CERTAIN-TEED
 QUALITY ROOFING-PAPER
 "Roofs don't wear out, they dry out"

It is not the washing rains and the snows of the winter that work the havoc on roofs, as most people think—the element that does the most harm to Roofing, is the sun. After the sun has baked the "Life" out of the roofing material, the rain, snow and wind get in their work.
 This is why CERTAIN-TEED Roofing is made soft in the center without regard to the fact that making a harder saturation would make it tougher to tear by building the felt fibres more firmly together. The satisfactory service given over long periods of time and in all parts of the world has proven the superior merits of CERTAIN-TEED Roofing. This quality roofing paper is sold to you at a reasonable price.
