CANNY DOCTOR PUMPS FRIEND AND PROFITS

San Francisco Physician Lets Patients Pay Him in Bonds Rather Than Cash at Par

This reads or tastes or looks like the foam of a press agent's brew. But it isn't. It actually happened although it is propaganda.

There is a physician and surgeon of high professional standing in San Francisco who, if he wasn't Irish, would be Scotch. He is that canny.

The other day he met a friend of his, a stock and bond expert "Doc," as his friends call him, to always look for information. He pumps everybody and they like him for it. So the bond man wasn't a bit surprised when "Doc" shot this at him:

"How about the next Liberty Loan—'It's going to get over'?"

"It sure will," replied the bondman. "It's going to be the last and the best of the Liberty Loans."

"Advise me to load up," persisted "Doc."

"I sure do—best security in the world—year from now it will be worth half again as much as you pay."

"Well, I figured it out that way myself," confessed the physician. "Of course I was going to buy anyway, but I think I'll strain everything a bit and really load up."

"Suppose you've got previous issues?" asked the bondman.

"Sure, and what's more I'm still piling those Liberty bonds up. Every time a patient offers them in payment I grab them. They look good to me."

"You're a wise guy—hang onto them. Doc. I've got a few myself. Gotta date with the wife—so long."

HALF BILLION SAVED ON AIRCRAFT BILL

Half a billion dollars was saved by the War Department up to April 1st by cancellation of aircraft contracts. These contracts, according to the government statement, are only a small part of the savings which has been made by abandonment of contracts for war material. In spite of these savings, the statement adds, material costing millions of dollars will have to be paid for largely through money to be raised in the Victory Loan.

VICTORY LOAN TEST OF PATRIOTISM—Wood

Major General Leonard Wood, who at Camp Funston trained two divisions of Americans for overseas service, has asked the American people to support the Fifth Loan.

"We have carried the war on successfully so far and we must see it through. The Fifth Loan, coming as it does after the armistice, will be a more severe test than the others of the patriotism of our people. It is just as important as any loan we have made, and it should be carried through just as vigorously as the others. It is no time now to let up on our efforts. Reorganization is even more difficult and almost as important as the period of preparation. Put it over, and good luck. We must have it."

THE PEOPLE WILL PAY

Regardless of what our feelings may be as to the management of the war, our honor as a nation is pledged to the payment of the bills for the war. No man who holds his own reputation for business integrity above reproach doubts that. He would scrupulously pay his own debts and the debts of his country are a very definite part of his own obligations.

The government has contracted certain debts. It has come to the people for the money with which to satisfy these obligations. Through statements of its highest officials it has repeatedly made clear to all that it expects to secure this money not from the banks or the great financial institutions, but through the whole hearted support of the great majority of its citizens.

It will be a higher type of patriotism that will be called to the test during the coming days than responded to the former appeals of the government. Aside from a few technicalities the war is over. The fifth loan will be raised without the spur of hostilities because the American people are capable of reaching greater heights of patriotism than they have yet climbed.

FRUIT INSPECTION LAW CRITICISED

Complaints are directed by orchardists against the existing law that requires nursery stock, ornamental trees and perishable plants to remain at express offices for 72 hours before they can be removed by the consignees. The law presumably specifies the comparatively long period in order that the fruit inspector may have an opportunity to pass on the shipments. Frequently the fruit inspector has no deputies and in case he is out of town the plants must remain at the express office.

Geordan G. Brown received a shipment of valuable strawberry plants Tuesday. With Fruit Inspector Stanton out of town he was forced to leave the perishable plants at the office of the express company the legally stipulated time.

"Of course, it may be well to allow the inspector a reasonable time to reach the office and pass on the plants," says Mr. Brown, "but I cannot see where any good purpose is effected in providing that they remain there for three days. If they are affected by disease the pests will be just as bad after the longer period as before. The evil of the law would be ameliorated if the county fruit inspector were required to have a deputy available near express offices."

JOHN M. MILLER IN NOTABLE FLIGHT

John Matthew Miller, former high school boy and nephew of Bishop R. L. Paddock, recently made a remarkable record in piloting an aeroplane of the United States mail service from Philadelphia to New York city in a driving blizzard. News of the feat has come to Mrs. F. G. Hutchinson, in a letter from the young man, who at the time of the notable flight was an ensign in the navy. Flyers from other points, bound for New York in mail planes were turned back by the storm. Mr. Miller has earned a promotion as a result of the flight. Mrs. Hutchinson, who is his aunt, has learned.
