, Cascade Locks and White Salmon beside the regular high school variety. Tomorrow both the boys' and girls' teams go to Stevenson, Wash. This is the girls' only game. At least it is the only game that Manager Betty Esping has been able to secure. Capt. Vera Lafferty was a star player last year, and it is rather a shame that she will not have a chance to gain more glory in her last year in high school.

The freshmen class entertained the sophomores in a party given at Library hall last Saturday night. Everyone present reported a very enjoyable time.

A student body meeting was held Tuesday morning, which was in accordance with the by-laws of the constitution, and the Literary Society officers were elected for the ensuing semester. Miss Mae Shay was elected president, Paul Lancaster, secretary and Lester Fisher, manager.

Mrs. Chas. Castner, president of the Oregon Federation of Women's Clubs, visited the school Tuesday morning and delivered a short but interesting address on the Scholarship Loan Fund Day.

Work is progressing splendidly on the operaetta. Each member of the caste is now earnestly studying his or her part, and altogether things look bright. It is a pleasure to hear of Dr. Samuel McChord Crothers, of Cambridge, Mass., will visit Hood River on February 11 and Supt. McLaughlin urges all high school students to attend his lecture. It is a rare occasion for the students to hear a man of his type. He is the author of the humorous and imaginative story, "Miss Muffet's Christmas Party," which is well known to the juvenile readers. Lastly, his message may help to bring the paltry sum of 35 cents.

The next Parent-Teacher Association meeting will be Thursday, Feb. 24.

## GILBERT & DEWITT READY FOR SPRING

Gilbert & DeWitt, whose place of business is in the Nickelsen block on Cascade avenue, are making ready for the spring, when the Columbia river highway will be opened. The office has been removed from the front of the building to the rear, and trussing has been placed under the main floor, thus strengthening it, which will have a storage capacity of 20 cars. When the company has always carried a full line of accessories, which will be continued in stock, the storage of cars will be an innovation. The entrance has been widened, and a driveway directly into the building provided.

The company has ordered four Overlands, for which they are local agents. The shipment, which will consist of three Model 88s, 35 horse power, and one Model 75, will arrive about February 15. Gilbert & DeWitt are now showing a complete line of sprayers, having on display five different sized machines.

## APPLE NOTES

The Dufur Orchard Co.-Owners company is the name of the new organization which has been formed by the Dufur Orchard company of that city, and which will prove to be of great benefit to the various owners of tracts in the 800-acre orchard 10 miles from The Dalles.

The entire orchard, 4000 acres of which has been planted to trees, will be under one management.

## BIRTHS

Born-To Mr. and Mrs. C. D. Mowers, on Tuesday, January 18, a daughter.

Born-To Mr. and Mrs. M. O. Boe, of Parkdale, at the Cottage hospital Friday evening, January 21, a son.

### Card of Thanks

We wish to express our sincere thanks to our friends, comrades of the Grand Army and members of the Eastern Star for their aid and sympathy during the late illness and death of our beloved wife and mother, Mary A. Buck.

A. C. Buck,  
Nettie M. Buck,  
Sherman E. Buck.

### Warning

I hereby warn all citizens that City Ordinance No. 356, which provides that the city, in case of delinquencies of property owners, shall clean snow from sidewalks, assessing the cost to abutting property, will be rigidly enforced. Take due notice and conduct yourselves accordingly.

J. K. Carson, city marshal.

## RUBBER STAMPS Rubber Stamp Ink at Glacier Office

## RIFLE CLUB LIST IS STILL GROWING

The list of charter members of the proposed Hood River Rifle club continues to grow. F. G. Patterson, of the East Side, who was a charter member of the Mosier club, is busy in the organization of the local men. The United States war department will furnish to every five members of the proposed club a carbine, and 120 rounds of shells will be distributed annually to each man. Targets will be furnished. Furthermore all makers of ammunition will furnish the club with supplies at factory prices. Any one between the ages of 16 and 45 years may become members of the organization, the annual dues of which are 50 cents.

### FINS, FURS AND FEATHERS

(During the course of the season local people and their visitors, while on fishing excursions and when hunting in the mountains, have many interesting experiences. The Glacier will be very glad to have fishermen and hunters give an account of their experiences to this column. If you have a story to tell, or a story or a good joke, report it.)

The call of the wilderness has captivated George and Charles Stanton, sons of D. E. Stanton, a local Civil War veteran, who recently removed from the Upper Valley to engage in gardening and truck growing on property within the city limits. The former son, who has a homestead in Lake county, spends the winters trapping and hunting coyotes. Since winter has begun he has, according to a letter written his father, bagged 90 coyotes and more than 30 bobcats. The sale of the pelts of these animals, together with the bounties received on them and returning from other furs, will net the young man a large sum.

Charles Stanton, who resided for a time in Portland, has made trapping a profession. He is near Clayton, Ida., in the Saw Tooth mountains. Catching a black fox occasionally and muskrats by the hundreds, he will probably more than double the profits of his brother for the season.

Watching 7,000,000 young salmon fry during the extreme cold weather recently was the task of men at the United States Government Salmon hatchery at Hood, Wash. The little fish were brought through the cold in good condition, according to Aaron Larson, a member of the hatchery force who was in the city last week.

The Hood hatchery has already distributed 22,000,000 salmon fry this season.

There was real sorrow in the home of Mr. and Mrs. J. E. Robertson last week, when "Ted," the black cocker spaniel pup, after a short illness from influenza, passed away. "Ted," the playmate of Mrs. Robertson's two boys and little girl, was sadly missed. The grief of childhood over a dead canine playmate! It is one of the bitter things of life. But few grown ups will fail to sympathize with the Robertson youngsters in their grief over the death of "Ted."

"Sonny," the black cocker belonging to A. J. Derby's children, also passed away last week. "Sonny" and "Ted" were full brothers. Both were taken to the Slutz canine hospital on the Heights, but no aid could benefit them. "Sonny" and "Ted" are now chasing rabbits in dog heaven.

**Dr. Vaughn Honored**  
Dr. J. M. Vaughn last week was honored by election to the first vice presidency of the Portland Eye, Ear and Nose society.

## SOLUBLE SULPHUR

(COMPOUND)

You Sprayed For Scale Last Season.  
And Yet You Failed. Why?

DON'T BLAME THE SPRAY. You can't buy any spray today under U. S. laws unless it is good for what it claims for it. For the constructive years SOLUBLE SULPHUR has shown 90% to 95% effective by experiment station tests. What a spray will do after it will be again. Three times over in one series of tests, say nothing of the years of success the country over with thousands of tons used, should convince any intelligent man that the spray is right.

IT IS RIGHT. IT DOES THE WORK.  
SEND FOR OUR 1916 SPRAY BULLETIN. It tells everything worth while about SCALE AND SCAB. Write for Prices. Ask your dealer.
