"I am penalized if ever one comes back"

The Tire that's good for us is good for you

Our business is to make friends and keep them, and that is what Miller Tires are doing for us.

These long-distance Millers are built by uniform workmanship - that's why they render Uniform Mileage under like conditions. Uniform Miller Tires mean no "second bests."

Notice the many cars we are supplying with these tires - you will know them by the famous tread that is Geared-to-the-Road. By meshing the road, this tread gives positive traction, full power ahead and

With Miller Tires goes our ever-ready service. Call up or drive up; you will always find us on the job, willing to oblige.

WILLIAM WEBER, HOOD RIVER, ORE.

THE LITTLE BEAR

Specially Adapted for Orchard Work

Four Horse at the Draw Bar. Forty-Four (44) Inch Track. Fifty (50) Inch Wheel Base. Fifty (50) Inches High, over all. Turns in a Ten Foot Radius. Weighs only 1800 Lbs.

All gears enclosed and kept dust-proof by a device used on no other Tractor.

Roller Pinion: The spool is cut and machined from steel bar the rollers and pins hardened.

Bennett" Air Cleaner is furnished to clean the air entering the carburetor, keeping the cylinders and pistons free

Ford Motor and Transmission used, which means you can get FORD parts for repairs. Time and money saved by this feature alone. FORD parts are cheap in price, high in quality and obtainable anywhere and everywhere.

Cooling System: We do not use the Standard FORD Radiator. Our own special cooling system does the work, 90% of users of "Little Bear" Tractors do not consume over a quart of water a day in nine hours run,

The Fenders are made sufficiently low and wide to protect the fruit and low lying limbs in the orchard. A wide platform, special hitch with swinging draw-bar for close-up work around trees and an electric light for night work are all included in the price of the Tractor.

The "Little Bear" will work in the open field as well as in the orchard.

NITRATE OF SODA NOT CONDEMNED

with it. Just where such an impres-sion comes from I am unable to say. I cannot help but feel that some growers Y. last week, he will run on a d cannot help but feet that some growers have simply jumped at conclusions. The matter of soil fertility is too big a problem to be dismissed by yes or no. Our greatest authorities have been working on the problem for years and yet it must be confessed that much is yet to be learned. Indeed, even many of the fundamentals are yet to be worked out.

The writer has just completed a ser-

ies of articles which were given publis soldier.") cation in the local papers regarding the problem of orchard fertility as he sees dis. ("He'd smash the daylights or If growers would take the time to of the robbers.") study those articles I am sure a wrong

conception of the proper use of nitrate ry Allen. ("He's another good of sods would not be gained. of soda would not be gained. Nitrate of soda has been the grow-er's best friend in the Hood River val-ley. We have made more money from fertilizer in the next ten years. But we must not overlook the fact that in many orchards it has seved its purpose, that of providing our trees with nitro-gen until shade crops such as clover or alfalfa could exert their full influence. "I don't know about anhyody else, except that Pershing will be chief of Our highest authorities claim that com- the staff." mercial nitrogen is detrimental to the growth and functioning of legumes; that it prevents bacterial action and promotes grasses and weeds instead. Evidence was introduced to prove this be so. If, then, we are growing alfalfa or clover to gather nitrogen in a natural way, why apply nitrogen which may defeat this purpose? Where these crops have been grown for some time While it was not sent for publication in the orchard there should now be enough nitrogen available for our trees. Should we be unable to maintain a worth the white space it will occupy. suitable supply of nitrogen by shade crops alone, then we may be compelled to resort to commercial nitrogen, but the need for this does not exist now. Should we find eventually that we must supplement snade crops cial nitrogen we will probably rotate for publication.

