The Story of Our States

By JONATHAN BRACE

XLVII.—ARIZONA

HISTORICAL CALLY, ARIZONA is both the youngest and probably the oldest of our states. While it is the last of the states to be admitted to the Union and as such dates its existence only from 1910, its history before the advent of white men dates back into the dim past. Here were located those interesting people, the Cliff Dwellers, and the ruins of their cities high up in inaccessible places have caused much speculation as to these ancient people. It is supposed that these Cliff Dwellers were the ancestors of the Pueblo Indians and were decidedly more advanced in civilization than their neighbors. They were probably of the same race as the Aztecs of Mexico and understood irrigation, agriculture and the building arts.

It was rumors of the great Pueblos that instigated the first visit of the white men. Padre Nizan in 1539 explored this territory and he was followed by Coronado in search of the mythical wealth of the Indian cities. Coronado, though failing to find the reputed gold, did discover the Grand Canon of the Colorado with its wonderful scenic beauty, which has become one of the great assets of the state.

This region was considered part of Spanish territory and when Mexico declared its independence it became a Mexican province. After the Mexican war the section north of the Gila river was ceded to the United States and the southern portion was acquired through the Gadsden Purchase in 1853. In 1862 Arizona was separated from New Mexico and made a territory.

The derivation of the name Arizona is uncertain, but it possibly came from the Spanish, meaning "dry belt."

Over 100,000 volumes and almost as many pamphlets, etc., have been collected by the French government, and a building will be erected having five miles of shelving. The future historian will probably die in the first mile. The collection of manuscripts, photographs and war records is appalling as to numbers, and there seems to be no limit to the gifts of collectors. In this country Princeton university and the University of California are especially strong on war material.—Scientific American.
