Birthdays Mean Gifts

Why not Make Your Birthday Gift in 1916 something that will endure and serve as a reminder of this particular anniversary year?—

A Dainty Lavallier, the Birthstone in a Handsome Setting or a Fine Bit of Silver make charming gifts.

The name "LARAWAY" on your gift is in itself evidence of your thoughtfulness and is positive assurance of the quality, distinction and worthiness of the gift. We will appreciate your valued inspection.

W. F. LARAWAY
Jeweler

It is high time you were thinking, Mr. Orchardists, of the condition of your wagon. It wants to be at its best when you begin to haul your apple crop.

REMEMBER, too, that we make the best apple racks obtainable. And you will want a nailing press. Hood River Box Nailing Press has been found the best by test in orchard communities all over the globe.

THE GOOD JUDGE FINDS MOST MEN KNOW WHY THEY USE W-B CUT TOBACCO

SEE YOU GENTLEMAN, I USE W-B CUT TOBACCO MAY I ASK WHY?
IT'S QUALITY! TOBACCO CUT FINE AND SEASONED WITH SALT, SO A LITTLE CHEW SATISFIES.
YES, AND A MAN DOESN'T HAVE TO GRIND AND SPIT LIKE THOSE WHO USE ORDINARY TOBACCO.

YOU can't hide the truth—that's why men who use W-B CUT Chewing know what quality tobacco is. A small chew of the real tobacco tucked away in the cheek gives men the tobacco satisfaction they want.

A gentleman's chew—it cuts down grinding and spitting and there's no unwieldy way to roll around in your mouth or to plug out the cheek. Give W-B CUT Chewing the quality test and learn what tobacco satisfaction is.

Made by WEYMAN-BRUTON COMPANY, 50 Union Square, New York City

OREGON COMMENT ON BILLY SUNDAY

(From the Oregonian)
Billy Sunday is an extraordinary man, with an extraordinary delivery of a real message. It does not explain Billy Sunday to say that there is a specialist in vulgarity and that there is a streak of the vulgar in most human beings. You can hear vulgarity in any brother, and you avoid it. Sunday does it shed any light on the man's strange drawing powers to say that he has introduced vaudeville into the pulpit. There are other preachers about whom the orator of the southwest and the animal cage preachers, and they get more than passing notice. Nor can it be said that the man has a crude and rough as it is, it makes an irresistible appeal. There are men who have greater gifts of speech than face every Sunday nearly empty pews. Yet Sunday is a great preacher. It cannot be his spirituality, for he does not pretend to have any, in the sense of a refined and prevailing grace. He is not a great actor, though a good one; nor a great interpreter of religious life and experience; nor even a great teacher and exemplar of morals.

Sunday is more or less of an enigma. Perhaps it is his reserve that attracts someone to Sunday is in the grandstand and in the bleachers. He is expected to make a home run, and, unlike Casey, he never strikes out. Sunday goes into the ring and tackles the Devil with his bare hands. It is a great fight, and the crowd loves it. Sunday ascends to the trapeze, near the highest pinnacle of the circus tent, and thrills and amazes old and young alike by the skill, rapidity and boldness of his verbal and physical acrobatics. Sunday puts a round, smooth stone in his sling and goes forth before the assembled multitudes and overthrows the Rum Goliath. Always Sunday makes a base hit, or knocks out his heavy weight antagonist, or hits the bull's eye. Regularly the performance is repeated, and there are no disappointments, no delayed game, no rain-checks.

CHAPMAN URGES BIGGER AUTO LICENSE

D. H. Drewery, chairman of the automobile committee of the Commercial club has received from G. C. Chapman a resolution in endorsement of a proposed bill to be submitted to the next legislature providing for an increase in motor car licenses. Communicating with the Glacier Mr. Drewery says:

"There is certainly a lot of merit to a resolution of this kind, and the writer would be very much pleased and appreciate it if you would give the matter such publicity as you deem advisable."
The Chapman resolution follows: "Whereas, the wear on Oregon roads is caused principally by automobile traffic, and
"Whereas, the improvement of through highways is of direct benefit to automobile owners, in saving time and other expense, and
"Whereas, automobile owners as a class are liberally disposed toward road improvement and will endure an increase of auto license fees if the proceeds are to be expended by the state for permanent improvement of through roads, therefore, be it
"Resolved, that we recommend to the 1917 general assembly of the state of Oregon the enactment of such legislation as will bring an increased revenue from automobile license fees, same to be the basis for providing interest and sinking fund payments for bond issues for permanent highway improvement by the state."

