GROWERS ARE URGED TO APPLY BORDEAUX

(By M. D. Armstrong)

The time has come when some of the apple growers of Hood River valley need to stretch their ideals of grading, increase their vigilance and use added precautions in producing clean fruit if the apples of this section are to maintain their high place in the markets of the world. Many reports come from California by those who visited there last winter that there were many examples of not only diseased fruit but of many apples which were actually far under the grade at which they were sold, and this same condition is in the eastern markets. This condition is of course deplorable and cannot continue without a tremendous loss to the valley in reputation, and the reputation of our apples is dollars and cents to the growers here. Moreover the loss is not confined to the growers who are willing to sacrifice their grade in order to get a few more boxes in the warehouse or who are unwilling to use the proper spraying precautions to insure a sound and longkeeping apple, but is equally shared by the growers who conscientiously pack and insure their fruit against rot in storage by anthracnose and other diseases—their, also, as they have gone to the expense of spraying and careful grading. The selling agencies generally are trying to do theirs and the growers must keep up their end.

There were several factors contributing to the poor keeping quality of the apples last winter but chief among them was that of the anthracnose. This must be eliminated but to be entirely successful the cankers in the trees must be either killed or cut out and burned. This can not be done in a season or in two seasons for the old cankers give spores for three successive falls. The spring Bordeaux or the Bordeaux oil spray may be successful in keeping the trees clean and so gradually kill out the disease as no new cankers can start. Of this we will know more next spring from the tests of the Experiment Station and from growers but in the mean time the fruit and the trees must be kept clean this summer and fall. If the spray is delayed until after harvest bad weather may prevent getting on the spray at all and early rains may cause much of the fruit to be again infected. Therefore to insure a clean good keeping crop of apples, summer Bordeaux should be put on all orchards which are seriously infected. This should be followed by an after harvest spray also for the best results on the trees but is quite effective in preventing infection.

Now what is a seriously infected orchard? Of course any infection is serious as it persists so long. However, if there are but a half dozen or less trees infected to a slight degree the fruit can be picked early and spray applied at once, to the trees surrounding, or a better way still is to carefully go over these trees and cut out all cankers and burn the infected bark at once. Where there is much more than this amount, if not cut out, all infected trees including several rows around them should be removed in the Bordeaux. It should be remembered also that though you do not have the disease in your orchard, if your neighbor has cankers in trees adjoining you that you will have infected fruit unless you spray several rows along the infected orchard. If the disease is general in your orchard or in the neighborhood by all means all of the orchard should get the spray.

Many last winter were disappointed with the summer Bordeaux as much of the red spot of the Newtowna particularly seemed to be due to the spray. It has been proved that this spotting only comes when there is a great excess of rain and as such a season does not come one year out of ten growers can afford to take the risk for the benefit obtained. In some orchards much red spotting occurred with the rain though no Bordeaux was applied. In all classes growers should get the fruit off the trees as soon as it is ripe as the alternate periods of dews, rains and hot sun tend to produce this condition. Many of the best growers in the valley are planning to use this spray this year. H. F. Davidson, of the Hood River Fruit Co., who has opportunity to watch both the producing and the selling end of the apple industry, states that this spray will be applied to all of their orchards this year. They have found that it protects the tree and also that the apples hold up much better in the late season, and that the possible loss is not to be compared with the greater gain in freedom from rot in the apple and in keeping qualities. It is felt that growers had better take a little chance with the red spot and color spotting than take the certain loss of many apples if any rain comes before they are picked. These same statements are made by prominent members of the Apple Growers Association.

This spray can either be applied in the next or in the August spray. If put on in the next arsenical leaf spray, the trees will not be so heavy with fruit and a better job can be done on the tree. It is also probable that in case of rain in excessive amounts the damage would be less. It also has the advantage that the spots of the spray will be distributed more by the growth of the apple and so would not cause the spotting or blotching in color.

Fire Blight

Fire blight has been discovered in several orchards in the Upper Valley and also in an orchard on top of the hill on the old Mosier road. Growers in or near these localities should be on the lookout for this pest, and if it is suspected of being present, notify the county fruit inspector at once. Some growers in Wasco county are having a serious time with this disease and the first infection should be stamped out here at once.

Portland Tennis Players Coming

A party of tennis players from the Multnomah Athletic Club, of Portland, will motor here Sunday to participate in a tournament with members of the Benedict Tennis Club, according to Sidney B. Carnine, of the local organization, who is arranging for the meet. Col. McAlpin, former president of the Portland club and known as the "father of tennis" in Portland athletic circles, will head the visitors, among whom will be several women players. "Our club will probably send a delegation to Portland for a return tournament later in the season," says Mr. Carnine.

"Getzem" Manufactured Here

The Hood River Spray Co. has added a new line to its manufactured articles. The company is now making a preparation for use in spraying livestock for keeping away flies during the summer months. This fly repellent, tried by local dairymen, is said to greatly increase the milk supply. The new product is called "Getzem."