2. Thanks for supplement shade crops with commer-

For every pound of these elements we take from the soil we must now or eventually put back an equivalent if normal fertility is to be maintained or built up. We may he able to go on fer built up. We may he able to go on fer built up. We may he able to go on fer built up. We may he able to go on fer built up. We may he able to go on fer built up. years without any fertilizer containing potash, for example, and get yields, but just as surely as the subtraction principle holds good we are depleting our normal supply unless we put this back. This is the reason why the writer suggested that the grower try out a fertilizer rich in potash and phosporic acid. If, in the judgment of the grower, several tons is necessary for a suitable trial that is a matter which he alone may decide. One conclusion is unavoidable, however. Should the grower fail to get a response for the use of such a fertilizer immediately his investment is not lost but that the soil suitable supposed space grafters. writer suggested that the grower try investment is not lost, but that the soil at precent has enough available plant food for normal production. Plant food thus added a production. Plant is maintained instead of being de-

I am afraid some growers who are lepending upon their stand of clover or alfalfa to supply sufficient mtrogen straightforward life hereafter. will be disappointed. In many cases nothing but a feeble growth is present and grasses and sod abound. In many mails a colored envelope such as e year, especially with winter injured trees, he may find himself up against a hard game. If the soil dries out and there is a warm, quick, growing spring and early summer, such trees are bound to suffer severely. The only forget to cultivate in order to conserve taken by boys making their wastore and release plant food. Last Portland. , let me urge that you irrigate and ultivate in a very thorough manner.

HIGH SCHOOL NOTES

(By Laura M. Folts)

The motion picture show given by he seniors last Friday night was a de ided success. An unusual feature of the evening was a comedy orchestra, limmy Johnson, Harold Dixon, Paul Harold Early and Verne Folts, which afforded great amusement be-tween reels. The committee in charge, Teddy Hackett, Claude Gorton, Dorothy Cram and Laura Folts, sincerely thanks the public for their patronage It is estimated that the net proceeds amount to about \$50, which will go to make the Mascot a better annual this

Cannot Praise this Remedy too Highly THE WAY ONE LADY FEELS AFTER

Judging from her letter, the misery and wretchedness endured by Mrs. Charlie Taylor, R. F. D. No. 1, Box 144, Dillon, S. C., must have been terrible. No one, after reading her letter from the control of the control o ing her letter, can continue to doubt the great healing power of PE-RU-NA for troubles due to catarrh or catarrhal conditions in any part of the body. Her etter is an inspiration to every sick and suffering man or woman anywhere. Here it is: "I suffered two years with catarrh of the head, stomach and bowels. Tried two of the best doctors, who gave me up. I then took PE-RU-NA and can truthfully say I am well. When I began to use PE-RU-NA, I weighed one hundred pounds. My weight now is one hundred and fifty. I cannot praise PE-RU-NA too highly, for it was a Godsend to me. I got relief from the first half bottle and twelve bottles cured me. I advise all sufferers to take PE-RU-NA."

PE-RU-NA."

As an emergency remedy in the home, there is nothing quite the could of this reliable, time-tried medicine, PE-RU-NA. Thousands place their sole dependence on it for coughs, colds, stomach and bowel trouble, constipation, rlanmatism, pains in the back, side and loins and to prevent the grip and Spanish Fla. To keep the blad pure and maintain bodily steer the and robustness, take PE-RU-N. and robustness, take PE-RU-N. You can buy PE-RU-NA where in either tablet or

Surest Thing in the World

Two and two have always made four. There would not be more than three million five hundred thousand Ford cars in daily service - which is just about one half of all the automobiles in America-if the Ford, as a reliable motor car, did not meet the demands of all classes of people averywhere and under all circum-

Two and two have always made four. If the material, the iron and the marvelous Vanadium steel used in the construction of the Ford chassis, were not of the highest quality known to the science of Metallurgy, then the Ford car could not have won its world-wide reputation for reliability.

Two and two have always made four. When replacements and repairs are required on Ford cars, the Ford owner will be wise in bringing his car to our place, because we use only the Genuine Ford Parts, and we have the Ford skilled mechanics, and all the Ford knowledge that goes to maintain the high standard of quality which is original in the Ford car.

When you want a Ford car or a Ford truck, and when you want repairs or replacements for the same, we earnestly solicit your business, assuring you of prompt attention, real Ford service, and economical Ford prices.

DeWitt Motor Co.
