ARMY WAGONS

Company that they have received (in Portland) a shipment of Army Wagons. Most of these wagons are the new standard automobile truck with which all wagons are now being built. However, a shipment of wide track army wagons will be received this month. These army gears have a 3 x % tire, a capacity of 6,000 pounds and weigh about 1350 pounds. We shall be in a position to fill orders for these wagons at a figure representing about two-thirds of their actual value. This is an exceptional opportunity to get a heavy wagon, built of the best materials according to government specifications, at a real bargain.