PAVING COMPLETE IN MULTNOMAH COUNTY

The paving of the Columbia River highway in Multnomah county has been brought to completion and the road was thrown open to traffic Saturday. As a result more automobiles than have been seen in Hood River in a single former week end, were here Sunday. The old stretches of plank and dirt road are gone and the new hardwearing extends for 26.73 miles east of Troutdale.

The highway has been a little more than three years in construction. It was conceived in June, 1913. The highway proper has cost \$1,200,000, a little more than \$48,000 a mile. There are more than 40 viaducts and bridges on the scenic highway.

1916 HOLDS RECORD FOR FREAK WEATHER

The year 1916 will be long remembered in Hood River for the freak weather that has prevailed here since New Years. Following a record snowfall of more than seven feet in the aggregate, the months of May and June were marked for their unprecedented rainfall. While the normal rainfall for the month of July is but a trace, over an inch of precipitation prevailed the past July. One of the heaviest August rainfall in history prevailed Monday night of last week and a light precipitation also continued throughout Tuesday.

Serr Plans Tent City

Planning on the influx of motoring tourists next year, Henry Serr, proprietor of the Hotel Oregon, says he will operate an auxiliary tent city in a large grove about a mile and a half from town.
"I have already placed an order for two automobiles," says Mr. Serr, "and those of my guests who prefer to live in the open air will be transported as they desire to the woodland tents. The sleeping quarters will be equipped as comfortably as possible, and arrangements will be made to serve breakfast in rustic quarters in the grove.
On several week ends this summer the accommodations of local hotels have been inadequate for the large number of touring automobilists.

C. N. CLARKE HAS HANDSOME FOUNTAIN

The Glacier Pharmacy, of Chas. N. Clarke in the Smith building, has been much improved in appearance by the installation of the new Liquid soda fountain. The mahogany and marble work of the new fountain set the store room off tastily.
The new fountain was put into commission last Saturday and has already attracted the attention of many. The new installation is equipped with all-glass syrup and drink containers. The metal parts of the fountain are of German silver, a material that does not tarnish and can be easily cleaned. Mr. Clarke has put into use the new sanitary service, serving drinks and ice cream confections in sanitary waxed paper containers.
Henry Haas is the efficient drink mixer at the Glacier Pharmacy's new fountain.

GEOLOGISTS REFUTE SMOKE STORIES

Recent stories to the effect that smoke has been seen issuing from the old crater of Mount Hood are absolutely without foundation, according to an unofficial report of a party of government geologists, who Saturday hiked from the Upper Valley to Lost Lake, where they will make a study of geological formations. After spending several days making observations on the base of Mount Hood and in the very crater itself, the geologists, ten of whom are in the party, investigated the huge mass of lava beds just west of Parkdale and tested the flow of water from the large glacial springs that bubble from the foot of the lava formations.
"The geologists will spend several days in the Lost Lake country," says C. E. Compton, the Flat rancher, whose place they visited en route to the lake. The men will also visit the ice and lava caves in the region around Trout Lake in northwestern Klickitat county, Wash.

NOT ENOUGH FOR GROWER

Too Many Hands Increase Cost

CLOG DISTRIBUTION

The great cry today is for less selling charges by the establishment of more direct contact with the consumers. Growers in different parts of the Northwest have learned that apples upon which they net fifty or seventy-five cents, sell at retail for over three dollars. When you consider that most of the apples are sold by the associations and shipping organizations either to or through a few firms of large receiving jobbers, who sell to smaller jobbers, who in turn supply retailers, who finally sell to the consumers, the fact that the growers only receive a small portion of the final prices does not appear inexplicable.

Consumption Is Curtailed

Many of the growers overlook what is of greater importance than the subtraction of the high selling charges—namely the decreased demand for the apples of the Northwest because of the high prices which must be paid for them. In order to market at a profit the apples of the Northwest, it is necessary for a wider and more direct outlet to be developed than that afforded by the few jobbers' stores in each large city, which now handle box-apples from the Northwest.

In full crop years, hundreds of cars of apples are either tramped around the country or held in cold storage too long while the shipper seeks buyers. Finally in a defective condition many of these are dumped upon the auction because no buyers at private sale are to be found for them after they have lost quality. These cars, if they are fed to the auctions systematically in the largest cities of the country will bring returns written in black instead of red ink.

Apple Shippers Misuse Auctions.

The apple shippers use the great clearing houses as places of last resort for defective goods, while the Californians and Floridians, Cubans, Porto Ricans, Sicilians and Spaniards place their fanciest fruits upon the auction markets of Boston, Philadelphia, New Orleans, Cincinnati, Cleveland, Buffalo, Kansas City, Pittsburgh and like cities. Wholesalers, retailers and brokers come to the auctions for their regular daily supplies of all these other fruits.

