

Who Pays for the Rain?

Farm Machinery is very expensive. If it is not protected during the rainy season you will pay dearly for every shower.

PROTECTION MEANS ADDED PROFITS

Hundreds of photographs and plans of well-designed farm buildings are at our office for your inspection.

See them and make a selection before the rust begins to make you pay for neglect.

FOURTH & CASCADE

Maxwell

Good looks, plenty of comfort and convenience and ample room for five adults make the Maxwell Touring model the ideal car for family use. The popularity of this pleasure car alone, during the past five seasons, would have enabled the Maxwell Motor Company to attain a volume production such as few motor car companies achieve with an entire line.

Five years of intensive manufacture have developed the Maxwell chassis remarkably, and the efforts of the past year to enhance the car's appearance have borne good fruit.

The Touring Car appears this season with a new body. It is just a little more roomy than its predecessors—more space in the tonneau and more clearance and leg room in the driving compartment. This naturally followed as a result of lengthening the chassis several inches.

LOCAL PARTISANS ARE UP IN AIR

Local members of national political parties probably never entered into a presidential year more at sea over timber for party leadership and on issues to be involved in conventions and elections. Judging at least from popular expression, General Leonard Wood is more favorably thought of here as a possible Republican nominee than any other. E. L. Smith has given General Wood his unqualified endorsement. While the local Republican organization has taken no formal action toward the endorsement of any candidate, Wood sentiment seems stronger than any other. Senator Johnson, of California, however, would give a considerable following in Hood River because of his radical views in curbing Japanese aggression.

Lost Lake Park to Be Opened

The beautiful Lost Lake country is now federal property and will be opened to the public as a recreation ground next summer, according to an announcement by the forest service.

The last bit of private property, about 320 acres, on the northeast shore of the lake, owned by the Oregon Lumber Co., has been acquired by the forest service. It is the statement of T. H. Sherrard, supervisor of the Oregon national forest. We have, the Oregon lumber company in exchange, equally valuable timber holdings on the West Fork of Hood river, thus clearing the shores of Lost Lake of private holdings and opening the entire section to vacationists.

The government is now building an automobile road to Lost Lake from Hood River. The road will be completed by summer.
