**HIGHWAY ACTIVITY IS NOW WIDESPREAD**

Unprecedented good roads activity is now in progress in the Hood River valley. Crews of the three contractors engaged on parts of the valley trunk of the Mount Hood Loop Highway aggregate 185, and County Roadmaster W. L. Nichols has 60 men employed in various parts of the valley, cutting new links of road or improving existing highways.

Mr. Nichols spent Monday on a tour of all valley highways. He states that the Loop Highway contractors are making good progress. The Webster Construction Co., which has the contract for the first six miles south of the city, with 100 men and a steam shovel, is making fair headway on a grade being cut along the east side of the Hood river, north of the city. The company has crews engaged for a distance of three miles. Five concrete culverts and small bridges are being built.

Joplin & Eldon, who started last fall to cutting the 13-mile unit of the road around Booth Hill, were hampered by the unprecedented heavy snows of the winter. They are now being delayed by huge boulders along the right of way. The large buried rocks were not contemplated, and discovery of them will retard excavations several months, it is anticipated. The company is using a steam shovel. A link of the road between the O. H. Rhodes place and the ranch of E. W. Dunbar is being completed this week.

The Johnson Contracting Co., building the 12 miles of new grade from Booth Hill to the bounds of the Oregon National Forest, is making remarkable headway, according to Mr. Nichols. Four miles of the road have been rough graded. The Union Bridge Co., with 20 men, is constructing a concrete bridge across the East Fork of Hood river.

Mr. Nichols says that travel between the Middle Valley and Mount Hood section is being diverted over a road intersecting the main road, as one travels south, on the left hand side near the place of George Bar. Signs show the traveler where to make the detour.

Mr. Nichols on his tour went as far as Dry Run on the Lost Lake road. He says that he still finds snow drifts from one to three feet deep in the shady places along the upper reaches of the West Fork, and it will be many weeks before the Lost Lake road will be open as far as the lake itself.

"All in all," said Mr. Nichols, "the roads of the county are in excellent condition. The Neal Creek road, where we now have a scraper at work, will be in good condition by the latter part of the week. Unless we have excessive rains, a condition that is not likely to prevail, the valley highways will be in fine shape for Apple Blossom festival on Sunday May 21."

Motorists in the valley to view the scenery and see the bluffs, in case they penetrate the Upper Valley, are advised to take the Neal Creek road on the journey out. This road leaves the Past Side orchard district just east of the country home of Rev. William Sunday. The return trip should be made over Booth Hill grade, from the eminence of which one gets a remarkable bird's-eye view of all the Lower Valley section.

**SHRINE PARTY WILL BE GREETED FRIDAY**

The Hood River Shrine Club tomorrow night at 7:30 o'clock will greet members of Al Kader Temple, en route to Baker by special train in celebration, and entertain them in the city for an hour. The touring Nobles will be accompanied by their band and patrol which will parade the downtown streets and give a concert. Geo. H. McMullin and H. O. Kresse, respectively president and secretary of the local club, have mailed letters to the 80 members of the local Shrine Club as follows:

"Minimal, therefore, of the homage due to our distinguished Temple and its officers and retainers, you will arrange to be at the depot to meet and greet them. We will have a concert by the famous Al Kader band while they are getting their first taste of eastern Oregon fresh air and maybe some other things. Who knows what a bunch of Shriners will do?"

"Bring your flippers along if they want to come. They will enjoy it and these good looking Shriners from Portland are very partial to Hood River femininity since we entertained them last spring."

Immediately following the departure of the caravan for the east, the local club will hold a business meeting at Masonic hall.

**HIGH SCHOOL NOTES**

(By Dorothy Frey)

The home economics department directed by Miss Helen Freese conducted a sale of candy, sandwiches and doughnuts at the county field-track meet last Saturday. The net proceeds will be added to the dining room fund.

Supt. A. M. Cannon was called to Portland by the executive committee of the Oregon State Teachers' Association to formulate a preliminary report by the committee investigating standards of supervision. The other members of this committee were Miss Rose Parrott, of Roseburg High school, chairman, and Miss Grace Williams, of the Glencoe school, Portland. The plan of rating will cover professional equipment, personal equipment, the quality of teaching and its results, professional growth and cooperation in community affairs. Two forms will be prepared, one for the use of superintendents and supervisors and the other for the use of teachers in rating themselves. The rating will be a part of the growth. The Oregon State Teachers' Association has other investigating committees covering teachers' tenure and salaries, placement bureau, teachers' institutes and reading circle work. Final reports from all these committees will be published in the September bulletin and then presented to the state association in December for approval or rejection.

Several of the city teachers spent the week end in Portland, some seeing the Shakespeare plays of Friday and Saturday night.

Only 12 of the 32 city teachers joined the county teachers in their dinner at the Columbia Gorge Hotel last Friday night. The affair was a delightful one.

