Members of every family should study the instructions sent out by departments of the government and tearn how they may work toward the success of general plans. We have seen the beginning of the campaign of the Oregon-Washington Railway Co. and the Oregon Agricultural College, Conservation and proper distribution of food products is one of the big features of the great movement for preparing America to cope with whatever contingencies may arise.

We of Hood River form but a small fraction of the great mass of American people, but let us begin now to make of ourselves an exemplary fraction, a fraction willing to work in coordination with every government plan for the welfare of the nation. Let us go about our work deliberately for accomplishments in times of such stress are more convincing than hysterical words.

Periods of great crisis seem to turn the minds of men and women into Max Linder, in "Max Comes channels of serious thought, and it is evident that serious thought leads to contemplation of religion." Additions to churches of America in the past year were greater than any other year in the history of the nation, we are told by statisticians. More than 40,-000,000 church members are enrolled in America. Such a feeling seemed [to be evidenced last Sunday in Hood River. We do not think local church attendance was ever greater than on Easter Sunday.

The above chart, compiled on our seventeenth anniversary, furnishes convincing evidence that Hood River Valley is safely through the unfortunate period of inflation which reached its climax in 1911. The 1917 figures are almost up to the 1911 mark, but this time there is no inflation and our deposits represent the earnings and savings of our customers and indicates the strongest financial position the community has ever held.