MR. APPLE GROWER

If you are thinking of buying a GRADER, let us put before you the following facts:

1. The CUTLER GRADER was developed in Hood River by Hood River orchardists and has long ago passed the experimental stage.
 2. The CUTLER GRADER has been tested by eight years use in the hands of growers all over the world.
 3. There are more CUTLER GRADERS in use than all other makes put together.
 4. The Sorting Table on any grader is the most important part. The 1921 "Two-Method" Sorting Table is the most efficient device for sorting fruit yet devised. It will enable you to grade your fruit to the best advantage, no matter how your grades run.
 5. The CUTLER MANUFACTURING CO. are in the business to stay and will give you repairs and service whenever you need them.
- Don't invest your money in machines which have not been thoroughly tested and proved and backed by a firm in the business to stay.

MARKETING TALKS

Talk No. 2—Distribution of the Box Apple

Necessity is the Mother of invention. Distribution is the Mother of apple values. War conditions closed the export markets. America was compelled to eat its own apples. It was a groundhog case of eating. That meant more people had to eat them. We had to reach more people. We had to sell in more markets. We can't grow apples and eat 'em ourselves and stay in business. That's certain. The war forced us to distribute. Before 1914 we barely reached four hundred markets. In 1919 the crop was distributed in twenty-five hundred markets. Why the change? Necessity! Our distribution in 1912 was two hundred and fifty carloads per average market used. In 1919 it was one hundred and thirty odd, with a crop three times the size of 1914's. Some improvement but not enough. We must sell in not less than 5000 markets annually to keep off the price toboggan. Only one way to do it. BIGGER DISTRIBUTION. Nothing else but the widest possible distribution will make apple values healthy and permanent.

Our BAR-NONE Brands will be as widely distributed as necessity demands and common sense in marketing methods can accomplish.

MALBOEUF-KIMBALL COMPANY

ANNOUNCEMENT

Having taken over the LOTUS GRILLE, we wish to announce that the place will be maintained for the convenience of Hood River folk desiring its use for entertainment of parties of friends.

The LOTUS GRILLE is ideally equipped for banquets, meeting of civic and fraternal organizations, and such bodies in Hood River contemplating such meetings are invited to meet us.

MT. HOOD HOTEL

CAMPERS ATTENTION

You will find supplies of all kinds at our store. We have outfitted many parties lately. They all express satisfaction. We quote the following specials:
Mountain Maid Pork and Beans; Ripe Olives, 25c per pint in bulk; all kinds of pickles; 15 oz can of kippered herring, 20c; prepared cake flour and all kinds of cookies and pastry foods.

JUDGE WILSON IS BUSY ON CASE

(From The Dalles Chronicle)

With thousands of pages of testimony and attorneys' arguments to read, Circuit Judge Fred W. Wilson is working non-union hours now-a-days in an attempt to get the Hood River valley water-litigation out of the way. All of the major water right claims in Hood River valley are included in one way or another in the litigation. Some nights the judge works as late as 12 and 1 o'clock, and some mornings find him on the job as early as 5 a. m. Judge Wilson expects to finish work on the cases some time in August.

Faith Car Caught Speeding

Traffic Officer Murray reports that one of the automobiles caught speeding on the Highway Sunday bears a license plate issued to the Apostolic Faith of Portland. Mr. Murray states that he was unable to overhaul the car, as he was in pursuit of another machine driven by T. F. Cook, who was booked for speeding. The following others were written up by Mr. Murray for alleged speeding on the Highway:
 George Pease, R. Robinson and Motor Service Co. all of Portland.
 Mr. Murray reports local infractions as follows:
 E. K. Pooley, leaving motor running on city streets, and James Coe, of Seattle, parking on Highway.

Brush Fire Causes Alarm

The fire alarm Saturday afternoon called the Volunteer Fire Department to a brush and grass blaze at the west city limits above the O.-W. R. & N. tracks. No residences were endangered, and the fire was allowed to burn itself out.
 The city was crowded with shoppers, and as the burning grass and brush sent up a great volume of smoke, the alarm created general excitement. Cascade avenue was crowded with motorists and pedestrians hurrying to the fire.

Laundry Workers on Outing

W. A. Schaffner, of the Hood River Laundry, received a letter Monday from "Quit-Your-Kiddin'" lodge, order of Royal Birds, of Portland, an organization of laundry workers and employers, announcing that Portland laundry folk will spend the coming week end on an outing at Trout Lake. The local laundry workers have been invited to participate in the party. The Portland party will arrive here next Friday by automobile over the Highway. They will ferry across to White Salmon and motor up to the Mount Adams district.

STATEMENT

of the First National Bank, of Hood River, County of Hood River, State of Oregon, showing the amount standing to the credit of every depositor July 1, 1921, who has not made a deposit, or who has not withdrawn any part of his deposit (commercial deposits), principal or interest, for a period of more than seven (7) years immediately prior to said date, with the name, last known place of residence or postoffice address of such depositor, and the fact of his death, if known.
 I, S. J. Moore, being first duly sworn, depose and say upon oath, that I am the Cashier of the First National Bank of Hood River, County of Hood River, State of Oregon; that the foregoing statement is a full, true, correct and complete statement, showing the name, last known residence or postoffice address, fact of death, if known, and the amount to the credit of each depositor as required by the provisions of Sections 1916-1918, inclusive, Oregon Laws.
 S. J. Moore.
 Subscribed and sworn to before me this 15th day of July, A. D. 1921.
 C. C. Crew,
 Notary Public for Oregon.
 My commission expires January 22nd, 1923.
