the Waterhouse since it produces splendid fruit in as large quanittes as the Royal Ann or Lambert. Those who purchase nursery stock should see that at least one tree in 10 or 15 is of this variety. These may be scattered throughout the orchard in the most effective manner. If trees are under five or six years of age they may be top worked by budding. The cherry may also be top grafted readily, which is preferable for trees over eight years. When the limbs are small the FIRST whip-graft is best; where large, use the side-graft or cleft-graft method. When top working, work over the en-tire tree. Don't mix the varieties.

The matter of pollenation is very important. If a cherry tree of good vigor and bloom is not producing at east 250 to 300 pounds of cherries when it is 10 or 12 years of age something is wrong with it. The chances are that it needs pollenation of the

People Peeved at War Sales

The department of the government in charge of the sales of surplus war stocks, is not well thought of in Hood River. After a wait of several weeks their orders forwarded to the San Francisco office of the war sales department, remaining unfilled, many asked for a refund of their money. The word came to Postmaster Reavis that the orders were in process of be-

Do Von Enjoy Your Meals?

If you do not enjoy your meals your digestion is faulty. Eat moderately, especially of meats, masticate your food thoroughly. Let five hours elapse between meals and take one of Chamberlain's Tablets immediately after supper and you will soon find your meals to be a supper and you will soon find your meals to be a real pleasure.