If apples were supplied the auctions in the same manner the large selling charges of the big receiving jobber could be evaded. Also, the hundreds of little jobbers who buy in less than carload quantities could get their supplies direct.

Western Union Man Has Thrilling Ride

After closing his office one night last week, Erwin Scheffeld, manager of the Western Union office, decided to take a short tour on a Cleveland motorcycle for which he and Floyd Gibbs had just taken the agency. Mounting the new machine he sped away. But the ride was of greater duration than Mr. Scheffeld had contemplated. He learned almost immediately that, although he had learned how to manipulate the starting apparatus, he had failed to comprehend the methods needed to bring the mechanical steed to a halt.
Up hill and down hill Mr. Scheffeld sped for a couple of hours. He finally succeeded in attracting the attention of a fellow motorcyclist, who mounting his own machine rode beside the amateur and instructed him in the means of stopping the runaway cycle.

DUFUR PAPER SCENTS PREPAREDNESS WORK

In the recent work of the United States Geodetic survey, the Dufur Dispatch scents work of preparedness, commenting on the activities of a crew of engineers, who recently passed through Hood River in two big automobile trucks, the Dispatch says:
A few weeks ago a party of United States geodetic surveyors were in this vicinity and spent several days in and near Dufur. They spent some time at Mount Lookout and at different points in the neighborhood, taking altitudes, making observations, etc. They were very reticent about their object in coming here and in spending the time they did in this vicinity, but let the impression go out that they were connected with the forest fire protection and were establishing observation and signaling points for use by that department. But there are those who discredit this story, or information.

On Mount Lookout there has been for some years a signal post or "look-out" for use in the forest fire protection. But at this station the geodetic surveyors on their recent trip put in a heliograph, or an instrument for flashing signals by means of an electric plant falling on mirrors. Also a light for flashing signals at night. At Mount St. Helens another signal station has been established and the signals between these two points can be plainly seen, both by day and night, and messages sent from one point by means of the Morse code can be plainly read at the other. Many other signal stations have been established up and down the coast, so that a regular chain of signal communication can be carried out. It was also found out that the government has a chain of signals entirely across the continent so that, if necessary, the communication between the Atlantic and Pacific can be carried on by means of these stations.

It also leaked out from some of the employes of the recent survey that it is the intention in time to place a power plant in Hood river, near Mount Lookout and establish an electric plant to furnish light for signaling purposes. Many are of the opinion that this is part of the preparedness program which the government is very much interested in at present, and it seems feasible.

Apple Crop Lighter

A summary of the August crop report for the state of Oregon and for the United States, as compiled by the Bureau of Crop Estimates (and transmitted through the Weather Bureau,) U. S. Department of Agriculture, is as follows:
State: August 1 forecast, 1,210,000 barrels; production last year, (final estimate,) 1,043,000 barrels.
United States: August 1 forecast, 71,600,000 barrels; production last year, (final estimate,) 76,670,000 barrels.

RHEUMATISM ARRESTED

Many people suffer the tortures of lame muscles and stiffened joints because of impurities in the blood, and each succeeding attack seems more acute until rheumatism has invaded the whole system. To arrest rheumatism it is quite as important to improve your general health as to purify your blood, and the cod liver oil in Scott's Emulsion is nature's greatest maker, while its medicinal nourishment strengthens the organs to expel the impurities and rebuild your strength.
Scott's Emulsion is helping thousands every day who could not find other relief. Refuse the alcoholic substitutes.

Uniting Learning and Labor THE OREGON AGRICULTURAL COLLEGE

In its Six Schools and Forty-eight Departments is engaged in the great work of uniting Learning and Labor.
Forty-eighth School Year Opens SEPTEMBER 18, 1916.

Degree Courses requiring a four-year high school preparation, are offered in the following:
AGRICULTURE, 16 Departments; COMMERCE, 4 Departments; ENGINEERING, 6 Departments; MINES, 3 Departments; FORESTRY, 2 Departments; HOME ECONOMICS, 4 Departments; and PHARMACY.
Vocational Courses requiring an Eighth Grade preparation for entrance are offered in Agriculture, Dairying, Commerce, Forestry, Home Makers, and Mechanic Arts. Pharmacy with a two-year high school entrance requirement.
SCHOOL OF MUSIC.—Piano, String, Band and Voice Culture.
Catalogue and beautiful illustrated booklet free.
