ONE OF THE PIONEERS

Last Thursday the Hood River Glacier celebrated its 20th birthday. It is the oldest existing business institution of the valley of apples.

The glacier considers itself a pioneer, and for that reason we always like to print stories dealing with reminiscences of days when the fruit industry was young.

The glacier was established as a result of ideas of Geo. T. Prather, who as publisher issued the first few copies. The late John H. Cradlebaugh, one of Oregon's most beloved newspaper men, who died last winter in Salem, was its first editor.

Mr. Cradlebaugh and Mr. Blythe established the Hood River glacier in the hearts of Hood River people. And naturally, because they had expended a large share of their lives' efforts on it, they never lost interest in the paper.

AN APPEAL

Hood River will need some 50 men the coming year to keep the Boy Scout movement progressing here. There is no question but that the desired number of men is going to be secured.

FIX THE BRAKES

While fortunately no serious damage has resulted and no passengers have been injured, motorists traveling over the old grade between here and Mosier the past week report numerous accidents caused by defective brakes.

DONT FORGET

Please do not forget those letters sent out the first of the week by the Elk's Salvation Army committee. We are sure that you will respond liberally and at once, unless you do not happen to forget.

A coroner's jury at the Dalles last week found that a young man had met death in an automobile accident, the machine driven by an intoxicated companion.

Franzes Hastening Along

E. A. Franz, who with his wife left last Thursday for a tour to his old home at Dolgeville, N. Y., has arrived at Yellowstone Park. In a message to his son, Earl Franz, he declares that he and Mrs. Franz are progressing without trouble.

A paved channel for ferryboats? You can't beat Hood River. Just think, all of the carp and bass from Astoria to Umatilla, accompanied by their wives and sweethearts will come here for a promenade.

Let's follow the suggestions of the assistant fire marshal and have that survey made. And let's lose no time about it. Until steps are taken, our property is in danger.

Lieutenant Commander Read has become the modern Columbus. Ruth Law proposes a flight across the Atlantic. Soon we are to have a 1919 Columbia.

That literary gem of an Irish section boss, "Off agin, on agin, gone agin, Finnegan," is recalled by the vacillation of plans over the closing of stores for today.

If they have journeyed into Portland on all other roads like the continuous stream of motorists over the Columbia Highway, we wonder, indeed, what they are doing with all the guests.

The gourmet accustomed to devouring strawberries in great quantities in June may empty his pocketbook in filling his stomach this year.

Snows are still deep in the forested areas. This indicates postponed forest fires. Let us hope we escape them this season.

Let us hope the weather gets down to a summertime basis before the Fourth.

Did somebody say an election was held last week?

ROAD MAN GETS HIMSELF IN POCKET

A recent experience of D. C. Huffley, in charge of a shoving crew of the Kern Construction Co., engaged in building the Hood River-Mosier link of the Columbia Highway, indicates the difficulties met with by the advance men because of the topography of the country crossed by the right of way.

And then the slashing boss started back to camp. But he discovered that he was trapped. He had made some drops of greater distance than he had suspected, and it was impossible to jump the same distance back from the hill.

An advance steam shovel, opening the right of way as fast as it can be moved eastward, has reached the halfway point, a distance of about three miles, between here and Mosier. Two other shovels follow cleaning up the new gorge-side grade.

WHAT OUR DEFENDERS COST

At Home It is \$327 and Overseas \$423 a Year for Each Man in the Service.

Statistics have been collected by the clothing and equipment, subsistence, conservation, reclamation and land-warfare and metals division of the quartermasters' corps, United States army, to indicate just what it costs a year to maintain a soldier overseas and in the United States.

Those according to the Army and Navy Journal, show that the cost is \$423.47 a year to equip and maintain a soldier overseas and \$327.78 to equip and maintain one in the United States.

This it appears that if the soldier going overseas did not take with him a great deal of his equipment already supplied in the United States the contrast between the cost of equipping and maintaining a soldier in this country and abroad would be much more marked.

The amount of reclamation of each individual soldier's equipment in this country is \$75.80 a year, while the amount of reclamation of similar material abroad is but \$33.31.

