CARRIES HARP
VALUED \$1,000

Harp Soloist Carries Valuable Instrument.

Elizabeth de Barrie Gill, harpist entertainer, is one of the Chautauqua's most unique offerings, intuitively presenting, as she does, a splendid vocal and instrumental concert, delightfully interspersed and combined with delectable character stories and impersonations.

Mrs. Gill is wonderfully proficient on the harp, and the \$1,000 gold instrument which she plays is a masterpiece.

MRS. GILL.

piece of workmanship, of a vibrant lyric depth and tone resonance of surpassing power and sweetness. Mrs. Gill has a rich contralto voice and, singing to her own accompaniment on the harp, affords an ideal combination. She features English, Irish, Scotch and negro folk songs, which the crooning murmur of the instrument proves most effective.

In a generous repertoire of harp solos especially pleasing on the great lyre, such as the old plantation melodies and "The Miserere" from "Il Trovatore," Mrs. Gill's rendition of "The Rosary" is a distinct accomplishment. In this number she demonstrates the supreme rank of the harp as a musical instrument when played by an artist.

FINS, FURS AND FEATHERS

The Mountaineer's Complaint

"I went out 'hunting,'" said the old time mountaineer.

"I was skulking through the brush, a looking for a deer

When "zip!" kind o' funny, almost took my breath,

I could smell the gol-durn nitro on that bullet when it passed.

"Another fellow suit, and two more out the fog."

"They were getting so darn numerous I dropped behind a log.

Number five plunked beneath and sorter raised my hair.

I felt the necessity of laying on the air."

"'Twas a low-power fool with a high-power gun, from the city office block,

That almost trimmed my whiskers and gave my nerves a shock,

There ought to be a bounty or a life term in the pen

For things that go out hunting and instead of game shoot men."

—O. M. DeWitt.

Thorough tests of devices to prevent fish from entering irrigation ditches are to be made by forest service officers, who say that thousands of the trout placed in western streams by the government are killed through being carried into the ditches and washed out on the fields. There are not less than 1,200 irrigation projects on or near the national forests, and in many places the loss of trout is very heavy. The amount of water used in irrigation, it is said, often determines the advisability of artificially stocking the streams.

A number of devices for screening the ditches are in use, and while two or three have been found to be fairly effective, most of them are said to be unsatisfactory. It is asserted that this subject presents an excellent opportunity for inventors, since a successful screen will be sure to be widely used. Under present conditions officials are slow to recommend that the trout be placed in streams where they are apt to be led off into the irrigation ditches.

R. M. Hunt killed a large rattlesnake in the city limits on the Serpentine road Monday afternoon. The snake, probably the last of his kind in this vicinity, had 10 rattles and a button.

Mr. Hunt was catching his horse, tethered beside the road which winds up the Columbia canyon side just south of the business section of the city. Thinking the rattler a stick across his path he was just in the act of stepping over it when the snake coiled and began rattling. Mr. Hunt jumped to safety and dispatched the serpent with a stick. The horse became frightened by the rattling and ran away.

HEIGHTS NEWS

Mr. Lindsey, a valley rancher, came very near having a serious accident Saturday. As he was turning his horse in front of K. C. Bucklin's blacksmith shop he turned too short, breaking the buggy and pitching him forward onto the ground, hurting his head and arm. As he had a gentle horse he was not seriously hurt, as might easily have happened with a wild horse.
