dy, who is on the battleship Brooklyn in the Philippine waters. Extracts from the letter, which bore the date of June 22, follow:

Dear ones at home - I will write you after so long a time. I wrote from Shanghai, did not mail it. I am in the Philippines again on the U.S.S. Brooklyn. We are having target practice. Will be through about Wednesday; this is Sunday, then I think we may get to go home. Over half the guys who came out with us have already gone back. I am sure getting sick of this life. It is all right for a while, but it gets old. Morris Wood is on here in the Marine Corps. He and I have made several liberties together. I have just finished a belt made from twine, or thread the size of twine, and it is a beauty. Morris is making one also. I haven't much news. I am on mess duty and get extra pay. I am the spud excavator, so I don't have to peel potatoes. Was just in the ship writers' office and they have not got my request and don't know when we will get to go home. This ship is 450 feet long and draws 28 feet of water. She has eight 8-inch guns and six 6-inch guns, two anti-aircraft guns. They fire six of the 8-inch guns at once yesterday, and maybe you think it didn't shake the ship, and when the shells hit the water they sent a column of water into the air about 100 feet high. It sure is pretty, but oh, the noise of those guns. We have a band on board and they play three or four times a day. When we have movie lectures they play between recs. After target practice the ship is going into the drydock for repairs.
