How Not to Take Cold

Some persons are subject to frequent colds, while others seldom, if ever, have a cold. You will find that the latter take good care of themselves. They take a shower or cold sponge bath every day in a warm room, avoid over heated rooms, sleep with a window open or partly open, avoid excesses, over eating, becoming overheated and then chilled and getting the feet wet. Then, when they feel the first indication of a cold, they take Chamber and the is soon over.