Last Saturday morning a dual meet was held between the Parkdale High and the Hood River High athletes. The Upper Valley farmers were unable to show good competition except in pole-vauling and so were reassured by a score of 105-18. Cascoe's Locks High was also expected to enter a team but failed to appear at the post-time. There was much competition among the local track men as they were the only entries in some events, causing some friendly rivalry among the members of the team for high-point man. Friday gathered in 23 points for high-point man, with Johnson and Dixon close seconds with 22 points each. Other members of the team were Carson, Issel and Gram, all of whom placed first in one event and some seconds and thirds. The local relay team, consisting of Issel, Johnson, Dixon and Friday, showed good time in the finish of meet by running the half-mile relay in one minute and 46 seconds, easily winning by 150 yards.

**FINS, FURS AND FEATHERS**

Floyd Wright, who has traps and nets in the mid-Columbia, reports that the run of chinook is far ahead of last season. Mr. Wright is supplying the local market and is shipping salmon to canners.

Angling in Hood River continues good. Although fewer streams have been caught this week than last, numerous fishermen have landed fine catches of mountain trout. Numerous fishermen have visited lakes of Klickitat and Skamania counties, Wash., where, according to their reports, fishing was never better than this spring.

The other day a party of boys was seen crossing the business section of the city with an enormous bamboo pole of the joints carefully taped. A young woman bookkeeper in a downtown store, observing the pole, declared that she had never seen any local fishermen using rods of such extreme size. She expressed herself as awaiting a sight of salmon larger than anything ever seen here before. She called the attention of the others large pole, and pretty soon a crowd was following the boys. Eventually it was explained that the big bamboo was used in the pole vault by participants in the field event of a track meet here.

Jake Lenz, who has spent the winter on the headwaters of the West Fork of Hood river trapping, Monday shot a brown bear weighing about 150 pounds. The animal was treed by Mr. Lenz's dog. After he had made a species of a 22-calibre pistol the little bear jumped from the tree and ran into a small hidden cavern. Mr. Lenz followed and dispatched it. Although the cave is only a half mile from Mr. Lenz's lodge, he learned that the bear, a species rarely ever found in this section, had wintered there.

Local men have launched criticism at Silver Gray squirrels, now protected the entire year by statute. W. T. Fricke says the animals, which have become very numerous in all parts of the city, are destroying the nests of all song birds.

"I do not think the squirrels should be protected," says S. E. Bartman. "They are destructive to fruit and nut crops. Their depredations leave us but few English walnuts. The squirrels begin to attack the nuts when they are in the bud stage."

A. B. Cooper reports the largest White Leghorn egg for the season. He has a year-old hen that laid an egg measuring 7 1/2 by 5 1/2 inches. A Minorca belonging to Floyd Regniel laid a larger egg, but Leghorn eggs are ordinarily smaller than the eggs of other chickens, and poultrymen declare they think Mr. Cooper has the record.

Fishing at Trout Lake was fine, according to W. E. North, H. Bressaw and Frank Remillard, who returned from the district last Friday. All the anglers landed the light in less than a day's fishing. Mr. Bressaw caught one trout that measured 20 inches.

**City is Completely Motorized**

The city's white wings department is now using a flusher tank mounted on a motor truck, instead of the old horse-drawn flusher. The town has been completely motorized, all teams having been sold.

The motor equipment, it is said, will enable the flusher to cover a much larger area, and dust will be kept laid this summer and accumulated litter kept cleaned up.

**CLOTHING NEEDED FOR NEAR EAST**

Spare clothing is wanted to help clothe the near-naked people of the Near East and May 24 has been designated as nation-wide Bundle day.

"Five hundred thousand people, at least one-fifth of the present population of the Near East, have been clothed in cast off American garments during the past year," says J. J. Handaker, state director of Near East Relief, who spent last summer in the Near East and southeastern Russia.

"With the exception of food there is no need greater than that of clothing. Therefore we are asking that the people of Oregon respond to the appeal for warm clothing and shoes. Last year 70 tons of clothing was sent from Oregon to the Near East."

New clothes wear out fast enough. The supply of half worn garments is now completely exhausted. Numberless men, women and children are destitute of clothing and thousands have no covering whatever save the thinnest rags. The children of the Near East Relief orphanages, under the direction of the relief workers, manufacture much of their own clothing, but the majority of them and almost the entire population of Armenia, will have to dress in American second hand clothes again next year.

Schools, churches, clubs and lodges and other organized groups all over the state are making the appeal for spare clothing through speakers, motion pictures, illustrated circulars and the press. It is also to be presented to clothing concerns whose shelves and storerooms may be cleared of shop worn garments that are too poor to sell and too good to throw away.

What is needed? Just what would be needed in Oregon if for seven years no clothing, cloth or even buttons, needles and thread had been available! If no local station has been arranged, clothing may be sent direct to Near East Relief, 613 Stock Exchange Bldg., Portland, Ore.

**LOST LAKE ROAD TO GET \$8,000**

Cecil Lord, road engineer of the Portland Forestry Service office, left Tuesday with Chief Forest Ranger

Walters and W. A. Langille to make a preliminary survey of a county road from Dee, connecting with the Lost Lake Highway in the bounds of the national forest. The county court has appropriated \$2,500 for the new grade, and an additional sum of \$1,500 will be raised by private subscription. The forestry service has appropriated \$4,000 for the work.
