

THE NEW DISC BOWL of the UNITED STATES CREAM SEPARATOR

"Best ever seen for skimming clean."

Has been perfected and so simplified in construction that it is the easiest to care for and is unsurpassed in skimming qualities. Bowl spindle is detached.

Disks are exactly alike, unnumbered and therefore interchangeable.

A sectional view of the perfected Disc Bowl.

A patented transfer device for easy handling and washing of the disks and two simple tools for opening and closing the bowl are labor savers.

The cream regulating device is easily adjusted for any desired density of cream.

You are invited to a free demonstration of the superior points found in the New United States Disc Bowl Separator.

"You Save Money" says the Good Judge

And get more genuine chewing satisfaction, when you use this class of tobacco.

This is because the full, rich, real tobacco taste lasts so long, you don't need a fresh chew nearly as often.

And a small chew gives more real satisfaction than a big chew of the ordinary kind ever did. Any man who uses the Real Tobacco Chew will tell you that.

Put up in two styles

W-B CUT is a long fine-cut tobacco
RIGHT CUT is a short-cut tobacco

STONE EXPLAINS NEW YORK COMPANY

A. W. Stone last week issued a circular statement to affiliated growers in explanation of the Consolidated Fruit Co., a New York City sales concern. In his letter of explanation Mr. Stone states that the Consolidated Fruit Co. began business in August, 1920, as a partnership with C. W. McCullach and D. L. Woodruff, the latter the New York sales manager of the Association, as co-members.

This partnership was organized and handled the fruit of the Association for a short time without the knowledge or consent of the general manager or board of directors of the Association," said Mr. Stone.

When information of the concern was received here, the board dispatched Mr. Stone to New York for an investigation, according to the letter. He was to make a full investigation, the board being unanimous in the opinion that the business could not be maintained as outlined.

"It having been concluded that it was inconsistent with our policy to have our salaried salesmen handling our fruit through an organization in which they were financially interested, it became necessary to devise some other outlet," states the letter.

Mr. Stone, following his investigation, organized the Consolidated Fruit Co., Inc., and took over the partnership, a step necessary, he declared, for protecting the prices of Hood River's apple tonnage. The business, he says, continued without a break, the only change being that profits of the concern accrued to the Association.

Mr. Stone on reorganization of the New York concern placed E. W. Birge, president of the Association, on the board and made him vice president. He states this was done without the knowledge or consent of Mr. Birge or any other member of the directorate. The foregoing explanation answers criticism that has been directed at Mr. Birge on the erroneous presumption that he was connected with the original partnership.

Mr. Stone has asked the growers of the Association by their votes at the annual meeting of the organization, to be held here Saturday, to determine whether the directorate of the Association shall discontinue the New York company or maintain it permanently as a sales machine.

ANCIENT VARIETY OF PEAR IS PLANTED

Gordon G. Brown Saturday transplanted to orchards two varieties of pears, which he will test here. One of the pears, the Surprise, is well known in the middle west, where it has successfully resisted cold weather. The variety also resists fire blight.

Pyrus Ussuriensis is the name of the other variety with which Mr. Brown is conducting experiments. This pear was propagated several centuries ago by the Manchu dynasty in northern China. It is not only blight resistant but, according to Mr. Brown, can stand the lowest known temperature. The imported variety of pear can be grown successfully on many soils, and will stand droughts. In instances, says Mr. Brown, roots of the Chinese pear, after having been kept in water for six months, have shown a good growth after planting. Both varieties of pears will stand top working, and after a trunk and body growth is attained varieties of fruit adapted to the local climate may be grafted on.

CREAMERY RECEIVES HIGH COMPLIMENTS

Deputy Leech, of the State Dairy and Food Commission's office, here last week, complimented the Hood River Creamery on its sanitary condition and because of the up to date equipment found. Mr. Leech also tested the butter, declaring it of an extra high grade.

The creamery has made a substantial gain in business over last year. The March output of butter will reach 12,000, while that of the same month a year ago reached only 8,000 pounds.

Road Signs Ordered

The committee of the Business Men's Association, consisting of E. E. Brett, Earl Franz and H. G. Ball, appointed by the county court, has ordered 350 metal signs for use on Hood River highways. The signs will be reared before the spring traffic begins. At first wooden, enameled signs were considered but it was found that metal ones could be secured as cheaply.

The posts for the new signs were purchased from the Emry Lumber & Fuel Co.

Notice of The Annual Meeting of The Members and Stockholders of Apple Growers Association

Notice is hereby given that the annual meeting of the members and stockholders of the Apple Growers Association will be held at the Pythian hall, (formerly Heilbronner hall), in the city of Hood River, Oregon, on Saturday, April 2nd, 1921, at ten o'clock a. m., for the purpose of electing a board of eleven directors for the ensuing year, and for the transaction of such other business as may come before said meeting.

Apple Growers Association,
By A. J. Graff, Secretary.
Approved: E. W. Birge, President.

Elsie May Pruet

Funeral services for Elsie May, aged 2 years and nine months, daughter of Mr. and Mrs. L. C. Pruet, were held Wednesday of last week at the Anderson undertaking parlors. The child was stricken suddenly March 22 with convulsions and died soon afterward. Physicians were unable definitely to diagnose her fatal illness. Rev. D. M. Carpenter, officiated. Interment followed at Hillside cemetery. The baby was the only child of Mr. and Mrs. Pruet.

The Pneumonia Month

March is a typical pneumonia month and usually gives a high rate of mortality for the disease. After a long and hard winter, the system loses much of its resistance and people grow careless. When every cold, no matter how slight, is given prompt and intelligent attention, there is much less danger of pneumonia. It should be borne in mind that pneumonia is a germ disease and breeds in the throat. Chamberlain's Cough Remedy is an expectorant and cleans out the germ laden mucus and not only cures a cold but prevents its resulting in pneumonia. It is pleasant to take. Children take it willingly.

A glimpse of the Ocean and Coast Highway from Torrey Pines—near San Diego, California

The Torrey Pines

THE TORREY PINES are found only within a very limited area near San Diego and Del Mar, California, and on Santa Rosa Island. They are unusual because of their peculiar cones, their very large needles and their picturesque growth.

The motorist traveling the Coast Highway between San Diego and Los Angeles passes through this interesting spot—which the city of San Diego has protected by an extensive municipal park.

Good roads abound in Southern California, and at convenient locations may be found service stations and garages where you can get Red Crown Gasoline—the uniform gasoline with a continuous chain of boiling points.

Look for the Red Crown sign on service stations and garages.