QUESTIONNAIRE

ANSWERS WHICH WILL SOLVE PERPLEXING PROBLEMS OF THIS RECONSTRUCTION ERA.

Query—The government has launched an educational campaign to encourage building in order to put more men to work. Would not a similar movement to show how the old structures can be best and most economically repaired and made good as new also help?

Answer—It is learned that such a plan is in effect and is linked directly with the Washington propaganda.

Industry must be turned back from works of war to the ways of peace. Employment must be found, in the meanwhile, for those whose occupation has been interrupted. There is no real surplus of labor in the United States.

Government restrictions, imposed by the necessities of the war program, have for many months past retarded or altogether prevented construction, improvement and repairs. These restrictions are now off, and there is scarcely a town, a city, a factory, a dwelling or a farm that does not reveal a crying need for prompt attention.

That is not logical. No matter what it costs to repair, the cost is less than the cost of neglect. No matter what the cost of paint, the wind and the weather will collect a higher bill in deterioration and decay.

Query—What do you think of paint as an investment, aside from the appearance it lends? Does it really PAY to paint a house regularly, say, every three or four years?

Answer—Good paint properly applied when needed is the main thing in making a house last long and well. A house worth \$2,000 can be painted at a cost of about \$125. In 60 years that house will need about 15 paintings, the total cost of which will be \$1,875. Left without paint, such a house would fall into complete ruin in 30 years.

Query—I have a quantity of old paint on hand. Can I use it for the first coat in repainting my barn?

Answer—On no account should old paint which has become fat be used for priming either old or new work.

U. S. Invents Anti-Rust "Dope"

Incident to the war, the government has faced the problem that has so long proved baffling to commercial concerns of protecting iron and steel from rust. In an attempt to solve this federal specialists have perfected various forms of protective coatings.

EFFECT OF COLOR UPON THE DURABILITY OF PAINT.

Property owners who may have under consideration the painting of dwellings and other structures should remember that more durable results are obtained when tinted paints are used. Permanent coloring materials which have been ground by machine into a high grade white paint base have the effect of preventing "chalking" and "checking," two defects which are often observed when white paints are used.

PRETTY COLOR COMBINATIONS.

Table with 3 columns: Ground Coat, Stipple Coat, Stencil Coat. Rows include combinations like White/Light Gray, White/Light Warm Yellow, Light Gray/Same Gray, etc.

Design—not Weight

A youthful, graceful figure is the natural result of correct corseting—wearing corsets that are correctly designed, scientifically made and accurately fitted.

AMERICAN LADY CORSETS

American Lady Youthful Stout-Fashion Corsets are just what corsets should be for full-developed figures. They are scientifically designed and made to afford adequate control without the excess weight of straps or buckles.

Let us show you the new models. \$4.00 \$3.50 \$3.00 \$2.50 \$2.00 \$1.50

HOOD RIVER OREGON The PARIS FAIR HOOD RIVER OREGON

TRAGEDY ABOVE THE CLOUDS

Individual Combats and Disasters That Test the Nerves and Wits of the Flying Fighters.

Though airplane battles are tremendously exciting for all those participating in them, it is not always in actual conflict that the nerves and wits of flyers are tested to the utmost.

Every now and then comes the roar of a gun from below, followed by flashes of blue and red, harsh, angry explosions right and left, front and rear, the disappearance in flames sometimes of what till then had been a welcome companion on the wing, the drone of some hardy adventurer strenuously endeavoring to climb into the night, and now and then the awful spectacle of a machine emerging safely from a smoke cloud only to go south into another traveling in a different direction.

An awful smash, a hideous explosion, smoke, human cries, flames and then, with volcanic intensity, the sudden plunging into the abyss not only of what a few moments previously were two magnificently equipped bomb throwers, but four human souls, brave, proud, youthful and adventurous.—Washington Star.

FOR RENT

For Rent—Furnished rooms for rent. Phone 318.

MISCELLANEOUS

Lost—Between Hood River and Station ranch on East Side. A black and white pointer dog. Finder return to Glacier office for reward.

FOR SALE

For Sale—Six pias and mother, also two fine wood saws, all Duce-Jerseys. W. H. Carey, Phone 547.
