### MOTOR POWER GENERATOR FOR AUTOMOBILES AND GAS ENGINES

Saves Gas, Increases Mileage, Insures Clean Spark and Cooler Pistons. Eliminates carbon, aids lubrication, decreases oil consumption, and makes motor more efficient. Automatically controlled by suction of cylinders. No springs or valves to get out of order.

The Motor Power Generator utilizes the live vapor, above the gasoline level, in the supply tank, superheats this vapor and unites it with steam or moist air. The mixing of the gasoline vapor and live steam from the radiator, takes place in the sweating chamber of the instrument, becoming a powerful hydrogen explosive mixture that is drawn by the suctions of the motor, into the intake manifold, there to be distributed, with the regular carburetor supply, to the cylinders for consumption. After a Motor Power Generator has been installed a recodiment of the consumption. installed, a re-adjustment of the carburetor is necessary, the regular supply of fuel having to be cut down considerably.

Agent, L. F. BRAZEAU

Hood River was a deserted village yesterday. All the groceries and meat markets of the city were closed tight and the proprietors, clerks and members of all their families, with lunch boxes full and overflowing, left at an early hour for Bonneville to attend the annual grocers' picnic.

Hood River was a deserted village ath Falls and is now successfully established in the insurance business.

Before the young couple departed for a honeymoon at Crater lake, dainty refreshments were served by Mrs. Iglassisted by Miss Vera Houston.

Mr. and Mrs. Houston will be at home to their friends after July 20, at the fill North Eighth street.
